Geometry of the Passions Remo Bodei, 2018-08-08 The passions have long been condemned as a creator of disturbance and purveyor of the temporary loss of reason but as Remo Bodei argues in Geometry of the Passions we must abandon the perception that order and disorder are in a constant state of collision By means of a theoretical and historical analysis Bodei interprets the relationship between passion and reason as a conflict between two complementary logics Geometry of the Passions investigates the paradoxical conflict collaboration between passions and reason and between individual and political projects Tracing the roles passion and reason have played throughout history including in the political agendas of Descartes Hobbes and the French Jacobins Geometry of the Passions reveals how passion and reason may be used as a vehicle for affirmation rather than self enslavement
