Ingman, Ian Lawson, 2012-12-06 There is both a timeliness and a transcendent rightness in the fact that scholars clinicians and health professionals are beginning to examine the ethics based components of decision making in health care of the elderly Ethics as the discipline concerned with right or wrong conduct and moral duty pervades hospital rooms nursing home corridors physicians offices and the halls of Congress as decisions are made that concern the allocation of health related services to individuals and groups in need In particular care of older persons recently has received disproportionate attention in discussions of ethics and clinical care Age alone of course should not generate special focus on ill individuals about whom concerns arise based on value conflicts tacitly involved in the delivery of health care Having said that age is not the principal criterion for attention to ethics based concerns in health care it must be acknowledged that old people have a high prevalence of conditions that provoke interest and put them in harm's way if value conflicts are not identified and seriously addressed Issues that concern autonomy the allocation of scarce resources inter generational competition and conflict the withholding of treatment in treatable disease and substitute and proxy decision making for the cognitively impaired all have special relevance for older persons **National Health Insurance** United States. Congress. House. Committee on Ways and Means. Subcommittee on Health, 1976 **Ambiguous Memory** Siobhan Kattago, 2001-07-30 Ambiguous Memory examines the role of memory in the building of a new national identity in reunified Germany The author maintains that the contentious debates surrounding contemporary monuments to the Nazi past testify to the ambiguity of German memory and the continued link of Nazism with contemporary German national identity The book discusses how certain monuments and the ways Germans have viewed them contribute to the different ways Germans have dealt with the past and how they continue to deal with it as one country Kattago concludes that West Germans have internalized their Nazi past as a normative orientation for the democratic culture of West Germany while East Germans have universalized Nazism and the Holocaust transforming it into an abstraction in which the Jewish question is down played In order to form a new collective memory the author argues that unified Germany must contend with these conflicting views of the past incorporating certain aspects of both views Providing a topography of East West and unified German memory during the 1980s and the 1990s this work contributes to a better understanding of contemporary national identity and society The author shows how public debate over such issues at Ronald Reagan's visit to Bitburg the renarration of Buchenwald as Nazi and Soviet internment camp the Goldhagen controversy and the Holocaust Memorial debate in Berlin contribute to the complexities surrounding the way Germans see themselves their relationship to the past and their future identity as a nation In a careful analysis the author shows how the past was used and abused by both the East and the West in the 1980s and how these approaches merged in the 1990s This interesting new work takes a sociological approach to the role of memory in forging a new integrative national identity Living Beyond Expectations William M.
