Bukoski,2007-08-06 There are a number of reasons why this book is important First there is no one source that summarizes what we know about the prevention of substance abuse from the research field so the book serves as a repository of accumulated knowledge on prevention theory intervention design and development and prevention research methodology Second as an evolving field prevention science has only begun to assert itself in both the arenas of practice and policy The formation of the Society for Prevention Research in 1991 was the first recognition that a science of prevention existed and required a separate forum to present the rapidly growing content of the field for discussion and review Finally there is a need to establish a baseline a reference point against which progress in the field of prevention science can be assessed This book serves all of these purposes The idea for this book grew from the observation in the early 1990s that after decades of attempts to develop effective interventions to prevent drug use among children and adolescents in the United States that we were finally having success particularly in addressing the initiation of use These successes are the result of research that has provided a better understanding of the factors and processes associated with the onset of substance use      *Preventing Drug Abuse* National Research Council,Division of Behavioral and Social Sciences and Education,Commission on Behavioral and Social Sciences and Education,Committee on Substance Abuse Prevention Research,1993-02-01 As the nation's drug crisis has deepened public and private agencies have invested huge sums of money in prevention efforts Are the resulting programs effective What do we need to know to make them more effective This book provides a comprehensive overview on what we know about drug abuse prevention and its effectiveness including Results of a wide range of antidrug efforts The role and effectiveness of mass media in preventing drug use A profile of the drug problem including a look at drug use by different population groups A review of three major schools of prevention theory risk factor reduction developmental change and social influence An examination of promising prevention techniques from other areas of health and human services This volume offers provocative findings on the connection between low self esteem and drug use the role of schools the reality of changing drug use in the population and more Preventing Drug Abuse will be indispensable to anyone involved in the search
