American Postage Stamps Anthony J. Bianculli,2004-10-01 Covering a span of almost two centuries Railroad History on American Postage Stamps tells the stories behind the many United States postage stamps that portray railroad history Almost 200 stamps depicting railroading highlights including land grants the completion of the transcontinental railroad railroad heroes from John Henry to Casey Jones and equipment from famous locomotives to workaday freight cars are described in fascinating vignettes In addition a major chapter covers railroad issues labor and the law There is even a section identifying many famous individuals with surprising railroad associations including Irving Berlin Nelly Bly John Wayne Samuel Clemens Emily Dickinson Will Rogers and Cary Grant Extensively researched by the author over a period of more

than two years the book treats the reader to a treasure trove of little known yet interesting facts that capture the reader's attention from the first page to last. Includes an extensive bibliography and Scott Number index. *The Oxford Encyclopedia of Economic History* Joel Mokyr, 2003. What were the economic roots of modern industrialism? Were labor unions ever effective in raising workers' living standards? Did high levels of taxation in the past normally lead to economic decline? These and similar questions profoundly inform a wide range of intertwined social issues whose complexity, scope, and depth become fully evident in the Encyclopedia. Due to the interdisciplinary nature of the field, the Encyclopedia is divided not only by chronological and geographic boundaries but also by related subfields such as agricultural history, demographic history, business history, and the histories of technology, migration, and transportation. The articles, all written and signed by international contributors, include scholars from Europe, Latin America, Africa, and Asia. Covering economic history in all areas of the world and segments of economies from prehistoric times to the present, *The Oxford Encyclopedia of Economic History* is the ideal resource for students, economists, and general readers, offering a unique glimpse into this integral part of world history. **Vertical Restructuring of the Infrastructure Sectors of Transition Economies** Russell Pittman, 2001.

Trains and Technology: Track and structures Anthony J. Bianculli, 2001. **Getting There** Stephen B. Goddard, 1996-11-15. From the glory days of the railroad to today's gridlocked six-lane highway, *Getting There* dramatizes America's shift from rail to road transportation, how it has robbed Americans of the choice of travel options enjoyed by Europeans, and why it threatens the nation's economic future. Stephen B. Goddard reveals how government joined automakers and roadbuilders to nearly destroy the rails, and why the 21st century will witness high-tech remedies and a railroad resurgence.
