Firth, 1939 **Primitive Polynesian Economy, etc. (Second edition.)** Raymond Firth, 1965 Moundville's Economy Paul D. Welch, 1991-03-30 A Dan Josselyn Memorial Publication Anthropologists have long talked about chiefdoms as a form of sociopolitical organization and for several decades Elman Service's description of chiefdoms has been widely accepted as definitive Nevertheless in the 1970s scholars began to question whether all or any chiefdoms had the entire range of characteristics described by Service Most of the questions focused on the nonmarket economic organization of these polities and several contrasting economic models were suggested None of the models however was comprehensively tested against actual chiefdom economies This study examines the economic organization of the late prehistoric A D 1000 to 1540 chiefdom centered at Moundville Alabama Rather than attempting to show that this case fits one or another model the economic organization is determined empirically using archaeological data The pattern of production and distribution of subsistence goods domestic nonutilitarian goods and imported prestige goods does not fit precisely any of the extant models Because Moundville's economy was organized in a way that promoted stability it may be no accident that Moundville was the dominant regional polity for several hundred years This research opens a new field of archaeological investigation the relationship between fine details of economic organization and large scale political fortunes , **Oral Traditions of**

Anuta : A Polynesian Outlier in the Solomon Islands Richard Feinberg Professor of Anthropology Kent State

University,1998-04-28 Anuta is a small Polynesian community in the eastern Solomon Islands that has had minimal contact with outside cultural forces Even at the end of the twentieth century it remains one of the most traditional and isolated islands in the insular Pacific In *Oral Traditions of Anuta* Richard Feinberg offers a telling collection of Anutan historical narratives including indigenous texts and English translations This rich thorough assemblage is the result of a collaborative project between Feinberg and a large cross section of the Anutan community that developed over a period of twenty five years The volume s emphasis is ethnographic consisting of a number of texts as related by the island s most respected experts in matters of traditional history Feinberg s annotations which arm the reader with essential ethnographic and historical contexts clarify important linguistic and cultural issues that arise from the stories The texts themselves have important implications for the relationship of oral tradition to history and symbolic structures and afford new evidence pertinent to Polynesian language sub grouping Further they provide insight into a number of Anutan customs and preoccupations while also suggesting certain widespread Polynesian practices dating back to the pre contact and early contact periods

Understanding Commodity Cultures Scott Cook,2004 In this overview of economic anthropology studies of Mexico Guatemala Scott Cook argues that because Mesoamerican societies have long been involved in production for exchange they must be understood as commodity cultures where individuals pursue their own self interest

Politics, Law and Ritual in Tribal Society Max Gluckman,2017-09-04 What can we learn from tribal societies about the ways in which in a variety of social settings groups of men resolve their conflicts with other men In order to answer this question *Politics Law and Ritual in Tribal Society* compares nearly forty case study societies most of them in Africa in their reconstructed pre colonial tribal condition comparing their small scale social relations to their large scale social context At the outset Gluckman explains to the reader that custom is the focus of interest of all types of anthropology Yet his approach manifests a strong interest in economy politics and social relationships In the volume Max Gluckman offers a succinct version of a lifetime of opinionated analysis This material is organized by theme and the ethnographic examples appear as brief illustrations of theoretical questions Discussed here also is the relation between disputes and struggles for power within the context of mechanisms of social control and stability In addition Gluckman presents a step by step survey of the cumulative development of the anthropological analysis of tribal institutions from the nineteenth century to the present and supports the argument that anthropology is a science rather than an art The new masterful introduction by Sally Falk Moore along with a new postscript of Gluckman s professional activities and publications provides newcomers to the work of Gluckman with deep insights into the contents as well as contexts within which the great anthropologist worked

Institutional Economics John Adams,2012-12-06 Allan Garfield Gruchy now Professor Emeritus at The University of Maryland retired in 1977 from full time duty That he continued to teach his graduate seminar in institutional economics and simply accelerated work on a major study of planning in world economies is only more evidence of the energy and concern he has brought to his teaching and

writing through out his career His undergraduate classes in comparative economic systems and modern economic thought and his two graduate courses on institutionalism were always among the most popular in the department They were firmly grounded in a perspective that opened the minds of hundreds of students to new avenues of thought and to different modes of economic organization Returning students who report they quickly forgot the arid intricacies of intermediate theory courses nonetheless recall Allan s verbal thrusts at orthodox positions and at the shortcomings of American economic institutions Allan worked for many years with Dudley Dillard to construct Maryland s present department and served ably as acting chairman in 1976-77 after Dudley relinquished the chairmanship His impatient wit enlivened faculty meetings and rendered them expeditious in the extreme and it was welcomed by all except those with a penchant for pontification Allan is best known among economists for his elucidation of institutional and neoinstitutional thought and for his comparative analysis of planning v vi PREFACE and growth

Rationality and Irrationality in Economics Maurice

Godelier,2014-07-08 This book is the result of a research project begun by the author in 1958 with the aim of answering two questions First what is the rationality of the economic systems that appear and disappear throughout history in other words what is their hidden logic and the underlying necessity for them to exist or to have existed Second what are the conditions for a rational understanding of these systems in other words for a fully developed comparative economic science The field of investigation opened up by these two questions is vast touching on the foundations of social reality and on how to understand them The author being a Marxist sought the answers as he writes not in philosophy or by philosophical means but in and through examining the knowledge accumulated by the sciences The stages of his journey from philosophy to economics and then to anthropology are indicated by the divisions of his book Godelier rejects at the outset any attempt to tackle the question of rationality or irrationality of economic science and of economic realities from the angle of an a priori idea a speculative definition of what is rational Such an approach can yield only he feels an ideological result Rather he treats the appearance and disappearance of social and economic systems in history as being governed by a necessity wholly internal to the concrete structures of social life

Market

Threads Koray Çalışkan,2010-08-16 What is a global market How does it work At a time when new crises in world markets cannot be satisfactorily resolved through old ideas Market Threads presents a detailed analysis of the international cotton trade and argues for a novel and groundbreaking understanding of global markets The book examines the arrangements institutions and power relations on which cotton trading and production depend and provides an alternative approach to the analysis of pricing mechanisms Drawing upon research from such diverse places as the New York Board of Trade and the Turkish and Egyptian countrysides the book explores how market agents from peasants to global merchants negotiate accept reject resist reproduce understand and misunderstand a global market The book demonstrates that policymakers and researchers must focus on the specific practices of market maintenance in order to know how they operate Markets do not

simply emerge as a relationship among self interested buyers and sellers governed by appropriate economic institutions Nor are they just social networks embedded in wider economic social structures Rather global markets are maintained through daily interventions the production of prosthetic prices and the waging of struggles among those who produce and exchange commodities The book illustrates the crucial consequences that these ideas have on economic reform projects and market studies Spanning a variety of disciplines Market Threads offers an original look at the world commodity trade and revises prevailing explanations for how markets work

Social Organization and Peasant Societies Maurice Freedman, 2017-07-05 The essays included in Social Organization and Peasant Societies were written in honor of the man who taught their authors Each entry is about different problems within the general field of social organization They were composed in many styles and deal ethnographically with a heterogeneous collection of peoples and countries Together they illustrate an important aspect of Firth s influence as a teacher the range of his interests and his success in promoting social anthropological research on the broadest front The breadth and the variety in the work of his students reflect Firth s own catholicity From economics he reached into every corner of the field covered by social anthropology and many of his interests can be traced in these essays on themes in kinship and marriage by Baric Benedict Kaberry and Leach and on religious subjects by Freedman Morris and Stanner Still more detail the study of modern social change by Little and Mayer There is even one on art by Forge Three are devoted to subjects in economic anthropology by Belshaw Swift and Ward On all of these varied and complex topics Raymond Firth has written extensively and taught untiringly Many of the contributors to his festschrift are themselves leading anthropologists Raymond Firth s importance in the history of social anthropology is undisputed He came into the profession when it was small and unformed when it existed only in the tiny groups of people around Malinowski and Radcliffe Brown He urged it on by intellectual leadership by careful organization and by devoted service He was one of a small band of scholars he created a large school He inherited an esoteric seminar from Malinowski he turned it into a great class where over the years hundreds of students marveled at his skill and learned their craft as analysts and field workers His protege listened to his formulation of problems his critique of methods and his courteous but un
