The author takes a reappraising critical look at the concepts of the deep structure value exploitation immanent crisis using the analytical tools of modern economics to improve those concepts The book is divided into four parts Part 1 explores the essential nature of capitalism re examining problems in the theory of value and exploitation Part 2 tackles the issue of capitalism specific paths of growth and technical change putting forward a rigorous theory of biased technical change and non steady state growth Part 3 examines the cyclical character of capitalist growth and the theory of crises Finally Part 4 places capitalism in the wider framework of modes of production considering the theory of precapitalist formations and aspects of the theory and practical experience of socialism The guiding theme is the combination or confrontation of rigorous quantitative analytical techniques with equally demanding qualitative and political economic conceptualization The book's premise is that this interface is essential to a progressive yet distinctively Marxist social theory *Reinventing Marxism*
