Rain Of Ruin A Photographic History Of Hiroshima And Nagasaki:

Rain of Ruin Donald M. Goldstein, 1995 As the 50th anniversaries of the atomic bombings of Hiroshima and Nagasaki draw near the debate over their propriety intensifies Some argue that Japan was already defeated that the bombings especially of Nagasaki were not necessary This book profiles the two cities and their people before and after those fateful days 400 photos **Naval Warfare 1919-45** Malcolm H. Murfett, 2008-11-04 Naval Warfare 1919 45 is a comprehensive history of the war at sea from the end of the Great War to the end of World War Two Showing the bewildering nature and complexity of the war facing those charged with fighting it around the world this book ranges far and wide sweeping across all naval theatres and those powers performing major as well as minor roles within them Armed with the latest material from an extensive set of sources Malcolm H Murfett has written an absorbing as well as a comprehensive reference work He demonstrates that superior equipment and the best intelligence ominous power and systematic planning vast finance and suitable training are often simply not enough in themselves to guarantee the successful outcome of a particular encounter at sea Sometimes the narrow difference between victory and defeat hinges on those infinite variables the individual s performance under acute pressure and sheer luck Naval Warfare 1919 45 is an analytical and interpretive study which is an accessible and fascinating read both for students and for interested members of the general public **The History of Nuclear War I** John Richard Shanebrook, 2013-10-24 In August of 1945 some 200 000 people died at Hiroshima and Nagasaki from two nuclear weapon explosions during Nuclear War I This book details the following historical events that led to Nuclear War I Fermi and Szilard worked on nuclear fission at Columbia University in 1939 Plutonium 239 was discovered in 1940 Einstein informed President Roosevelt of possible German uranium bombs Fermi built the world s first nuclear reactor in 1942 to manufacture plutonium General Groves and Oppenheimer led the U S effort to build atomic bombs as part of the Manhattan Project Soviet spies infiltrated the Manhattan Project The Trinity Test on July 16 1945 was the world s first nuclear explosion The Pope 1943 and many scientists spoke against the use of nuclear weapons Truman became President on April 12 1945 and first learned of the Manhattan Project The B 29 bomber was selected to deliver atomic bombs to Japan On August 6 1945 an atomic bomb uranium was exploded over the Japanese city of Hiroshima For three days August 6th to the 9th hope abounded that Japan would surrender but preparations for more nuclear war continued On August 9 1945 an atomic bomb plutonium was exploded over the Japanese city of Nagasaki Emperor Hirohito survived a coup by angry military officers and Japan surrendered on August 14 1945 **Nagasaki** Susan Southard, 2017-08-31 On August 9th 1945 the US dropped an atomic bomb on Nagasaki It killed a third of the population instantly and the survivors or hibakusha would be affected by the life altering medical conditions caused by the radiation for the rest of their lives They were also marked with the stigma of their exposure to radiation and fears of the consequences for their children Nagasaki follows the previously unknown stories of five survivors and their families from 1945 to the present day It captures the full range of pain fear

bravery and compassion unleashed by the destruction of a city Susan Southard has interviewed the hibakusha over many years and her intimate portraits of their lives show the consequences of nuclear war Nagasaki tells the neglected story of life after nuclear war and will help shape public debate over one of the most controversial wartime acts in history Published for the 70th anniversary of the Hiroshima and Nagasaki bombs this is the first study to be based on eye witness accounts of Nagasaki in the style of John Hersey's Hiroshima On August 9th 1945 three days after the atomic bombing of Hiroshima a 5 tonne plutonium bomb was dropped on the small coastal city of Nagasaki The explosion destroyed factories shops and homes and killed 74 000 people while injuring another 75 000 The two atomic bombs marked the end of a global war but for the tens of thousands of survivors it was the beginning of a new life marked with the stigma of being hibakusha atomic bomb affected people Susan Southard has spent a decade interviewing and researching the lives of the hibakusha raw emotive eye witness accounts which reconstruct the days months and years after the bombing the isolation of their hospitalisation and recovery the difficulty of re entering daily life and the enduring impact of life as the only people in history who have lived through a nuclear attack and its aftermath Following five teenage survivors from 1945 to the present day Southard unveils the lives they have led their injuries in the annihilation of the bomb the dozens of radiation related cancers and illnesses they have suffered the humiliating and frightening choices about marriage they were forced into as a result of their fears of the genetic diseases that may be passed through their families for generations to come The power of Nagasaki lies in the detail of the survivors stories as deaths continued for decades because of the radiation contamination which caused various forms of cancer Intimate and compassionate while being grounded in historical research Nagasaki reveals the censorship that kept the suffering endured by the hibakusha hidden around the world For years after the bombings news reports and scientific research were censored by U S occupation forces and the U S government led an efficient campaign to justify the necessity and morality of dropping the bombs As we pass the seventieth anniversary of the only atomic bomb attacks in history Susan Southard captures the full range of pain fear bravery and compassion unleashed by the destruction of a city The personal stories of those who survived beneath the mushroom clouds will transform the abstract perception of nuclear war into a visceral human experience Nagasaki tells the neglected story of life after nuclear war and will help shape public discussion and debate over one of the most controversial wartime acts in history

Japan's southernmost island. An estimated 74,000 people died within the first five months and another 75,000 were injured. Published on the seventieth anniversary of the bombing, Nagasaki takes readers from the morning of the bombing to the city today, telling the first-hand experiences of five survivors, all of whom were teenagers at the time of the devastation. Susan Southard has spent years interviewing hibakusha, bomb-affected people, and researching the physical, emotional, and social challenges of post-atomic life. She weaves together dramatic eyewitness accounts with searing analysis of the policies of censorship and denial that colored much of what was reported about the bombing both in the United States and Japan. A gripping narrative of human resilience, Nagasaki will help shape public discussion and debate over one of the most controversial wartime acts in history. **The Leatherneck**, 1996
