Raf Gibraltar:

The RAF's French Foreign Legion G H Bennett, 2011-06-30 An examination of the relationship between the Royal Air Force and the French Fighter pilots who flew for the RAF during WWII Royal Air Force Officer Aircrew and Selection Centre Workbook (Oasc) Richard McMunn, 2010-11 **Official History of the Royal Air Force 1935-1945 — Vol. II —Fight Avails [Illustrated Edition]** Denis Richards, Hilary Saunders, 2014-08-15 Includes 20 maps diagrams and 23 Illustrations photos The Royal Air Force is the oldest independent air force in the world having gained its spurs over the trenches of Flanders in the First World War it was officially established in 1918 However it was during the Second World War that it would achieve its greatest successes yet from an inauspicious start following post war budget cuts it would rise to become a decisive factor in the campaign to remove the Nazis from Europe and the Japanese from mainland Asia The three volume Official History gives a sound and broad narrative of all of the campaigns actions and engagements that the Royal Air Force was party to across Europe Asia Africa and Australasia The text was set out in manageable chapters each dealing with a particular episode of the struggle against Fascism and is written in an easy and accessible style free from the specialised vocabulary of flying or aerial combat This second volume covers the period 1941 1944 including The Fall of Burma The Capitulation The Continuing struggle during the Battle of the Atlantic The Victory in the North African Campaign The Capture of Sicily The Battle of Monte Cassino and the Fall of Rome The Bombing campaign against Germany gains momentum **RAF Evaders** Oliver Clutton-Brock, 2009-02-19 Stories of the British airmen shot down over Western Europe who evaded capture by the Germans and made their way to Allied territory during World War II During the five years from May 1940 to May 1945 several thousand Allied airmen forced to abandon their aircraft behind enemy lines evaded capture and reached freedom by land sea and air The territory held by the Germans was immense from Norway and Denmark in the north through Holland Belgium Luxembourg to the south of France and initially there was no organization to help the men on the run The first one to assist the evaders and escapers E named after a naval officer Pat O Leary from 1942 it became the PAO line Next was the Comet line from Brussels to the Pyrenees Thousands of brave people were to be involved for whom if caught the penalty was death Theirs is a stirring and awe inspiring story Respected historian Oliver Clutton Brock has researched in depth this secret world of evasion uncovering some treachery and many hitherto unpublished details operations and photos It is a tremendous reference work written in his own colorful style with numerous anecdotes which fills a gap of knowledge formerly unavailable to historians professional or amateur Packed the information key figure biographies and listings 2 094 evaders identified this is a valuable testimony to the courage of all those involved Royal Air Force Coastal Command John Campbell, 2013-10-20 Royal Air Force Coastal Command was the organisation charged with keeping the sea lanes clear around the coasts of Britain for the best part of half a century from immediately after the First World War until the 1960s In the decades after the Second World War John Campbell served as a Coastal Command

navigator and crew captain on Shackleton aircraft in the Maritime Patrol role Having studied in great detail the history and development of Coastal Command he has researched and written this thorough account of its activities throughout its years of operation

A Bucket of Sunshine Mike Brooke,2012-05-01 A Bucket of Sunshine a term used for the use of a nuclear bomb is a firsthand insight into life in the mid 1960s on a RAF Canberra nuclear armed squadron in West Germany on the frontline in the Cold War Mike Brookes describes not only the technical aspect of the aircraft and its nuclear and conventional roles and weapons but also majors on the low level flying that went with the job of being ready to go to war at less than three minutes notice Brooke tells his story warts and all with many amusing overtones in what was an extremely serious business when the world was standing on the brink of nuclear conflict The English Electric Canberra was a first generation jet powered light bomber manufactured in large numbers in the 1950s The Canberra could fly at a higher altitude than any other bomber through the 1950s and set a world altitude record of 70 310 feet Due to its ability to evade early interceptors and providing a significant performance advancement over piston engine bombers the Canberra was a popular export product and served with many nations Although jet powered the Canberra design philosophy was very much in the Mosquito mould providing room for a substantial bomb load fitting two of the most powerful engines available and wrapping it in the most compact and aerodynamic package possible Rather than devote space and weight to defensive armament the Canberra was designed to fly fast and high enough to avoid air to air combat entirely

Stations Of Coastal Command David Smith,2016-02-28 Coastal Command created in 1936 alongside Fighter and Bomber Commands in the reorganization of the RAF in its preparations for the coming war was Britain s mainstay in the battle against the German submarine As more and more Allied merchantmen were sunk during the long voyage from North America the Mediterranean and points south tracking down the U Boats became a constant struggle against harsh weather on long distance patrols out over the Atlantic and Bay of Biscay To counter the threat Coastal Command established a ring of bases stretching from Scotland and Northern Ireland to Iceland and from south Wales and south western Britain to Gibraltar and the Azores all 53 of these stations are covered in this book

Flying Catalinas Andrew Hendrie,2012-10-24 The consolidated PBY Catalina was probably the most versatile and successful flying boat amphibian ever built serving not just with the US Army Navy and Coast Guard during the Second World War but also with the air forces of Britain Canada Australia and New Zealand with the Danes Free French and Norwegians as well as in Brazil Chile Indonesia and elsewhere With a remarkable lifting capacity and endurance this long range twin engine aircraft could absorb a great deal of punishment and still return home after flights lasting an entire day and covering thousands of miles It was employed as a maritime reconnaissance aircraft as a bomber and torpedo bomber as an anti submarine weapon as a mine layer as a special operations machine and as a search and rescue craft by day and night It ferried stores mail and people many of them sick and injured across the world s oceans In this book Andrew Hendrie tells the story of the Flying Cats of their achievements and exploits of the heroism of many of the crews and the

problems they had to endure *The Death of General Sikorski* Peter Zablocki, 2024-08-30 The plane crash at the height of the Second World War which claimed the life of the Polish Prime Minister General Władysław Sikorski ranks among the most enduring mysteries of the conflict It was a death that shifted European alliances and loyalties brought Stalin into the Anglo American camp and sealed Poland's fate for the remainder of the twentieth century Poland and the Soviet Union's historically precarious relationship had taken an even darker turn in September 1939 when the Third Reich's Adolf Hitler and the Soviet Union's Josef Stalin divided the nation and forced its government to relocate first to France and then to Britain in 1940 Sikorski's Polish government in exile established a military political and personal relationship with Winston Churchill's government only to see it fractured by the United States' entrance into the war and the Western Allies' courtship of Stalin following Hitler's invasion of the Soviet Union The Allies' overall support of Stalin's denials following the 1943 discovery of 20 000 bodies of Polish officers murdered and buried by the Soviets in Katyn Forest only made matters worse Sikorski's open protests against describing the Soviet dictator as a benevolent Uncle Joe made him publicly and privately difficult to the new Anglo American Soviet coalition As per reports of the British and Polish intelligence services seemingly not doing enough to stand up to the Soviets had also strained Sikorski's relationship with different Polish government factions Leaving from a layover stop at Gibraltar on 4 July 1943 having visited Polish Army units in Iran Sikorski's RAF Liberator AL523 crashed into the sea just sixteen seconds into its flight while Stalin privately blamed Churchill the Germans were more public in accusing the British Others pointed to the Soviets or even the Poles A British Court of Inquiry convened in 1943 presented an inconclusive report on the crash's cause or foul play and locked up most of its files until 2043 Lacking a respected leader Poland fell out of favour with the Allies who allowed Stalin to redraw the Polish borders and establish a pro communist puppet state in Poland until 1990 Not only exploring what happened on that fateful day in 1943 but also the events leading up to it and those that followed *The Death of General Sikorski* is more of a political thriller than a conspiracy book telling an often complex and enthralling story of a tragedy within a tragedy that of a man and his nation *A History of the Mediterranean Air War, 1940-1945* Christopher Shores, Giovanni Massimello, Russell Guest, Frank Olynyk, Winfried Bock, 2016-08-05 The third volume in the epic military aviation series focuses on the Allied invasion of North Africa during World War II This work of WWII history takes us to November 1942 to explain the background of the first major Anglo American venture Operation Torch the invasion of French North Africa Describing the fratricidal combat that followed the initial landings in Morocco and Algeria it then considers the unsuccessful efforts to reach northern Tunisia before the Germans and Italians could get there to forestall the possibility of an attack from the west on the rear of the Afrika Korps forces then beginning their retreat from El Alamein The six months of hard fighting that followed as the Allies built up the strength of their joint air forces and gradually wrested control of the skies from the Axis are recounted in detail The continuing story of the Western Desert Air Force is told as it advanced from the east to join hands with the units in the west

Also covered are the arrivals over the front of American pilots and crew the P 38 Lightning the Spitfire IX and the B 17 Flying Fortress and of the much feared Focke Wulf Fw 190 The aerial activities over Tunisia became one of the focal turning points of World War II yet are frequently overlooked by historians Here the air sea activities the reconnaissance flights and the growing day and night bomber offensives are examined in detail
