Kellermann, 2013-03-13 The aim of the 2nd Course of the International School of Cardiology at Ettore Majorana was the discussion scientific analysis and critical appraisal of primary and secondary prevention in cardiology especially concerning the coronary artery disease The predictive value of different risk factors the problem of heredity sociological and psychological perspectives the impact of antiarrhythmic therapy and the prevention of sudden

death were only some of the many topics discussed Others such as physical activity in primary and secondary prevention the role of coronary bypass surgery in decreasing the mortality rate the effects of drugs and comprehensive intervention programmes as well as a critical appraisal of therapy in cardiac failure were given special attention In organizing this second Course it was again a privilege and a challenge for the programme directors to conduct a scientific event which as was demonstrated at the first course represented an original and new approach to teaching The illustrious international faculty composed of well known scientists and experts in their fields has contributed to the high academic level and quality of the lectures and the following discussions In our opinion this successful undertaking would not have achieved its purpose and originality without the beautiful surrounding scenery and tranquility of Erice We should like to express our gratitude to the director of the Centre Prof Zichichi and the Secretary of Ettore Majorana Dr *NIH Guide for Grants and Contracts* ,1978

Biomedical Index to PHS-supported Research: pt. A. Subject access A-H ,1992 Tandon's Textbook of Cardiology
Dorairaj Prabhakaran,Raman Krishna Kumar,Nitish Naik,2019-01-17 An authoritative comprehensive and accessible cardiology textbook that caters to the needs of trainees and practicing cardiologists Cardiovascular disease is now the largest contributor to global mortality Low and middle income countries Lmics presently bear the brunt of this global epidemic accounting for over three quarters of cardiovascular deaths and 90% of these deaths under 70 years of age The experience and expertise of health professionals in these countries will therefore be the principal determinant of global success in countering and curbing the global cardiovascular epidemic in the coming decades This book covers the fundamentals of cardiology in depth to provide conceptual clarity and delves into specific cardiovascular disorders with detailed descriptions that range from aetiology and pathophysiology to evidence informed approaches to diagnosis and management It does all of this by blending contextual relevance with uncompromising academic rigor **Preventive Cardiology** Killian

Robinson,1998-10-15 A desire to avoid the massive social and financial costs associated with cardiovascular diseases has promoted a continued interest in preventive cardiology Recent intervention studies have shown that the progress of these disorders may be arrested and potentially reversed Other investigations have shown that primary prevention of cardiovascular disease is feasible using simple interventions This book provides a comprehensive approach to cardiovascular wellness from a clinical perspective Perhaps the most valuable area covered is the comprehensive presentation of a clinical prevention program This includes guidelines for designing and operating a preventive cardiology clinic core concepts an outline of algorithm driven clinical practice and a look at such issues as patient flow and resource requirements
