Lusch, Stephen L. Vargo, 2014-12-18 Expanding on the editors award winning article *Evolving to a New Dominant Logic for Marketing* this book presents a challenging new paradigm for the marketing discipline This new paradigm is service oriented customer oriented relationship focused and knowledge based and places marketing once viewed as a support function central to overall business strategy Service dominant logic defines service as the application of competencies for the benefit of another entity and sees mutual service provision rather than the exchange of goods as the proper subject of marketing It moves the orientation of marketing from a market to philosophy where customers are promoted to targeted and captured to a market with philosophy where the customer and supply chain partners are collaborators in the entire marketing process The editors elaborate on this model through an historical analysis clarification and extension of service dominant logic and distinguished marketing thinkers then provide further insight and commentary The result is a more comprehensive and inclusive marketing theory that will challenge both current thinking and marketing practice *Customer Portfolio Management* Fred Selnes, Michael D. Johnson, 2025-03-18 How to create value with all the customers in a portfolio from the stronger relationships that increase profit margins to the weaker relationships that increase scale Which would you rather have a smaller watertight bucket of loyal customers or a larger leaky bucket of both loyal and not so loyal customers In *Customer Portfolio Management* Fred Selnes and Michael Johnson argue that for most companies and organizations the larger leaky bucket is more valuable While loyal customers are generally more profitable the weaker or leaky relationships in a portfolio provide scale economies and a source of future loyal customers The basic principle behind customer portfolio management CPM they explain is to view a company's market strategies as long term investments in the strength of relationships over an entire portfolio of current and future customers This book helps business leaders understand when and how much to focus on acquiring customers how to

defend and leverage those relationships and how to convert some of these relationships into stronger more profitable ones The authors present an implementable framework for CPM that involves segmenting customers into strangers acquaintances friends and partners understanding the lifetime value or revenues and costs over time across relationship segments and determining when and how much to invest in customer acquisition relationship defense relationship leverage and relationship conversion Case studies and examples that include Amazon Apple IKEA and dozens of other companies are used along the way to illustrate effective portfolio management principles and growth strategies *Handbook of Research on Strategic Alliances and Value Co-Creation in the Service Industry* Rozenes, Shai, Cohen, Yuval, 2017-01-06 Value creation is a pivotal aspect of the modern business industry By implementing these strategies into initiatives and processes deeper alliances between customers and organizations can be established The Handbook of Research on Strategic Alliances and Value Co Creation in the Service Industry is a comprehensive source of scholarly material on frameworks for the effective management of value co creation in contemporary business contexts Highlighting relevant perspectives across a range of topics such as public relations service dominant logic and consumer culture theory this publication is ideally designed for professionals researchers graduate students academics and practitioners interested in emerging developments in the service industry Chaos, Complexity and Leadership 2018 Şefika Şule ERÇETİN, Şuay Nilhan AÇIKALIN, 2020-01-16 This book constitutes the proceedings of the 6th International Symposium on Chaos Complexity and Leadership ICCLS Written by interdisciplinary researchers and students from the fields of mathematics physics education economics political science statistics the management sciences and social sciences the peer reviewed contributions explore chaotic and complex systems as well as chaos and complexity theory in the context of their applicability to management and leadership The book discusses current topics such as complexity leadership in the healthcare fields and tourism industry conflict management and organization intelligence and presents practical applications of theoretical concepts making it a valuable resource for managers and leaders EBOOK: Services Marketing: Integrating Customer Focus Across the Firm Alan Wilson, Valarie Zeithaml, Mary Jo Bitner, Dwayne Gremler, 2012-06-16 The Second European Edition of Services Marketing Integrating Customer Focus Across the Firm by Wilson Zeithaml Bitner and Gremler uniquely focuses on the development of customer relationships through quality service Reflecting the increasing importance of the service economy Services Marketing is the only text that put the customer's experience of services at the centre of its approach The core theories concepts and frameworks are retained and specifically the gaps model a popular feature of the book The text moves from the foundations of services marketing before introducing the gaps model and demonstrating its application to services marketing In the second edition the book takes on more European and International contexts to reflect the needs of courses lecturers and students The second edition builds on the wealth of European and International examples cases and research in the first edition offering more integration of European content It has also been fully updated with the latest research to ensure that it
