Norman Foster Commerzbank Frankfurt Am Main:

Norman Foster: Commerzbank, Frankfurt Am Main (Opus 21) Volker Fischer, Horst Grüneis, Ralph Richter, 1997 Norman Foster one of the most consistent advocates of architecture based on modern technology achieved a world wide reputation with the headquarters for the Hong Kong and Shanghai Banking Corporation in Hong Kong Stansted Airport in London Century Tower in Tokyo and his telecommunications tower in Barcelona His most important projects in Germany are the conversion of the Reichstag building in Berlin and the new Commerzbank headquarters in Frankfurt am Main The Commerzbank Headquarters by Norman Foster Esther Rieck, 2006-02-13 Seminar paper from the year 2006 in the subject English Language and Literature Studies Culture and Applied Geography grade 2 3 University of Paderborn course The Cultural Heritage The Nineteen Nineties language English abstract The subject matter of this term paper is a description as well as an interpretation of the Commerzbank Headquarters in Frankfurt which was built by Norman Foster First I will say a few words about Norman Foster and his works and afterwards about the background of the Commerzbank In the main part I want to concentrate on the Commerzbank in Frankfurt with its structure and how this green skyscraper works Norman Foster was born in Manchester in 1935 In 1961 after his final degree at the School of Architecture and City Planning at the University of Manchester he was given a bursary of the University of Yale where he finished his studies with a master s degree in architecture In 1963 he formed the Team 4 together with his colleague and friend Richard Rogers Four years later they split off and went separate ways Foster founded Foster Associates which was later renamed in Foster and Partners He was knighted in 1990 and appointed to the Order of Merit in 1997 In 1999 he was created a life peer Foster has received more than 190 awards and citations for his projects and has won over 50 national and international competitions The Commerzbank Tower at 300 meters tall is one of the tallest buildings in Europe and the tallest naturally ventilated building in the world The German political and social environment played a big role in the development of the design for this building Frankfurt s Green Party strongly encouraged Commerzbank s new structure to be obviously green The aim was to create a revolutionary high rise a high rise that would be both environmentally and people friendly This building would also have to be a landmark for a town committed to building towers that symbolize hope for a future as a key European financial centre while providing space for about 2600 employees In order to fulfil these requirements and still create green architecture Norman Foster had to redesign the concept the skyscraper itself Some of the ideas which were realized in Frankfurt had their roots in earlier works done by Foster Back in 1971 he tried to integrate nature into an office building Willis Faber Dumas with its roof garden was his first building where he combined a garden with an office building A few years later the Hong Kong and Shanghai Bank Headquarters was envisioned to have gardens in the sky but this idea was never realized

Norman Foster Norman Foster, David Jenkins, 2002 Bringing together contributions from noted commentators alongside essays and observations by Norman Foster and his colleagues this book explores several of the architect s most recognisable

buildings including the Hongkong and Shanghai Bank Headquarters the Sackler Galleries and the Carr d Art Guide to Natural Ventilation in High Rise Office Buildings Antony Wood, Ruba Salib, 2013 This guide sets out recommendations for every phase of the planning construction and operation of natural ventilation systems in these buildings including local climatic factors that need to be taken into account how to plan for seasonal variations in weather and the risks in adopting different implementation strategies All of the recommendations are based on analysis of the research findings from richly illustrated international case studies This is the first technical guide from the Council on Tall Buildings and Urban Habitat s Tall Buildings Sustainability Working Group looking in depth at a key element in the creation of tall buildings with a much reduced environmental impact while taking the industry closer to an appreciation of what constitutes a sustainable tall building and what factors affect the sustainability threshold for tall **The Environmental Performance of Tall**

Buildings Joana Carla Soares Gonçalves, 2010 Tall buildings represent one of the most energy intensive architectural typologies while at the same time offering the high density work and living conditions that many believe will an important constituent of future sustainable communities How then can their environmental impact be lessened This insightful book takes in an overview of the tall building and its impacts looking at cityscape place mobility microclimate energy and economics design principles and the development of the sustainable tall building global perspectives covering North and South America Europe the Middle East and Asia detailed qualitative case studies of buildings in design and operation the future for sustainable tall buildings Not simply another showcase for future utopian designs and ideals the information presented here is based on hard research from operating buildings Highly illustrated and combining analysis with solid detail for practice this is essential reading for architects building engineers design consultants retrofitters and urban planners interested in or working with tall buildings and researchers students in these disciplines Eco-Towers K.

Al-Kodmany, 2015-05-05 Eco Towers introduces readers to groundbreaking designs most progressive projects and innovative ways of thinking about a new generation of green skyscrapers that could provide solutions to crises the world faces today including climate change depleting resources deteriorating ecology population increase decreasing food supply urban heat island effect pollution deforestation and more The book suggests that the eco tower culminates the cultural and technological evolutions of the 21st century by building and improving on the experiences of earlier designs of skyscrapers and philosophies particularly green sustainable and ecological It argues that the true green skyscraper is the one that engages successfully with its larger urban context by establishing symbiotic relationships with the social economic and environmental aspects Since tall buildings are becoming larger and taller serving greater number of people and exerting higher demand on the environment and existing infrastructure any improvements in their design and construction will significantly enhance urban conditions The book elucidates how green skyscrapers better serve tenants mitigate environmental impacts and improve integration with the city infrastructure It explains how skyscrapers long life cycle offers the greatest justifications

for recycling precious resources and makes it a worthwhile to employ green features in constructing new skyscrapers and retrofitting existing ones Subsequently the book explores new designs that are employing cutting edge green technologies at a grand scale including water saving technologies solar panels helical wind turbines sunlight sensing LED lights rainwater catchment systems graywater and blackwater recycling systems seawater powered air conditioning and the like In the future new building materials and smart technologies will continue to offer innovative design approaches to sustainable tall buildings with new aesthetics referred to as eco iconic skyscrapers

Handbook of Green Building Design and Construction Sam Kubba,2016-10-15 Handbook of Green Building Design and Construction LEED BREEAM and Green Globes Second Edition directly addresses the needs of building professionals interested in the evolving principles strategies and concepts of green sustainable design Written in an easy to understand style the book is updated to reflect new standards to LEED In addition readers will find sections that cover the new standards to BREEAM that involve new construction Infrastructure data centers warehouses and existing buildings Provides vital information and penetrating insights into three of the top Green Building Codes and Standards applied Internationally Includes the latest updates for complying with LEED v4 Practices and BREEAM Presents case studies that draws on over 35 years of personal experience from across the world

Commerzbank Tower Norman Foster,Colin Davies,2013-06 At 56 stories and just under 1 000 feet the Commerzbank Tower in Frankfurt is Germany s tallest building and the second tallest in the European Union Height is not the only distinguishing feature of the Commerzbank Tower As this illustrated guide to its design and construction reveals this iconic structure is also the world s first ecological high rise office building This sleek and beautifully designed book explores every aspect of Foster s pioneering project from the central spiraling atrium which allows for natural light and ventilation to the outside gardens that give the building a sense of airiness and transparency One of Foster Partners most influential projects this tower wields a low impact on the environment while offering the neighborhood an attractive site for cultural events

AUTHOR Norman Foster is the Founder and Chairman of Foster Partners one of the most respected international architectural practices He was awarded the Pritzker Architecture Prize in 1999 and the Praemium Imperiale in 2002 and in 2009 he became the twenty ninth laureate of the Prince of Asturias Award for Arts He was granted a knighthood in 1990 and was appointed to the Order of Merit in 1997 100 illustrations

Sustainable Urban Development Reader Stephen M. Wheeler,Timothy Beatley,2014-10-03 Building on the success of its second edition the third edition of the Sustainable Urban Development Reader provides a generous selection of classic and contemporary readings giving a broad introduction to this topic It begins by tracing the roots of the sustainable development concept in the nineteenth and twentieth centuries before presenting readings on a number of dimensions of the sustainability concept Topics covered include land use and urban design transportation ecological planning and restoration energy and materials use economic development social and environmental justice and green architecture and building All sections have a concise editorial introduction that places the

selection in context and suggests further reading Additional sections cover tools for sustainable development international sustainable development visions of sustainable community and case studies from around the world The book also includes educational exercises for individuals university classes or community groups and an extensive list of recommended readings The anthology remains unique in presenting a broad array of classic and contemporary readings in this field each with a concise introduction placing it within the context of this evolving discourse The Sustainable Urban Development Reader presents an authoritative overview of the field using original sources in a highly readable format for university classes in urban studies environmental studies the social sciences and related fields It also makes a wide range of sustainable urban planning related material available to the public in a clear and accessible way forming an indispensable resource for anyone interested in the future of urban environments

The Skycourt and Skygarden Jason Pomeroy, 2013-11-20 Population increases advances in technology and the continued trend towards inner city migration have transformed the traditional city of spaces into the modern city of objects This has necessitated alternative spatial and technological solutions to replenish those environments that were once so intrinsic to society's day to day interactions and communal activities This book considers skycourts and skygardens as alternative social spaces that form part of a broader multi level urban infrastructure seeking to make good the loss of open space within the built environment Jason Pomeroy begins the discussion with the decline of the public realm and how the semi public realm has been incorporated into a spatial hierarchy that supports the primary figurative spaces on the ground or in their absence creates them in the sky He then considers skycourts and skygardens in terms of the social cultural economic environmental technological and spatial benefits that they provide to the urban habitat Pomeroy concludes by advocating a new hybrid that can harness the social characteristics of the public domain but be placed within buildings as an alternative communal space for the 21st century Using graphics and full colour images throughout the author explores 40 current and forthcoming skycourt and skygarden projects from around the world including the Shard London Marina Bay Sands Singapore the Shanghai Tower China and the Lotte Tower South Korea

The Architecture of Use Stephen Grabow, Kent Spreckelmeyer, 2014-10-03 By analyzing ten examples of buildings that embody the human experience at an extraordinary level this book clarifies the central importance of the role of function in architecture as a generative force in determining built form Using familiar twentieth century buildings as case studies the authors present these from a new perspective based on their functional design concepts Here Grabow and Spreckelmeyer expand the definition of human use to that of an art form by re evaluating these buildings from an aesthetic and ecological view of function Each building is described from the point of view of a major functional concept or idea of human use which then spreads out and influences the spatial organization built form and structure In doing so each building is presented as an exemplar that reaches beyond the pragmatic concerns of a narrow program and demonstrates how functional concepts can inspire great design evoke archetypal human experience and help us to understand how architecture embodies the deeper
