The central Zhou government began to weaken due to external and internal pressures in the 8th century BC and the country eventually splintered into smaller states during the Spring and Autumn period. These states became independent and warred with one another in the following Warring States period. Much of traditional Chinese culture, literature, and philosophy first developed during those troubled times. In 221 BC, Qin Shi Huang conquered the various warring states and created for himself the title of Huangdi or emperor of the Qin, marking the beginning of imperial China. However, the oppressive government fell soon after his death and was supplanted by the longer-lived Han dynasty (206 BC–220 AD). Successive dynasties developed bureaucratic systems that enabled the emperor to control vast territories directly. In the 21 centuries from 206 BC until AD 1912, routine administrative tasks were handled by a special elite of scholar-officials. Young men well-versed in calligraphy, history, literature, and philosophy were carefully selected through difficult government examinations. China's last dynasty was the Qing (1644–1912), which was replaced by the Republic of China in 1912 and in the mainland by the People's Republic of China in 1949. Chinese history has alternated between periods of political unity and peace and periods of war and failed statehood, the most recent being the Chinese Civil War (1927–1949). China was occasionally dominated by steppe peoples, most of whom were eventually assimilated into the Han Chinese culture and population. Between eras of multiple kingdoms and warlordism, Chinese dynasties have ruled parts or all of China. In some eras, control stretched as far as Xinjiang and Tibet, as at present. Traditional culture and influences from other parts of Asia and the Western world, carried by waves of immigration, cultural assimilation, expansion, and foreign contact, form the basis of the modern culture of China.

Ted Hughes: Environmentalist and Ecopoet Yvonne Reddick, 2017-09-06. This book is the first book devoted entirely to Hughes as an environmental activist and writer. Drawing on the rapidly growing interest in poetry and the environment, the book deploys insights from ecopoetics, ecocriticism, and Anthropocene studies to analyse how Hughes's poetry reflects his environmental awareness. Hughes's understanding of environmental issues is placed within the context of twentieth-century developments in green ideology and politics, challenging earlier scholars who have seen his work as apolitical. The unique strengths of this book lie in its combination of cutting-edge insights on ecocriticism with extensive work on the British Library's new Ted Hughes archive. It will appeal to readers who enjoy Hughes's work as well as students and academics.
