Quantitative Neuroendocrinology:

Quantitative Neuroendocrinology, 1995-10-16 In this volume contemporary methods designed to provide insights into mathematical structure for and predictive inferences about neuroendocrine control mechanisms are presented Collates an array of contemporary techniques for analysis of neuroendocrine data Discusses current problems in and solutions to neurohormone pulse analysis Identifies relevant software available An Introduction to Neuroendocrinology Richard E. Brown,1994-01-27 This book is designed as an introductory text in neuroendocrinology the study of the interaction between the brain and endocrine system and the influence of this on behaviour The endocrine glands pituitary gland and hypothalamus and their interactions and hormones are discussed The action of steroid and thyroid hormone receptors and the regulation of target cell response to hormones is examined The function of neuropeptides is discussed with respect to the neuroendocrine system and behaviour The neuroimmune system and lymphokines are described and the interaction between the neuroendocrine and neuroimmune systems discussed Finally methods for studying hormonal influences on behaviour are outlined Each chapter has review and essay questions designed for advanced students and honours or graduate students with a background in neuroscience respectively Methods in Neuroendocrinology Louis D. Van de Kar, 2020-04-28 This book describes some of the many different disciplines that are involved in investigations of neuroendocrine control mechanisms. It is intended for students pre and post doctoral fellows medical residents and others who are interested in neuroendocrine **Topics in Neuroendocrinology**, 1972-01-01 Topics in Neuroendocrinology **Ouantitative** and **Oualitative** research Microscopy P. Michael Conn, 2013-10-22 Methods in Neurosciences Volume 3 Quantitative and Qualitative Microscopy is a collection of papers that deals with microscopic techniques in statistical measures This volume describes microscopy using sophisticated stains and dyes to advance observation of tests and experiments Section I describes autoradiography including micro chemical methods high resolution autoradiography and single or double label quantitative autoradiography for use in imaging of brain activity patterns or determining cerebral physiology Section II discusses the quantification of structures through statistical and computational methods including dynamic video imaging technology Section III explains the use of tracers toxins or dyes in tracing neuronal connections. One paper addresses the use of small injections of axonally transported fluorescent tracers Section IV explains staining technology such as using the silver impregnation method for frozen sections of human nervous tissue that are gathered from tissues preserved in formalin Section V addresses freezing techniques and those using freeze fracture methods in neurobiology The text also discusses cryoprotection and other freezing methods to control ice crystals found in fixed or unfixed brain tissues Section VI presents the combined and high resolution methods in polarization microscopy and microscopic investigations Cellular biologists micro chemists and scientific researchers in the field of micro and cellular biology will appreciate this book An Introduction to Neuroendocrinology, Aspects of Neuroendocrinology W. MacGregor, Gareth Leng, 2016-03-03 Neuroendocrinology ,1994-07 with its well defined functions inputs and outputs is one of the most fertile grounds for computational modeling in neuroscience But modeling is often seen as something of a dark art This book aims to display the power of modeling approaches in neuroendocrinology and to showcase its potential for understanding these complex systems A recurring theme in neuroendocrinology is rhythms How are rhythms generated and what purpose do they serve Are these two questions inextricably intertwined This book is written for innocents presuming no math beyond high school or computing beyond calculators It seeks to lead the curious into the thinking of the modeler providing the tools to the reader to understand models and even develop their own giving life to paper diagrams The diverse chapters from ion channels to networks systems and hormonal rhythms each tell the story of a model serving to join the hard won dots of experimentation mapping a new understanding and revealing hidden knowledge Written by a team of internationally renowned researchers Both print and enhanced e book versions are available Illustrated in full colour throughout This is the fourth volume in a new Series Masterclass in Neuroendocrinology a co publication between Wiley and the INF International Neuroendocrine Federation that aims to illustrate highest standards and encourage the use of the latest technologies in basic and clinical research and hopes to provide inspiration for further exploration into the exciting field of neuroendocrinology Series Editors John A Russell University of Edinburgh UK and William E Armstrong The University of Tennessee USA Written by a team of internationally

Neuroendocrinology of Aging Joseph Meites, 2012-12-06 JOSEPH MEITES The idea that the endocrine system is involved in aging processes is as old as the beginnings of endocrinology. The first endocrine experiment related to aging was reported by Brown Sequard who is usually regarded as the father of endocrinology In 1889 at the age of 72 years he reported that he had succeeded in rejuvenating himself by injections of testicular extracts from dogs and guinea pigs Although the favorable effects observed may have been due mainly to the powers of auto suggestion his reports created a considerable interest in endocrinology and its relation to aging and eventually led to the use of estrogens for treating certain pre and postmenopausal symptoms in women and an drogens for treating some symptoms in aging men Up to about the 1960 s the relatively few studies on endocrine aging relationships dealt mainly with changes in weight and histological appearance of endocrine organs in aging animals and human subjects and included a limited number of measurements of endocrine function by bioassays and chem ical for steroids procedures Within these limitations gerontological investigators were unable to establish any definite relationships between endocrine functions and aging processes with the exception of the con nection between reproductive decline and gonadal and pituitary activity **International Congress of Neuroendocrinology** ,1986-07-23 Nitric Oxide Synthase: Characterization and Functional Analysis ,1996-09-18 Although the function of nitric oxide in a regulatory capacity in the central and peripheral nervous system is widely recognized the full scope of its actions and its interrelationships with other classes of regulatory molecules is just beginning to be comprehended This volume contains a number of sophisticated and advanced methods essential for exploring the activity of nitric oxide in the brain It will be a valuable tool for the established investigator and for those just entering the field Comprehensive protocols included for detection of NO and related compounds by chemical immunohistochemical and in situ hybridization techniques Newly developed methods for the purification of neuronal and endothelial NO synthase production of monoclonal antibodies to NO synthase molecular cloning and expression of NO synthesis and control of NO synthase gene expression Assessment of NO mediated functions in neurons central nervous system cerebral circulation synaptic transmission and vascular tone Calcium imaging by confocal microscopy evaluation of the effect of NO on iron metabolism and detection of heme oxygenase 1 and 2 message level and distribution Paradigms of Neural Injury ,1996-05-23 This volume includes paradigms model systems and techniques for the study of dysfunctions in the nervous system. The advantages and disadvantages of the approaches presented are critically discussed Neural injury Developmental cell death Disease processes and aging

Further Understanding Of The Human Machine: The Road To Bioengineering Max E Valentinuzzi, 2017-01-04 What is bioengineering all about How will it impact the future Can it find the cure for diabetes and other chronic diseases A long awaited continuation of the 2004 book Understanding the Human Machine A Primer for Bioengineering this volume intends to address these questions and more Written together with 18 scientists active in the field Max E Valentinuzzi brings his decades of teaching bioengineering and physiology at the undergraduate and graduate levels to readers giving a profound and sometimes philosophical insight into the realm of bioengineering **Measurement and Manipulation of** Intracellular Ions, 1995-10-10 This practical book provides the detailed methodology and expert guidance required for measuring and manipulating cytosolic ion concentrations. In addition the strengths weaknesses and pitfalls of various techniques are presented It is an invaluable source for those needing an objective evaluation of current methodologies and for those contemplating setting up such procedures A one source reference for measuring and manipulating intracellular ions and for comparing and evaluating current methodologies Includes overviews of Optical probes and reagents Fabrication and use of ion selective microelectrodes Use of NMR spectroscopy Ionophores **G Proteins** Patrick C. Roche, 1996-03-27 G Neuroplasticity, Development, and Steroid Hormone Action Robert J. Handa, Shinji Hayashi, Ei Proteins Terasawa, Mitsuhiro Kawata, 2001-07-30 A compilation of cutting edge research Neuroplasticity Development and Steroid Hormone Action explores the effects of steroid hormones on brain development function and aging The experimental approaches used by the authors ranges from molecular to behavioral and endocrine to neurobiological It contains scientific photographs line drawings tables color illustrations and graphs this interesting and timely text covers the neuroplastic effects of steroid hormones throughout the lifetime of various animal models such as bees fish lizards turtles birds mice rats **Dynamics of Human Reproduction** James W. Wood, a must have reference text for any researcher and primates interested in the biocultural determinants of human fertility and is appropriate as a textbook at the graduate level I expect it to remain a standard in the literature of demographic anthropology and reproductive ecology for many years to come American Journal of Physical Anthropology Neuroendocrine Neoplasia Management Giordano Beretta, Alfredo Berruti, Emilio Bombardieri, Nicola Fazio, Orlando Goletti, 2021-07-16 This book provides the most recent update on the management of neuroendocrine neoplasia NEN a term covering all tumors of various organs and or with a particular histology including MEN multiple endocrine neoplasia related tumors MiNEN mixed neuroendocrine non neuroendocrine neoplasms NEC neuroendocrine carcinoma and Merkel's carcinoma NENs are heterogeneous in their biology clinical presentation and prognosis showing a great variability in aggressiveness and therapy response As a result their treatment is based on a large spectrum of options The standard therapies are surgery in early disease various loco regional procedures in certain conditions and mostly of a palliative nature in metastatic disease At present thanks to our increased understanding of molecular signaling pathways several pharmacological approaches can be used in patients with advanced NENs Somatostatin analogs display both anti tumor effects and symptom control Novel peptide radio receptor treatment PRRT is used in patients with well differentiated tumors. The agents targeting angiogenesis and or PI3K AKT mTOR pathway alone or in combination with analogues have provided encouraging results in advanced disease. The first part of the book focuses on the history epidemiology and the most relevant scientific achievements covering the discoveries in genetic and molecular biology the endoscopic techniques with guided biopsy and the metabolic imaging with hybrid PET CT and MRI CT It particularly highlights the emerging strategies in therapy surgery and mini invasive surgery as well as loco regional and systemic treatments including targeted therapy and or biological therapies. The second part then explores the management of NENs of various anatomical origins and or with peculiar biology. It describes the range of the current options and the most relevant results from the clinical trials. This informative book provides valuable insights for all those interested in the management of neuroendocrine neoplasia.

When Puberty is Precocious. Ora H. Pescovitz, Emily C. Walvoord, 2007-06-06. This book focuses on precocious puberty providing a unique continuum of expertise looking at puberty from anthropologic epidemiologic clinical and molecular perspectives. The volume addresses broad pubertal changes in the general population while at the same time providing in depth information about specific disorders of puberty and the latest management changes. In particular the book is intended for endocrinologists and internists.

The Top Books of the Year Quantitative Neuroendocrinology The year 2023 has witnessed a noteworthy surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve into the realm of topselling books, exploring the engaging narratives that have enthralled audiences this year. The Must-Read: Colleen Hoovers "It Ends with Us" This touching tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best: Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This captivating historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Quantitative Neuroendocrinology: Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and suspenseful novel that will keep you speculating until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
