Number 57 The History Of A House:

Number 57 Maxwell Hutchinson, 2003 Number 57 is the story of a house and its inhabitants Accompanying the six part Channel 4 series Number 57 will be restored to its original 1779 condition and then updated to show how our homes have changed through the Georgian and Victorian eras the Arts and Crafts and Art Deco movements to post war Britain and finally to the 21st century The house and its occupants act as a manifestation of the social history of each era and this book goes beyond just documenting the history of the house itself Rather it is a history of the changes in attitudes and technology that have affected the changes in our domestic arrangements It also includes a comprehensive directory for home owners wanting to recreate the style of each period

Stories from Home Margaret Ponsonby, 2016-04-01 Most homes in the past were not elite wealthy interiors complete with high fashion furnishings designed by well known architects and designers as many domestic histories often seem to have assumed As this book makes clear there were in fact an enormous variety of house interiors in England during the period 1750 1850 reflecting the location status and gender of particular householders as well as their changing attitudes tastes and aspirations By focusing on non metropolitan homes which represented the majority of households in England this study highlights the need for historians to look beyond prevailing attitudes that often reduce interiors to generic descriptions based on high fashions of the decorative arts Instead it shows how numerous social and cultural influences affected the manner in which homes were furnished and decorated Issues such as the availability of goods gender regional taste income the second hand market changing notions of privacy and household hierarchies and print culture could all have a significant impact on domestic furnishing The study ends with a discussion of how domestic interiors of historic properties have been presented and displayed in modern times highlighting how competing notions of the past can cloud as well as illuminate the issue Combining cultural history and qualitative analysis of evidence this book presents a new way of looking at ordinary and provincial homes that enriches our understanding of English domestic life of the late eighteenth and early nineteenth centuries

From Prehistoric Villages to Cities Jennifer Birch, 2014-04-11 Archaeologists have focused a great deal of attention on explaining the evolution of village societies and the transition to a Neolithic way of life Considerable interest has also concentrated on urbanism and the rise of the earliest cities Between these two landmarks in human cultural development lies a critical stage in social and political evolution Throughout world at various points in time people living in small dispersed village communities have come together into larger and more complex social formations These community aggregates were essentially middle range situated between the earliest villages and emergent chiefdoms and states This volume explores the social processes involved in the creation and maintenance of aggregated communities and how they brought about revolutionary transformations that affected virtually every aspect of a society and its culture While there have been a number of studies that address coalescence from a regional perspective less is understood about how aggregated communities functioned internally The key premise explored in this volume is that large

scale long term cultural transformations were ultimately enacted in the context of daily practices interactions and what might be otherwise considered the mundane aspects of everyday life How did these processes play out on the ground in diverse and historically contingent settings What are the strategies and mechanisms that people adopt in order to facilitate living in larger social formations What changes in social relations occur when people come together This volume employs a broadly cross cultural approach to interrogating these questions employing case studies which span four continents and more than 10 000 years of human history
