 by Yodang Yodang

Introduction to Social and Health Anthropology

Social and health anthropology is the study of people and societies from a cultural and social perspective. It focuses on understanding how cultural and social factors, such as beliefs, values, and customs, impact health and well-being.

Cultural Traditions

Learn about cultural traditions and how they impact the health and well-being of individuals and communities.

Cultural Norms

Explore cultural norms and how they impact access to healthcare and health outcomes.

Social Justice

Examine social justice issues, including health disparities, and how they affect health and healthcare.

Nursing And Anthropology

Karen Holland

Nursing And Anthropology:

Anthropology and Nursing Pat Holden, Jenny Littlewood, 2015-07-03 Nursing has been described as the most natural female occupation of all embodying the so called feminine ideals of tenderness and caring Yet these ideals are juxtaposed with images of nurses as sex objects or as ruthlessly efficient harrieds How have these very different images been constructed And how do they relate to the reality of nursing the close contact with blood urine and faeces and the involvement with the rites of birth illness and death This book first published in 1991 explores the alternative ways different societies have developed to reconcile these contradictions Using contemporary historical and cross cultural case material the contributors trace the historical development of the role and investigate the expected qualities of nurses within different cultural settings such as India Uganda and Japan They look closely at the nurse as a social construct and demonstrate how the stereotypes relate to a particular society's notions of gender Designed primarily for anthropologists and sociologists interested in health illness and systems of health care this book challenges some of the myths of traditional nursing studies and provides an original perspective on doctor nurse patient relationships

Nursing and Anthropology Madeleine M. Leininger, 1970 **Anthropology of Nursing** Karen Holland, 2019-09-09 This book aims to introduce nurses and other healthcare professionals to how anthropology can help them understand nursing as a profession and as a culture Drawing on key anthropological concepts the book facilitates the understanding and critical consideration of nursing practice as seen across a wide range of health care contexts and which impacts the delivery of appropriate care for service users Considering the fields in which nurses work the book argues that in order for nurses to optimize their roles as deliverers of patient care they must not only engage with the realities of the cultural world of the patient but also that of their own multi professional cultural environment The only book currently in the field on anthropology of nursing this book will be a valuable resource for nursing students at all academic levels especially where they can pursue specific modules in the subject as well as those other students pursuing medical anthropology courses As well as this it will be an essential text for those post graduate students who wish to consider alternative world views from anthropology and their application in nursing and healthcare in addition to their undertaking ethnographic research to explore nursing in all its fields of practice

Reference Sources for Transcultural Health & Nursing Madeleine M. Leininger, 1984 Over 2300 entries to selected literature and films intended for health personnel particularly nurses References provide theoretical clinical and research information Covers Western and non Western cultures Most of the titles were derived from the field of anthropology Classified arrangement Entries give bibliographical information No index

Nursing Theorists and Their Work Martha Raile Alligood, PhD, RN, ANEF, 2013-09-24 The most comprehensive of its kind Nursing Theorists and Their Work 8th Edition provides an in depth look at 39 theorists of historical international and significant importance Each chapter features a clear consistent presentation of a key nursing philosophy or theory Case studies critical thinking activities and in depth objective critiques of
