O'Kane, 2017-10-24 To most Americans homicide appears to be a random act one committed by a deranged and irrational killer in a haphazard unpredictable manner Murder is seen as a chaotic disorganized act beyond the realm of reason In Wicked Deeds James O Kane shows that homicide is actually rather predictable and patterned with respect to its assailants and victims the circumstances in which it takes place the time and location where it occurs and the motives which precipitate the murderous act Engagingly written and solidly grounded in evidence this is a definitive study of murder in the United States O Kane explores the phenomena of homicide illustrating the journalists who what why when and where of murder He differentiates criminal homicide such as murder in the first and second degree from other types of killings including legal and quasi legal killings These include suicide abortion accidental death terrorism and other non criminal types of homicide such as justifiable and excusable homicide The author's focus is criminal homicide and he uses age sex race and socioeconomic status as well as demographic data to explain ever recurring patterns of murder in the United States Wicked Deeds analyzes numerous categories of murder intimate partner homicide child and family murders multiple victim killings including mass murder and serial homicide Each type of murder is illustrated by accounts of actual murders reported in the media and on internet sites Approximately 200 cases illustrate the typical homicides as well as the bizarre ones In portraying the patterns and regularities of murder in the United States Wicked Deeds is an essential treatment of a subject too often given over to sensationalism It will be of keen interest to professionals and students of criminal justice as well as those interested in American culture and the general reader who

Criminologists have known for decades that income inequality is the best predictor of the local homicide rate but why this is so has eluded them There is a simple compelling answer most homicides are the denouements of competitive interactions between men Relatively speaking where desired goods are distributed inequitably and competition for those goods is severe dangerous tactics of competition are appealing and a high homicide rate is just one of many unfortunate consequences Killing the Competition is about this relationship between economic inequality and lethal interpersonal violence Suggesting that economic inequality is a cause of social problems and violence elicits fierce opposition from inequality s beneficiaries Three main arguments have been presented by those who would acquit inequality of the charges against it that absolute poverty is the real problem and inequality is just an incidental correlate that primitive egalitarian societies have surprisingly high homicide rates and that inequality and homicide rates do not change in synchrony and are therefore mutually irrelevant With detailed but accessible data analyses and thorough reviews of relevant research Martin Daly dispels all three arguments Killing the Competition applies basic principles of behavioural biology to explain why killers are usually men not women and counters the view that attitudes and values prevailing in cultures of violence make change impossible *Rethinking Homicide* Terance D. Miethe,Wendy C. Regoeczi,Kriss A. Drass,2004-01-19 Using multiple data sources and methods this book involves a micro historical analysis of the nature of change and stability in homicide situations over time It focuses on the homicide situation as the unit of analysis and explores similarities and differences in the context of homicide for different social groups For example using Qualitative Comparative Analysis we investigate whether various social groups e g men vs women teenagers vs adults strangers vs intimates Blacks vs Whites kill under qualitatively different circumstances and if so what are the characteristics of these unique profiles The analysis of over 400 000 US homicides is supplemented with qualitative analysis of narrative accounts of homicide events to more fully investigate the structure and process underlying these lethal situations Our findings of unique and common homicide situations across different time periods and social groups are then discussed in terms of their implications for criminological theory and public policy
