McCourt,2023-06-13 Tracing constructivist work on culture identity and norms within the historical geographical and professional contexts of world politics this book makes the case for new constructivist approaches to international relations scholarship *International Relations Theories* Timothy Dunne,Milja Kurki,Steve Smith,2013-01-03 Drawing on a wealth of expertise from an international team of contributors the second edition of *International Relations Theories* presents a diverse selection of theoretical positions Arguing that theory is central to explaining the dynamics of world politics editors Tim Dunne Milja Kurki and Steve Smith cover a wide variety of theoretical positions from the historically dominant traditions to powerful critical voices since the 1980s The editors have brought together a team of international contributors each specializing in a different theory The contributors explain the theoretical background to their positions before showing how and why their theories matter The book opens up space for analysis and debate allowing students to decide which theories they find most useful in explaining and understanding international relations **The Oxford Handbook of International Relations** Christian Reus-Smit,Duncan Snidal,2010-07 This Oxford Handbook assembles the world s leading scholars in

Routledge Handbook of Critical International Relations Jenny Edkins,2019-03-11 Critical international relations is both firmly established and rapidly expanding and this Handbook offers a wide ranging survey of contemporary research It affords insights into exciting developments more challenging issues and less prominent topics examining debates around questions of imperialism race gender ethics and aesthetics and offering both an overview of the existing state of critical international politics and an agenda setting collection that highlights emerging areas and fosters future research Sections cover critique and the discipline relations beyond humanity art and narrative war religion and security otherness and diplomacy spaces and times resistance and embodiment and intimacy An international group of expert scholars whose contributions are commissioned for the volume provide chapters that facilitate teaching at advanced undergraduate and postgraduate level inspire new generations of researchers in the field and promote collaboration cross fertilisation and inspiration across sub fields often treated separately such as feminism postcolonialism and poststructuralism The volume sees these strands as complementary not contradictory and emphasises their shared political goals shared theoretical resources and complementary empirical practices Each chapter offers specific focused in depth analysis that complements and exemplifies the broader coverage making this Routledge Handbook of Critical International Relations essential reading for all students and scholars of international relations **Theory of the Global State** Martin Shaw,2000-11-30 This book first published in 2000 analyses global change which critiques modern social thought and global theory examining global democratic revolution *What is a Just Peace?* Alexis Keller,2006-01-26 Just War has attracted considerable attention The words peace and justice are often used together Surprisingly however little conceptual thinking has gone into what

constitutes a Just Peace This book which includes some of the world s leading scholars debates and develops the concept of Just Peace The problem with the idea of a Just Peace is that striving for justice may imply a Just War In other words peace and justice clash at times Therefore one often starts from a given view of what constitutes justice but this a priori approach leads especially when imposed from the outside straight into discord This book presents conflicting viewpoints on this question from political historical and legal perspectives as well as from a policy perspective The book also argues that Just Peace should be defined as a process resting on four necessary and sufficient conditions thin recognition whereby the other is accepted as autonomous thick recognition whereby identities need to be accounted for renouncement requiring significant sacrifices from all parties and finally rule the objectification of a Just Peace by a text requiring a common language respecting the identities of each and defining their rights and duties This approach based on a language oriented process amongst directly concerned parties goes beyond liberal and culturalist perspectives Throughout the process negotiators need to build a novel shared reality as well as a new common language allowing for an enduring harmony between previously clashing peoples It challenges a liberal view of peace founded on norms claiming universal scope The liberal conception has difficulty in solving conflicts such as civil wars characterized typically by fundamental disagreements between different communities Cultures make demands that are identity defining and some of these defy the cultural neutrality that is one of the foundations of liberalism Therefore the concept of Just Peace cannot be solved within the liberal tradition

Transnational Solidarity Helle Krunke,Hanne Petersen,Ian Manners,2020-07-09 The book analyses the concept and conditions of transnational solidarity its challenges and opportunities drawing on diverse disciplines as Law Political Science Sociology Philosophy Psychology and History In the contemporary world we see two major opposing trends The first involves nationalistic and populist movements Transnational solidarity has been under pressure for a decade because of among others global economic and migration crises leading to populist and authoritarian leadership in some European countries the United States and Brazil Countries withdraw from international commitments on climate trade and refugees and the European Union struggles with Brexit The second trend partly a reaction to the first is a strengthened transnational grass root community a cosmopolitan movement which protests primarily against climate change Based on interdisciplinary reflections on the concept of transnational solidarity its challenges and opportunities are analysed drawing on Europe as a focal case study for a broader global perspective *Coping and Conformity in World Politics* Hugh C. Dyer,2009-12-16 This book introduces the conceptual frameworks of coping and conformity to provide a new analysis of the ethical and political demands of international life The book also aims to address wider issues of freedom and necessity individualism and communitarianism and cosmopolitanism agency and structure and the legitimacy of governance and institutions **Critical Feminist Justpeace** Karie Cross Riddle,2024-10-25 In *Critical Feminist Justpeace* Karie Cross Riddle presents an intersectional revision to conflict transformation arguing that we need complementary theories and practices of gender

conscious peacebuilding for regions and conflicts that formal peacebuilding institutions and agendas cannot reach

Introducing a novel theoretical framework and drawing on fieldwork in Manipur India Riddle makes the case that we need norms and processes for feminist peacebuilding that can flexibly respond to the particularities of national and local politics and social context Original and insightful Riddle's theoretical framework serves as a flexible guide for women's local peacebuilding work

The Cartographic State Jordan Branch, 2014 This book describes the emergence of the territorial state and examines the role that cartography has played in shaping its linear boundaries

Scientific Cosmology and International Orders Bentley B. Allan, 2018-04-19 *Scientific Cosmology and International Orders* shows how scientific ideas have transformed international politics since 1550 Allan argues that cosmological concepts arising from Western science made possible the shift from a sixteenth century order premised upon divine providence to the present order centred on economic growth As states and other international associations used scientific ideas to solve problems they slowly reconfigured ideas about how the world works humanity's place in the universe and the meaning of progress The book demonstrates the rise of scientific ideas across three cases natural philosophy in balance of power politics 1550 1815 geology and Darwinism in British colonial policy and international colonial orders 1860 1950 and cybernetic systems thinking and economics in the World Bank and American liberal order 1945 2015 Together the cases trace the emergence of economic growth as a central end of states from its origins in colonial doctrines of development and balance of power thinking about improvement

Justice and Morality Amanda Russell Beattie, 2016-04-22 Bridging the contending theories of natural law and international relations this book proposes a relational ontology as the basis for rethinking our approach to international politics Amanda Beattie challenges both the conventional interpretation of natural law as necessarily and intractably theological and the dominant conception of international relations as structurally distinct from the ends of human good in order to recover the centrality of other directed agency to the promotion of human development Offering an important contribution to the study of international political thought the book contains a number of challenging and controversial ideas which should provoke constructive debate within international relations theory political theory and philosophical ethics

Interpreting International Politics Cecelia Lynch, 2013-12-04 *Interpreting International Politics* addresses each of the major traditional subfields in International Relations International Law and Organization International Security and International Political Economy But how are interpretivist methods and concerns brought to bear on these topics In this slim volume Cecelia Lynch focuses on the philosophy of science and conceptual issues that make work in international relations distinctly interpretive This work both legitimizes and demonstrates the necessity of post and non

positivist scholarship Interpretive approaches to the study of international relations span not only the traditional areas of security international political economy and international law and organizations but also emerging and newer areas such as gender race religion secularism and continuing issues of globalization By situating describing and analyzing major interpretive works in each of these fields the book draws out the critical research challenges that are posed by and the progress that is made by interpretive work Furthermore the book also pushes forward interpretive insights to areas that have entered the IR radar screen more recently including race and religion demonstrating how work in these areas can inform all subfields of the discipline and suggesting paths for future research

The Great Powers and the International System

Bear F. Braumoeller, 2013-02-11 Do great leaders make history Or are they compelled to act by historical circumstance This debate has remained unresolved since Thomas Carlyle and Karl Marx framed it in the mid nineteenth century yet implicit answers inform our policies and our views of history In this book Professor Bear F Braumoeller argues persuasively that both perspectives are correct leaders shape the main material and ideological forces of history that subsequently constrain and compel them His studies of the Congress of Vienna the interwar period and the end of the Cold War illustrate this dynamic and the data he marshals provide systematic evidence that leaders both shape and are constrained by the structure of the international system

Making Global Society Barry Buzan, 2023-08-10 Barry Buzan proposes a new approach to making International Relations a truly global discipline that transcends both Eurocentrism and comparative civilisations He narrates the story of humankind as a whole across three eras using its material conditions and social structures to show how global society has evolved Deploying the English School s idea of primary institutions and setting their story across three domains interpolity transnational and interhuman this book conveys a living historical sense of the human story whilst avoiding the overabstraction of many social science grand theories Buzan sharpens the familiar story of three main eras in human history with the novel idea that these eras are separated by turbulent periods of transition This device enables a radical retelling of how modernity emerged from the late 18th century He shows how the concept of global society can build bridges connecting International Relations Global Historical Sociology and Global World History
