*Contours of the Nation* Deborah McPhail, 2017-10-31 The obesity epidemic that is said to plague nations around the world including Canada is not solely a medical condition to be managed In Canada the discourse on obesity emerged during a time of social upheaval in the postwar period *Contours of the Nation* is the first book which historically explores obesity in Canada from a critical perspective Deborah McPhail demonstrates how obesity as a problem was affixed to particular populations in order to separate true Canadians from others She reveals how the articulation of obesity contributed to the Canadian colonial project in the North where Indigenous peoples were viewed as modern Canadians due to their obesity thereby negating any special claims to northern lands *Contours of the Nation* successfully demonstrates how histories can trace the actual materialization of bodies through relations of power particularly those pertaining to race gender and nation Strangers in Our Midst Elise Chenier, 2008-06-28 Contemporary efforts to treat sex offenders are rooted in the post Second World War era in which an unshakable faith in science convinced many Canadian parents that pedophilia could be cured *Strangers in Our Midst* explores the popularization of the notion of sexual deviancy as a way of understanding sexual behaviour the emergence in Canada of legislation directed at sex offenders and the evolution of treatment programs in Ontario Popular discourses regarding sexual deviancy legislative action against sex criminals and the implementation of treatment programs for sex offenders have been widely attributed to a reactionary conservative moral panic over changing sex and gender roles after the Second World War Elise Chenier challenges this assumption arguing that in Canada advocates of sex offender treatment were actually liberal progressives Drawing on previously unexamined sources including medical reports government commissions prison files and interviews with key figures *Strangers in Our Midst* offers an original critical analysis of the rise of sexological thinking in Canada and shows how what was conceived as a humane alternative to traditional punishment could be put into practice in inhumane ways *Intimate Integration* Allyson Stevenson, 2020-12-07 Privileging Indigenous voices and experiences *Intimate Integration* documents the rise and fall of North American transracial adoption projects including the Adopt Indian and M tis Project and the Indian Adoption Project Allyson D Stevenson argues that the integration of adopted Indian and M tis children mirrored the new direction in post war Indian policy and welfare services She illustrates how the removal of Indigenous children from their families and communities took on increasing political and social urgency contributing to what we now call the Sixties Scoop Making profound contributions to the history of settler colonialism in Canada *Intimate Integration* sheds light on the complex reasons behind persistent social inequalities in child welfare

**Ring Around the Maple** Cynthia R. Comacchio, Neil

Sutherland, 2024-10-29 *Ring Around the Maple* is about the condition of children in Canada from roughly 1850 to 2000 a time during which the modern increasingly disrupted traditional ways Authors Cynthia R Comacchio and Neil Sutherland trace the lives of children over this long century with a view to synthesizing the rich interdisciplinary often multi disciplinary literature that has emerged since the 1970s Integrated into this synthesis is the authors new research into many often seemingly disparate archival and published primary sources Emphasizing how the child and childhood are sociohistoric constructs and employing age analytically and relationally they discuss the constants and the variants in their historic dimensions While childhood tangibly modernized during these years it remained a far from universal experience due to identifiers of race gender culture region and intergenerational adaptations that characterize the process of growing up This work highlights children s perspectives through close critical against the grain readings of diaries correspondence memoirs interviews oral histories and autobiographies many buried in obscure archives It is the only extant historical discussion of Canadian children that interweaves the experiences of First Nations M tis and Inuit children with those of children from a number of settler groups *Ring Around the Maple* makes use of photographs catalogues advertisements government publications musical recordings radio shows television shows material goods documentary and feature films and other such visual and aural testimony Much of this evidence has not to date been used as historical testimony to uncover the lives of ordinary children This book is generously illustrated with photographs and ephemera carefully selected to reflect children s lives conditions interests and obligations It will be of special interest to historians and social scientists interested in children and the culture of childhood but will also appeal to readers who enjoy the little stories that together make up our collective history especially when those are told by the children who lived them

mathematics CFD completely integrable systems chaos synergetics and large scale order which are almost impossible to fit into the existing classification schemes They draw upon widely different sections of mathematics     Power and Marginalization in Popular Culture Lisa A. King, 2020-05-21 In many pop culture texts monsters can be read as metaphors for marginalized Others in U S culture This book applies the philosophical lens of Michel Foucault's normalizing and bio powers to zombies vampires magicians genetic mutants and others asking whether these stories of apparent liberation really are so Exploring a single theme in depth across a series of pop culture texts this book encourages a radical new understanding of liberation narratives and of political activism as a mechanism of social change     Transactions American Society for Metals, 1929     Gröbner Bases Takayuki Hibi, 2014-01-07 The idea of the Gröbner basis first appeared in a 1927 paper by F S Macaulay who succeeded in creating a combinatorial characterization of the Hilbert functions of homogeneous ideals of the polynomial ring Later the modern definition of the Gröbner basis was independently introduced by Heisuke Hironaka in 1964 and Bruno Buchberger in 1965 However after the discovery of the notion of the Gröbner basis by Hironaka and Buchberger it was not actively pursued for 20 years A breakthrough was made in the mid 1980s by David Bayer and Michael Stillman who created the Macaulay computer algebra system with the help of the Gröbner basis Since then rapid development on the Gröbner basis has been achieved by many researchers including Bernd Sturmfels This book serves as a standard bible of the Gröbner basis for which the harmony of theory application and computation are indispensable It provides all the fundamentals for graduate students to learn the ABC's of the Gröbner basis requiring no special knowledge to understand those basic points Starting from the introductory performance of the Gröbner basis Chapter 1 a trip around mathematical software follows Chapter 2 Then comes a deep discussion of how to compute the Gröbner basis Chapter 3 These three chapters may be regarded as the first act of a mathematical play The second act opens with topics on algebraic statistics Chapter 4 a fascinating research area where the Gröbner basis of a toric ideal is a fundamental tool of the Markov chain Monte Carlo method Moreover the Gröbner basis of a toric ideal has had a great influence on the study of convex polytopes Chapter 5 In addition the Gröbner basis of the ring of differential operators gives effective algorithms on holonomic functions Chapter 6 The third act Chapter 7 is a collection of concrete examples and problems for Chapters 4 5 and 6 emphasizing computation by using various software systems     *An Introduction to Noncommutative Noetherian Rings* K. R. Goodearl, Robert B. Warfield, 2004-07-12 This introduction to noncommutative noetherian rings is intended to be accessible to anyone with a basic background in abstract algebra It can be used as a second year graduate text or as a self contained reference Extensive explanatory discussion is given and exercises are integrated throughout This edition incorporates substantial revisions particularly in the first third of the book where the presentation has been changed to increase accessibility and topicality New material includes the basic types of quantum groups which then serve as test cases for the theory developed     *Canadian Journal of Mathematics* , 1981-04     **Skew Linear Groups** M. Shirvani, B. A. F. Wehrfritz, 1986 This book is

concerned with subgroups of groups of the form  $GL_n(D)$  for some division ring  $D$ . In it the authors bring together many of the advances in the theory of skew linear groups. Some aspects of skew linear groups are similar to those for linear groups; however, there are often significant differences either in the method of proof or the results themselves. Topics covered in this volume include irreducibility, unipotence, locally finite dimensional division algebras, and division algebras associated with polycyclic groups. Both authors are experts in this area of current interest in group theory and algebraists and research students will find this an accessible account of the subject.

**Power and Resistance** Yoshiyuki Sato, 2022-10-18 Proposes a provocative reinterpretation of poststructuralist theory of power. The structuralist theories of power show that the subject is produced and reproduced by the investment of power, but how then can we think of the subject's resistance to power? Based on this fundamental question, *Power and Resistance* interprets critically the poststructuralist theory of power and resistance, i.e. the theories of Foucault, Deleuze, Guattari, Derrida, and Althusser. It analyses also the mechanism of power and the strategies of resistance in the era of neoliberalism. This meticulous analysis that completely renewed the theory of power is already published in French, Japanese, and Korean with success.

*Gender, Madness, and Colonial Paranoia in Australian Literature* Laura Deane, 2017-05-31 This book offers an original and compelling analysis of women's madness, gender, and the Australian family. Taking up Anne McClintock's call for critical works that psychoanalyze colonialism, this radical re-assessment of novels by Christina Stead and Kate Grenville provides a sustained account of women's madness and masculine colonial psychosis from a feminist postcolonial perspective. This book rethinks women's madness in the context of Australian colonialism. Taking novels of madness by Christina Stead and Kate Grenville as its point of critical departure, it applies a post-Reconciliation lens to the study of Australia's gender and racial codes to place Australian sexism and misogyny in their proper colonial context. Employing

madness as a frame to rethink postcolonial theorizing in Australia Gender Madness and Colonial Paranoia in Australian Literature psychoanalyses colonialism to argue that Australia suffers from a cultural pathology based in the strategic forgetting of colonial violence This pathology takes the form of colonial paranoia about race and gender producing distorted gender codes and ways of being Australian This book maps the contours of Australian colonial paranoia weaving feminist literary theory psychoanalysis and postcolonial theory with poststructuralist approaches to reassess the traditional canon of critical madness scholarship and the place of women's writing within it This provocative work marks a radical departure from much recent feminist cultural and postcolonial criticism and will be essential reading for students of Australian literature cultural studies and gender studies wanting a new insight into how the Australian psyche is shaped by settler colonialism

**The Power of Feminist Theory** Amy Allen, 2025-06-17 In this new second edition of *The Power of Feminist Theory* Domination Resistance Solidarity Amy Allen diagnoses the inadequacies of previous feminist conceptions of power and draws on the work of a diverse group of theorists of power including Michel Foucault Judith Butler bell hooks and Hannah Arendt in order to construct a new feminist conception of power The conception of power developed in this book enables readers to theorize domination resistance and solidarity and perhaps more importantly to do so in a way that illuminates the interrelatedness of these three modalities of power The new edition of this foundational text includes substantial new material on intersectionality and power transnational feminism and power in relation to homonationalism and neo imperialism and empowerment feminism It addresses important criticisms of Foucault Arendt and Butler that have been raised by Black feminists critical philosophers of race postcolonial theorists and Marxists *The Power of Feminist Theory* Domination Resistance Solidarity is an essential text for students engaging with feminist analyses of power feminist theory and feminist political thought

**Zariskian Filtrations** Li Huishi, Freddy Van Oystaeyen, 2013-04-17 In *Commutative Algebra* certain adic filtrations of Noetherian rings i.e. the so called Zariski rings are at the basis of singularity theory Apart from that it is mainly in the context of Homological Algebra that filtered rings and the associated graded rings are being studied not in the least because of the importance of double complexes and their spectral sequences Where non commutative algebra is concerned applications of the theory of filtrations were mainly restricted to the study of enveloping algebras of Lie algebras and more extensively even to the study of rings of differential operators It is clear that the operation of completion at a filtration has an algebraic genotype but a topological phenotype and it is exactly the symbiosis of Algebra and Topology that works so well in the commutative case e.g. ideles and adèles in number theory or the theory of local fields Puisseux series etc In Non commutative algebra the bridge between Algebra and Analysis is much more narrow and it seems that many analytic techniques of the non commutative kind are still to be developed Nevertheless there is the magnificent example of the analytic theory of rings of differential operators and  $D$ -modules à la Kashiwara Shapira
