Qualitative Sociology A Method To The Madness:

Qualitative Sociology Howard Schwartz, Jerry Jacobs, 1979-02 Efforts to reconstruct the reality of a social scene have evolved numerous theoretical and methodological strategies Qualitative sociology fills the gap in existing literature by providing a comprehensive and detailed treatment of the broad range of non quantitative methods currently being used in sociological research with the conceptual rationales for each method Recognizing the need for a clear concise discussion of both the theoretical and practical aspects of reality reconstruction and formal sociology Drs Schwartz and Jacobs draw on the theories and strategies of Weber Mead Blumer Glaser Straus Simmel Goffman Schutz Garfinkel and Cicourel among others to justify explain and illustrate field studies participant observation ethnography interviewing life histories and personal accounts the analysis of unobtrusive measures audio visual techniques methods of studying and subjectivity phenomenology and more Thus the authors not only describe the various theories and methods but they add to the reader s understanding by providing insight into who has used the methods and why and by evaluating the strengths and weaknesses of each method They also supplement the text throughout with a collection of case studies which illustrate the kind of substantive work qualitative research can produce No other available text covers as many methods as are described in Qualitative Sociology All the methods are examined in an informal conversational style making the discussion accessible to the student with no previous knowledge of qualitative theories and practices Innovative School Principals and Restructuring C.A.J.

Dimmock, T.A. O'Donoghue, 2005-06-27 Restructuring is an international phenomenon and great stress is placed on the role of the innovative principal in the process This book offers insights into the ways in which six principals go about leading the change process in their schools and looks for ways of understanding why and how principals behave and think in the way they do Its edited topical life history approach identifies key events experiences and significant others in the lives of the case study managers and shows how these have shaped the way they implement changes to curriculum teaching and learning in their schools *Field Research* Robert G. Burgess, 2003-09-02 First Published in 1982 Routledge is an imprint of Taylor

Francis an informa company *The Process of Social Research* Jeffrey C. Dixon, Royce Singleton, Bruce C. Straits, 2016 The Process of Social Research successfully meets two major challenges of teaching social science methods to make the material interesting and accessible to students and to provide them with the tools necessary to understand evaluate and conduct research Authors Jeffrey C Dixon Royce A Singleton Jr and Bruce C Straits employ a conversational writing style that is engaging and student friendly Using everyday examples to introduce chapters and clarify complex concepts they provide current research examples on such cutting edge topics as immigration family composition prosecutorial misconduct organized racism homelessness social inequality and education and alcohol consumption and grades Placing a unique emphasis on the research process the book helps students understand the logic and mechanics of social research giving them the tools and the power to evaluate the research of others and to conduct their own research Beginning with the introduction

every chapter contains flowcharts of research processes As each diagram is presented the authors relate the specific method to the overall research process Then over the course of the chapter or section they flesh out each step This way they convey information about the nuts and bolts of research while ensuring that students do not lose sight of the logic of inquiry Comprehensive and up to date without attempting to be encyclopedic in its coverage The Process of Social Research provides a balance between qualitative and quantitative research taking a more integrated approach to describing the relationship between theory and research

Markets in Fashion Patrik Aspers, 2012-10-02 Interest in contemporary cultural industries has grown in the past decade as they take on a greater significance in our increasingly consumer led society Focusing on the world of fashion photography this book presents an interdisciplinary approach in which this and other aesthetic markets such as advertising modelling art music and more can be viewed The main thrust of this groundbreaking book is in developing a theory for these cultural markets characterized by insecurity and where status and aesthetic diversity generate order and price differentiation In these industries services and products are offered that are a mix of the aesthetic and the economic and for fashion photographers such as those studied here it is necessary to carefully position themselves in the market by developing unique photographic styles and separating themselves from competitors Yet the markets in which these industries operate differ from the type of exchange markets depicted by neoclassical economists and therefore cannot be considered using such modes of analysis Instead Aspers conducts his study using empirical phenomenology an original approach presented here for the first time which can be easily used in other empirical studies He draws on original empirical material participant observation and interviews generated in New York and Stockholm which bring a depth of analysis and a relevance to this book which academics researchers and those with a vested interest in such industries will value Written by one of the world's brightest young economic sociologists this fascinating book previously published in Sweden and enthusiastically received is endorsed by recognized industry authorities A noteworthy book it provides a foothold in the burgeoning sub discipline of economic sociology and a significant analysis of the economics of the fashion photography industry

Learning Disability and Everyday Life Alex Cockain, 2024-03-29 Learning Disability and Everyday Life brings into conversation ideas from social theory with thick descriptions of the everyday life of a middle aged man with learning disabilities and autism This book is markedly ethnographic in its orientation to the gritty graininess of everyday life eating drinking walking cooking talking and so on in with and alongside learning disability However preoccupation with the small coexists with a gaze intent upon capturing a bigger picture to the extent that the things constituting everyday life are deployed as prisms through and with which to critically reflect upon the wider worlds of disability and everyday life Such attention to the small and the big the micro and the macro allows this book to explore the ordinary and everyday ways meanings about normalcy and abnormalcy ability and disability are put together enacted practised made up in the sense of constituting and fabricating and crucially accomplished through and between people in specific and invariably contingent

sociocultural discursive and material conditions of possibility This book will be of specific interest not only to students and scholars of disability but also to persons with lived experiences of disability This book will also be of interest to students and scholars of anthropology and sociology *Compelled to Crime* Beth Richie, 2018-05-11 First published in 1996 Routledge is

an imprint of Taylor Francis an informa company **International Handbook of Chinese Families** Chan

Kwok-bun, 2012-12-09 Families are the cornerstone of Chinese society whether in mainland China in Taiwan Hong Kong Macao Singapore Malaysia or in the Chinese diaspora the world over Handbook of the Chinese Family provides an overview of economics politics race ethnicity and culture within and external to the Chinese family as a social institution While simultaneously evaluating its own methodological tools this book will set current knowledge in the context of what has been previously studied as well as future research directions It will examine inter family relationships and politics as well as childrearing education and family economics to provide a rounded and in depth view **Oxford Textbook of Global Public**

Health Roger Detels, Martin Gulliford, Quarraisha Abdool Karim, Chorh Chuan Tan, 2017 Sixth edition of the hugely successful internationally recognised textbook on global public health and epidemiology comprehensively covering the scope methods and practice of the discipline **SAGE Biographical Research** John Goodwin, 2012-06-25 Biographical research may take a

range of forms and may vary in its application and approach but has the unified and coherent aim to give voice to individuals The central concern of this collection is to assemble articles from sociology social psychology education health criminology social gerontology epidemiology management and organizational research that illustrate the full range of debates methods and techniques that can be combined under the heading biographical research Volume One Biographical Research Starting Points Debates and Approaches explores the different biographical methods currently used while locating these within the history of social science methods Volume Two Biographical Interviews Oral Histories and Life Narratives focuses on the more established interview based biographical research methods and considers the analytical strategies used for interview based biographical research Volume Three Forms of Life Writing Letters Diaries and Auto Biography considers the value of data contained within letters diaries and auto biography and illustrates how this data has been analyzed to reveal biographies and their social context Volume Four Other Documents of Life Photographs Cyber Documents and Ephemera focuses on the other human documents and objects like photographs cyber documents emails blogs social networking sites webpages and other ephemera such as official documents that are used extensively in biographical research *Crossing European Boundaries*

Jaro Stacul, Christina Moutsou, Helen Kopnina, 2006 At the turn of the millennium the state of Europe is fluid and contested yet how this affects the everyday lives of European peoples and the ways they experience the social world they live in remains largely unexplored Drawing upon ethnographic information from diverse European settings this volume points to the contradictions that the project of a Europe without boundaries involves In illustrating how the removal of political boundaries can create other boundaries the articles in this volume provide alternatives to recent theorising on complexity which takes

little account of human agency **Family Violence** Douglas J. Besharov,1990 Contains papers prepared for an American Enterprise Institute conference held March 20 to 23 1987 Page 236 *Applications of Social Research Methods to Questions in Information and Library Science* Barbara M. Wildemuth,2016-11-14 The second edition of this innovative textbook illustrates research methods for library and information science describing the most appropriate approaches to a question and showing you what makes research successful Written for the serious practicing librarian researcher and the LIS student this volume fills the need for a guide focused specifically on information and library science research methods By critically assessing existing studies from within library and information science this book helps you acquire a deeper understanding of research methods so you will be able to design more effective studies yourself Section one considers research questions most often asked in information and library science and explains how they arise from practice or theory Section two covers a variety of research designs and the sampling issues associated with them while sections three and four look at methods for collecting and analyzing data Each chapter introduces a particular research method points out its relative strengths and weaknesses and provides a critique of two or more exemplary studies For this second edition three new chapters have been added covering mixed methods visual data collection methods and social network analysis The chapters on research diaries and transaction log analysis have been updated and updated examples are provided in more than a dozen other chapters as well *Nursing Power and Social Judgement* Martin Johnson,2018-08-20 First published in 1997 this work makes a substantial reexamination of the social processes behind the labelling of patients in hospital care Taking an interpretive perspective the author analyzes the social construction of patient labels identifying strategies for and the consequences of giving and receipt of good and bad labels He shows how the rich data of truly participant observation in the tradition of reflexive ethnography can powerfully illuminate the experiences and actions of both patients and their nurses It is a critical analysis of key work in this field Professor Johnson demonstrates the redundancy of trait theories of social judgment offering a more complex and negotiated reality in which patient labels form a part of a rich web of unequal power relations between nurses and their clients *Methodology for the Human Sciences* Donald E. Polkinghorne,1984-06-30 *Methodology for the Human Sciences* addresses the growing need for a comprehensive textbook that surveys the emerging body of literature on human science research and clearly describes procedures and methods for carrying out new research strategies It provides an overview of developing methods describes their commonalities and variations and contains practical information on how to implement strategies in the field In it Donald Polkinghorne calls for a renewal of debate over which methods are appropriate for the study of human beings proposing that the results of the extensive changes in the philosophy of science since 1960 call for a reexamination of the original issues of this debate The book traces the history of the deliberations from Mill and Dilthey to Hempel and logical positivism examines recently developed systems of inquiry and their importance for the human sciences and relates these systems to the practical problems of doing research on topics

related to human experience It discusses historical realism systems and structures phenomenology and hermeneutics action theory and the implications recent systems have for a revised human science methodology From Hire to Liar David Shulman,2018-07-05 There are always clients to please rules to subvert difficult tasks to perform work to shirk and upward mobility to seek Most people with work experience have encountered at least some version of exaggerated resumes exploitative bosses self interested shirking collusion against disliked colleagues lying to clients and countless other variants of lies on the job This book tells the tale of such lies in the workplace and examines their impact on ethics administrating work and productivity from the Introduction According to David Shulman deception is a pervasive element of daily working life Sometimes it is an official part of one s work as in the case study he offers of private detectives who lie for a living but more often it is simply part of the fabric of life on the job Shulman argues that workplace cultures socialize individuals into using deception as a tool in performing their everyday work To make his point he focuses not on extreme cases but rather on less obvious forms of deception such as pretending to show deference shirking one s work crafting misleading accounting reports making false claims to customers and coworkers and covering up business transgressions Shulman analyzes the motives tactics rationalizations and ethical ramifications of acting deceptively in the workplace From Hire to Liar offers readers both detailed accounts of workplace lies and new ways to think about the important effects of everyday workplace deceptions Management Control in a Voluntary Organization Peter Booth,2018-04-17 This book originally published in 1995 is concerned with the study of accounting within its organizational and social context The author analyses accounting as having potential effects at both an ideological level and at an occupational level Empirically it is explored within the context of voluntary organizations as theoretically interesting extreme cases where the conditions for accounting to be significant should be most open to question This title will be of interest to students of business studies and management

Sociomaterial Practices in Medical Work Attila Bruni,2023-12-09 This book presents a sociomaterial perspective on work and organizational practices within the operating room Looking at medical work from a sociological perspective and drawing on ethnographic observations conducted in a hospital s operating block this book analyses the entanglements of humans and technologies in the execution of everyday activities It highlights how the sociomateriality of work and organizational practices manifests in the encounters between operators and material artifacts and in the way objects and technologies participate in processes and practices of organizational communication Objects and technologies are also shaped by these very practices giving rise to a recursive relationship wherein technology communication and organizing are intertwined A sociomaterial understanding of organizational and working practices explains the role of objects and technologies in the generation and enactment of professional knowledge while questioning how power materializes through the interaction of humans and technical objects This book will be of great interest to scholars students and practitioners interested in how sociomaterial perspectives can inform organization studies and reshape our understanding of the intricate

relationships between humans and technologies in healthcare settings
