New Frontiers in Forensic Linguistics Monwabisi K. Ralarala, 2019-07-22 The field of forensic linguistics is a niche area that has not enjoyed much participation from the African continent The theme of language and the law in this book is one that straddles two important aspects of the legal history of South Africa in particular and how it has impacted on the country's legal and education systems The declaration by the United Nations of 2019 as The International Year of Indigenous Languages is opportune not only for the launch of this book but for what its research content tells us of the strides taken in ensuring access to justice for all citizens of the world in a language they understand The contributions by authors in this book tell the story of many African citizens and those hailing from beyond our borders who straddle the challenges of linguistic and legal pluralism in courtrooms across their respective countries It is our hope that the contributions made in this book will assist in ensuring human rights become a reality for global citizens where indigenous voices have not been heard and that these citizens will be free to give their testimonies in a language of their choice and that they may be heard and understood

Brown, Valerie Smith, 2015 Race and Real Estate brings together new work by architects sociologists legal scholars and literary critics that qualifies and complicates traditional narratives of race property and citizenship in the United States Rather than simply rehearsing the standard account of how blacks were historically excluded from homeownership the authors of these essays explore how the raced history of property affects understandings of home and citizenship While the narrative of race and real estate in America has usually been relayed in terms of institutional subjugation dispossession and forced segregation the essays collected in this volume acknowledge the validity of these histories while presenting new perspectives on this story

visions of piety The study first traces the roots of gendered violence within the Greco Roman and early Christian imagination and then explores the disturbing role of male fantasies and dreams in hagiographical traditions Barry draws on womanist scholarship and engages with trauma studies and feminist horror theory in order to challenge traditional readings of Christian texts offering new perspectives for understanding how narratives of violence continue to shape contemporary interpretations of gender and power

Challenging Liberalism Lisa H. Schwartzman, 2007-05-02 Questions about the relevance and value of various liberal concepts are at the heart of important debates among feminist philosophers and social theorists Although many feminists invoke concepts such as rights equality autonomy and freedom in arguments for liberation some attempt to avoid them noting that they can also reinforce and perpetuate oppressive social structures In *Challenging Liberalism* Schwartzman explores the reasons why concepts such as rights and equality can sometimes reinforce oppression She argues that certain forms of abstraction and individualism are central to liberal methodology and that these give rise to a number of problems Drawing on the work of feminist moral political and legal theorists she constructs an approach that employs these concepts while viewing them from within a critique of social relations of power

Rights of the Child in the Context of Tourism - A Compilation , Cyber Racism Jessie Daniels,2009-03-16 In this exploration of the way racism is translated from the print only era to the cyber era the author takes the reader through a devastatingly informative tour of white supremacy online The book examines how white supremacist organizations have translated their printed publications onto the Internet Included are examples of open as well as cloaked sites which disguise white supremacy sources as legitimate civil rights websites Interviews with a small sample of teenagers as they surf the web show how they encounter cloaked sites and attempt to make sense of them mostly unsuccessfully The result is a first rate analysis of cyber racism

within the global information age The author debunks the common assumptions that the Internet is either an inherently democratizing technology or an effective recruiting tool for white supremacists The book concludes with a nuanced challenging analysis that urges readers to rethink conventional ways of knowing about racial equality civil rights and the Internet

Theories on Law and Ageing Israel Doron, 2008-09-25 This book is about trying to answer questions These questions were well introduced by Prof Margaret Hall in the opening of her chapter in this book The fundamental idea of law and aging as a discrete category of legal principle and theory is controversial how and why are older adults or seniors or elders the very terminology is controversial and fraught with difficulties a discrete and distinct group for whom special legal thought and treatment is justified For some a category of law and aging is inherently paternalistic suggesting that older persons are like children especially in need of the protection of the law In this sense the argument continues the category itself internalizes ageist presumptions about older adults and is therefore inherently flawed and even harmful If certain older adults are because of physical or mental infirmities genuinely in need of an enhanced level of legal protection this entitlement should be conceptualized in terms of their disability older adults are not a distinct group but an arbitrarily delineated demographic category which contains within it any number of groups that are legitimately distinct for the purposes of legal theory the disabled women persons of colour Aboriginal persons rich and poor etc Indeed the artificial category of older adults may be seen as obfuscating submerging these more meaningful distinctions
