Numerical Methods for the Personal Computer Terry E. Shoup,1983 **Some Graphical and Numerical Methods for the Personal Computer** Gyorgy Emese,1988 **Applied Numerical Methods with Personal Computers** A. Constantinides,1987 **Numerical Methods for Engineers with Personal Computer Applications** Raymond P. Canale,2000 *Proceedings of the Tenth International Symposium on Applied Electromagnetic and Mechanics* T. Takagi,2003 This publication covers topics in the area of applied electromagnetics and mechanics Since starting in Japan in 1988 the ISEM has become a well known international forum on applied electromagnetics **Compact Numerical Methods for Computers** John C. Nash,1990-01-01 This second edition of Compact Numerical Methods for Computers presents reliable yet compact algorithms for computational problems As in the previous edition the author considers specific mathematical problems of wide applicability develops approaches to a solution and the consequent algorithm and provides the program steps He emphasizes useful applicable methods from various scientific research fields ranging from mathematical physics to commodity production modeling While the ubiquitous personal computer is the particular focus the methods have been implemented on computers as small as a programmable pocket calculator and as large as a highly parallel supercomputer New to the Second Edition Presents program steps as Turbo Pascal code Includes more algorithmic examples Contains an extended bibliography The accompanying software available by coupon at no charge includes not only the algorithm source codes but also driver programs example data and several utility codes to help in the software engineering of end user programs The codes are designed for rapid implementation and reliable use in a wide variety of computing environments Scientists statisticians engineers and economists who prepare modify programs for use in their work will find this resource invaluable Moreover since little previous training in numerical analysis is required the book can also be used as a supplementary text for courses on numerical methods and mathematical software MULSIM/PC Douglas A. Donato,1992 **Field Solutions on Computers** Stanley Humphries Jr.,2020-09-23 Field Solutions on Computers covers a broad range of practical applications involving electric and magnetic fields The text emphasizes finite element techniques to solve real world problems in research and industry After introducing numerical methods with a thorough treatment of electrostatics the book moves in a structured sequence to advanced topics These include magnetostatics with non linear materials permanent magnet devices RF heating eddy current analysis electromagnetic pulses microwave structures and wave scattering The mathematical derivations are supplemented with chapter exercises and comprehensive reviews of the underlying physics The book also covers essential supporting techniques such as mesh generation interpolation sparse matrix inversions and advanced plotting routines **Introduction to Mechanics of Materials** William F. Riley,Loren W. Zachary,1991-01-16 A concise updated successor to the successful Mechanics of Materials by Higdon Olsen Stiles Weese and Riley This text is designed for a first course in mechanics of deformable bodies it presents the concepts and skills that form

the foundation of all structural analysis and machine design Presentation relies on free body diagrams application of the equations of equilibrium visualization and use of the geometry of the deformed body and use of the relations between stresses and strains for the material being used Stress transformation is covered later in this book than in the Higdson text Includes many illustrative examples and homework problems Also contains computer problems and an appendix on computer methods Computer Applications in Resource Estimation G. Gaal,D.F. Merriam,2013-10-22 Quantitative resource assessment methods play an increasing role in exploration for petroleum water and minerals This volume presents an international review on the state of the art of the computerized methodology in resource exploration The papers taken from those presented at the symposium are classified to either techniques i e trend analysis classification techniques geostatistics image analysis expert systems artificial intelligence inventories tomography and others or to resources i e petroleum water metals and non metals
