Norms Naturalism And Epistemology The Case For Normativity Without Norms:

Norms, Naturalism and Epistemology J. Knowles, 2003-11-04 In the field of epistemology naturalism holds that there are no a priori norms for guiding our belief formation we must start our inquiries in situ assuming some beliefs and the general reliability of our basic cognitive practices to justify others Naturalized epistemology seeks to motivate norms for cognitive enquiry on such a naturalistic basis The author argues that whilst naturalism must be embraced this more ambitious project is in vain to the extent one can justify naturalistic norms they are not needed for optimal rational belief formation

The Ethics of Belief Jonathan Matheson, Rico Vitz, 2014 How do people form beliefs and how should they do so This book presents seventeen new essays on these questions drawing together perspectives from philosophy and psychology The first section explores the ethics of belief from an individualistic framework It begins by examining the question of doxastic voluntarism i.e. the extent to which people have control over their beliefs It then shifts to focusing on the kinds of character that epistemic agents should cultivate what their epistemic ends ought to be and the way in which these issues are related to other traditional questions in epistemology The section concludes by examining questions of epistemic value of whether knowledge is in some sense primary and of whether the ethics of belief falls within the domain of epistemology or ethics The second section extends this traditional debate to issues concerning the social dimensions of belief formation It begins with essays by social psychologists discussing the past three decades of research in lay epistemics It continues by examining Humean Kantian and feminist insights into the social aspects of belief formation as well as questions concerning the ethics of assertion The section concludes with a series of essays examining a topic that is currently of great interest to epistemologists namely the significance of peer disagreement

The Blackwell Companion to Naturalism Kelly James Clark, 2016-02-15 The Blackwell Companion to Naturalism provides a systematic introduction to philosophical naturalism and its relation to other schools of thought Features contributions from an international array of established and emerging scholars from across the humanities Explores the historical development of naturalism and its ascension to the dominant orthodoxy in the Western academy Juxtaposes theoretical criticisms with impassioned defenses encapsulating contemporary debates on naturalism Includes discussions of metaphysics realism feminism science knowledge truth mathematics free will and ethics viewed through a naturalist lens

Naturalism and Normativity Mario De Caro, David Macarthur, 2010-08-11 Normativity concerns what we ought to think or do and the evaluations we make For example we say that we ought to think consistently we ought to keep our promises or that Mozart is a better composer than Salieri Yet what philosophical moral can we draw from the apparent absence of normativity in the scientific image of the world For scientific naturalists the moral is that the normative must be reduced to the nonnormative while for nonnaturalists the moral is that there must be a transcendent realm of norms Naturalism and Normativity engages with both sides of this debate Essays explore philosophical options for understanding normativity in the space between scientific naturalism and Platonic supernaturalism They articulate a liberal conception of

philosophy that is neither reducible to the sciences nor completely independent of them yet one that maintains the right to call itself naturalism Contributors think in new ways about the relations among the scientific worldview our experience of norms and values and our movements in the space of reason Detailed discussions include the relationship between philosophy and science physicalism and ontological pluralism the realm of the ordinary objectivity and subjectivity truth and justification and the liberal naturalisms of Donald Davidson John Dewey John McDowell and Ludwig Wittgenstein

Knowledge in Contemporary Philosophy Stephen Hetherington, Markos Valaris, 2021-09-20 The Philosophy of Knowledge A History presents the history of one of Western philosophy's greatest challenges understanding the nature of knowledge Divided chronologically into four volumes it follows conceptions of knowledge that have been proposed defended replaced and proposed anew by ancient medieval modern and contemporary philosophers This volume covers contemporary discussions about scientific social and self knowledge and attempts to understand knowledge naturalistically contextually and normatively With original insights into the vast sweep of ways in which philosophers have sought to understand knowledge The Philosophy of Knowledge A History embraces what is vital and evolving within contemporary epistemology Overseen by an international team of leading philosophers and featuring 50 specially commissioned chapters this is a major collection on one of philosophy's defining topics Encyclopedia and Utopia E. Nemeth, Friedrich Stadler, 1996-11-30 The present Volume 4 of the Vienna Circle Yearbook is dedicated to Otto Neurath one of the leading figures of the Vienna Circle and one of last polymaths representative of the vanished culture from which the Circle emerged Situating Neurath's work between the topoi of Encyclopedism as a theoretical scientific tool of the unfinished project of post enlightenment and Utopianism as the resolve to work for the systematic improvement of society and science this volume presents the most recent research as well as critical and updated surveys and assessments of Neurath's many faceted and impressive life work The contributions range from history and philosophy of science epistemology sociology and economics to pictorial statistics ISOTYPE and museology Special attention is given to Neurath's methodological holism and epistemological naturalism as well as to the interrelations of the different disciplines in Neurath's conception of the Unity of Science Most contributors agree that the historical and systematic reconstruction of Neurath's conception of science leads to issues of crucial relevance to the ongoing task of sharpening the instrument that is science for its responsible application in the natural and social world The volume also includes Neurath's previously unpublished full manuscript on visual education a report on archival holdings concerning Neurath's work and a review section focusing on recent publications on Neurath and Logical Empiricism An overview of the activities of the Institute Vienna Circle 1996-97 concludes the volume Audience Philosophers in general philosophers of science and historians of science and sociologists The book will also interest scholars specialized in adult education museology and economics **Croatian Journal of Philosophy**, 2002 **Reflection Without Rules** D. Philosophy of Psychology William O'Donohue, Richard F. Kitchener, 1996-10-28 This major text provides the first comprehensive anthology of the key topics arising in the philosophy of psychology. Bringing together internationally renowned authors including Herb Simon, Karl Pribram, Joseph Rychlak, Ullin T. Place, and Adolf Grünbaum, this volume offers a stimulating and informative addition to contemporary debate. With the cognitive revolution of the 1960s, there has been a resurgence of interest in the study of the philosophical assumptions and implications of psychology. Several significant themes such as the foundations of knowledge, behaviourism, rationality, emotion, and cognitive science span both philosophy and psychology and are covered here along with a wide range of issues in the fields.

Naturalized Epistemology and Philosophy of Science Chienkuo Mi, Ruey-lin Chen, 2007 Much has happened in the field of contemporary epistemology since Quine's *Epistemology Naturalized* was published in 1969. Even before Ronald Giere published his article *Philosophy of Science Naturalized*, naturalized philosophy of science had been influenced by the so-called historical approach. Kuhn, Lakatos, Feyerabend, and Laudan all contributed importantly to this trend. In this light, it has emerged without a doubt that philosophy of science is closely related to epistemology. This volume explores some of the relevant relations and will be of interest to epistemologists and philosophers of science.

The Routledge Companion to Epistemology Sven Bernecker, Duncan Pritchard, 2011-01-19 Epistemology, the philosophy of knowledge, is at the core of many of the central debates and issues in philosophy, interrogating the notions of truth, objectivity, trust, belief, and perception. *The Routledge Companion to Epistemology* provides a comprehensive and the up-to-date survey of epistemology, charting its history, providing a thorough account of its key thinkers and movements, and addressing enduring questions and contemporary research in the field. Organized thematically, the Companion is divided into ten sections: Foundational Issues, The Analysis of Knowledge, The Structure of Knowledge, Kinds of Knowledge, Skepticism, Responses to Skepticism, Knowledge and Knowledge Attributions, Formal Epistemology, The History of Epistemology, and Metaepistemological Issues. Seventy-eight chapters, each between 5000 and 7000 words and written by the world's leading epistemologists, provide students with an outstanding and accessible guide to the field. Designed to fit the most comprehensive syllabus in the discipline, this text will be an indispensable resource for anyone interested in this central area of philosophy. *The Routledge Companion to Epistemology* is essential reading for students of philosophy.

The Evolutionary Argument against Naturalism Jim Slagle, 2021-06-17 Contemporary discussions in metaphysics, epistemology, and philosophy of mind are dominated by the presupposition of naturalism. Arguing against this established convention, Jim Slagle offers a thorough defence of Alvin Plantinga's Evolutionary Argument against Naturalism (EAN) and, in doing so, reveals how it shows that evolution and naturalism are incompatible. Charting the development of Plantinga's argument, Slagle asserts that the probability of our cognitive faculties reliably producing true beliefs is low if ontological naturalism is true and therefore all other beliefs produced by these faculties, including naturalism.

itself are self defeating He critiques other well known epistemological approaches including those of Descartes and Quine and deftly counters the many objections against the EAAN to conclude that metaphysical naturalism should be rejected on the grounds of self defeat By situating Plantinga s argument within a wider context and showing that science and evolution cannot entail naturalism Slagle renders this most common metaphysical view irrational As such the book advocates an important reconsideration of contemporary thought at the intersection of philosophy science and religion **The Routledge Companion to Philosophy of Social Science** Lee McIntyre,Alex Rosenberg,2016-12-08 37 Why Is There No Philosophy of Political Science Epistemology of Decision Mario Graziano,2012-09-14 This book carries out an epistemological analysis of the decision including a critical analysis through the continuous reference to an interdisciplinary approach including a synthesis of philosophical approaches biology and neuroscience Besides this it represents the analysis of causality here seen not from the formal point of view but from the embodied point of view The Externalist Challenge Richard Schantz,2011-08-18 The debate between internalism and externalism has become a focal point of attention both in epistemology and in the philosophy of mind and language Externalism challenges basic traditional internalist conceptions of the nature of knowledge justification thought and language What is at stake is the very form that theories in epistemology and the philosophy of mind ought to take This volume is a collection of original contributions of leading international authors reflecting on the present state of the art concerning the exciting controversies between internalism and externalism **A Companion to Hume** Elizabeth S. Radcliffe,2011-05-31 Comprised of twenty nine specially commissioned essays A Companion to Hume examines the depth of the philosophies and influence of one of history s most remarkable thinkers Demonstrates the range of Hume s work and illuminates the ongoing debates that it has generated Organized by subject with introductions to each section to orient the reader Explores topics such as knowledge passion morality religion economics and politics Examines the paradoxes of Hume s thought and his legacy covering the methods themes and consequences of his contributions to philosophy **Quine** ,2022-06-08 From the contents Naturalistic epistemology murder and suicide But what about the promises Ton Derksen Naturalism and rationality Christopher Hookway Quine s hypothetical theory of language learning a comparison of different conceptualschemes of their logic Mia Gosselin Quine and innate similarity spaces Jaap van Brakel Quine and Davidson on the structure of empirical knowledge Dirk Koppelberg Empathy and charity Eva Picardi Quine indeterminacy robust realism and truth Sandra Laugier Quine and Putnam on conceptual relativity and reference theft or honest toil Roger Vergauwen The Routledge Companion to Twentieth Century Philosophy Dermot Moran,2008-10-27 The twentieth century was one of the most significant and exciting periods ever witnessed in philosophy characterized by intellectual change and development on a massive scale The Routledge Companion to Twentieth Century Philosophy is an outstanding authoritative survey and assessment of the century as a whole Featuring twenty two chapters written by leading international scholars this collection is divided into five clear parts and presents a comprehensive picture of the period for
