Redesigning City Squares And Plazas:

Redesigning City Squares and Plazas Francisco Asensio Cerver, Michael Webb, 1997 Outstanding refurbished city squares and plazas on three continents give this book an engaging global perspective Public squares and plazas have long been indispensable amenities in city life This useful survey focuses on how these meeting places and open spaces are refurbished to cater to the changing needs of society Recent transformations include sites in European Asian and American cities by such designers as Ricardo Legorreta Christian Drevet Nikken Sekkei Schlomo Aronson Nela Golanda and Domino Architects *Urban Squares as Places, Links and Displays* Jon Lang, Nancy Marshall, 2016-07-15 To attract investment and tourists and to enhance the quality of life of their citizens municipal authorities are paying considerable attention to the quality of the public domain of their cities including their urban squares Politicians find them good places for rallies Children consider squares to be playgrounds the elderly as places to catch up with each other and for many others squares are simply a place to pause for a moment Urban Squares as Places Links and Displays Successes and Failures discusses how people experience squares and the nature of the people who use them It presents a typology of squares based on the dimensions of ownership the square's instrumental functions and a series of their basic physical attributes including size degree of enclosure configuration and organization of the space within them and finally based on their aesthetic attributes their meanings Twenty case studies illustrate what works and what does not work in different cities around the world It discusses the qualities of lively squares and quieter more restorative places as well as what contributes to making urban squares less desirable as destinations for the general public The book closes with the policy implications stressing the importance and difficulties of designing good public places Urban Squares offers how to guidance along with a strong theoretical framework making it ideal for architects city planners and landscape architects working on the design and upgrade of squares

Squares Mark C. Childs, 2006 This discussion of what makes public places appealing and useful will inspire those involved with public planning and design *City Squares and Plazas* Francisco Asensio Cerver, 1997 **Great Public Squares** Robert F. Gatje, 2010 Forty outstanding urban spaces of the Western world analyzed and drawn at a common scale for easy comparison **Ancient Origins of the Mexican Plaza** Logan Wagner, Hal Box, Susan Kline Morehead, 2013-04-04 The plaza has been a defining feature of Mexican urban architecture and culture for at least 4 000 years Ancient Mesoamericans conducted most of their communal life in outdoor public spaces and today the plaza is still the public living room in every Mexican neighborhood town and city the place where friends meet news is shared and personal and communal rituals and celebrations happen The site of a community's most important architecture church government buildings and marketplace the plaza is both sacred and secular space and thus the very heart of the community This extensively illustrated book traces the evolution of the Mexican plaza from Mesoamerican sacred space to modern public gathering place The authors led teams of volunteers who measured and documented nearly one hundred traditional Mexican town centers The resulting plans

reveal the layers of Mesoamerican and European history that underlie the contemporary plaza The authors describe how Mesoamericans designed their ceremonial centers as embodiments of creation myths the plaza as the primordial sea from which the earth emerged They discuss how Europeans even though they sought to eradicate native culture actually preserved it as they overlaid the Mesoamerican sacred plaza with the Renaissance urban concept of an orthogonal grid with a central open space The authors also show how the plaza s historic architectural social and economic qualities can contribute to mainstream urban design and architecture today *Cultural Landscape Report for Independence Square*,1997 *Redesigning Urban Centers* Jonathan Barnett,2025-10-01 Redesigning Urban Centers Adapting to Changing Real Estate Markets describes how well managed places which offer clean safe and attractively designed streets and public spaces along with reinvented zoning are drawing real estate investors and developers to reimaged legacy downtowns innovation districts edge cities becoming real cities suburban shopping streets turning into mixed use centers urban districts near airports and bypassed downtowns relying on government support Case studies from the Philadelphia metropolitan region plus examples from across the U S demonstrate how designs which integrate offices housing shopping hotels and entertainment along with cultural and other attractions transform places where people have to be into places where people want to be This book will interest leaders of business improvement districts and Main Street organizations planning officials urban design practitioners and instructors and students of planning economic development and urban design **Return to the Center** Lawrence A. Herzog,2010-01-01 The redesign and revitalization of traditional urban centers is the cutting edge of contemporary urban planning as evidenced by the intense public and professional attention to the rebuilding of city cores from Berlin to New York City s Ground Zero Spanish and Latin American cities have never received the recognition they deserve in the urban revitalization debate yet they offer a very relevant model for this return to the center These cultures have consistently embraced the notion of a city whose identity is grounded in its organic public spaces plazas promenades commercial streets and parks that invite pedestrian traffic and support a rich civic life This groundbreaking book explores Spanish Mexican and Mexican American border cities to learn what these urban areas can teach us about effectively using central public spaces to foster civic interaction neighborhood identity and a sense of place Herzog weaves the book around case studies of Madrid and Barcelona Spain Mexico City and Quer taro Mexico and the Tijuana San Diego border metropolis He examines how each of these urban areas was formed and grew through time with attention to the design lessons of key public spaces The book offers original and incisive discussions that challenge current urban thinking about politics and public space globalization and the future of privatized communities from gated suburbs to cyberspace Herzog argues that well designed human scaled city centers are still vitally necessary for maintaining community and civic life Applicable to urban renewal projects around the globe Herzog s book will be important reading for planners architects designers and all citizens interested in creating more livable cities *A Social History of Modern Tehran* Ashkan Rezvani Naraghi,2023-01-05

Outlines how Tehran's social spaces were transformed by shifting discourses and practices from the nineteenth to the mid twentieth century **By Design 2**, 1989 **Finding Lost Space** Roger Trancik, 1991-01-16 The problem of lost space or the inadequate use of space afflicts most urban centers today The automobile the effects of the Modern Movement in architectural design urban renewal and zoning policies the dominance of private over public interests as well as changes in land use in the inner city have resulted in the loss of values and meanings that were traditionally associated with urban open space This text offers a comprehensive and systematic examination of the crisis of the contemporary city and the means by which this crisis can be addressed Finding Lost Space traces leading urban spatial design theories that have emerged over the past eighty years the principles of Sitte and Howard the impact of and reactions to the Functionalist movement and designs developed by Team 10 Robert Venturi the Krier brothers and Fumihiko Maki to name a few In addition to discussions of historic precedents contemporary approaches to urban spatial design are explored Detailed case studies of Boston Massachusetts Washington D C Goteborg Sweden and the Byker area of Newcastle England demonstrate the need for an integrated design approach one that considers figure ground linkage and place theories of urban spatial design These theories and their individual strengths and weaknesses are defined and applied in the case studies demonstrating how well they operate in different contexts This text will prove invaluable for students and professionals in the fields of architecture landscape architecture and city planning Finding Lost Space is going to be a primary text for the urban designers of the next generation It is the first book in the field to absorb the lessons of the postmodern reaction including the work of the Krier brothers and many others and to integrate these into a coherent theory and set of design guidelines Without polemics Roger Trancik addresses the biggest issue in architecture and urbanism today how can we regain in our shattered cities a public realm that is made of firmly shaped coherently linked humanly meaningful urban spaces Robert Campbell AIA Architect and architecture critic Boston Globe Designs on the Public Kristine F. Miller, New York City is home to some of the most recognizable places in the world As familiar as the sight of New Year's Eve in Times Square or a protest in front of City Hall may be to us do we understand who controls what happens there Kristine Miller delves into six of New York's most important public spaces to trace how design influences their complicated lives Miller chronicles controversies in the histories of New York locations including Times Square Trump Tower the IBM Atrium and Sony Plaza The story of each location reveals that public space is not a concrete or fixed reality but rather a constantly changing situation open to the forces of law corporations bureaucracy and government The qualities of public spaces we consider essential including accessibility public ownership and ties to democratic life are at best temporary conditions and often completely absent Design is in Miller's view complicit in regulation of public spaces in New York City to exclude undesirables restrict activities and privilege commercial interests and in this work she shows how design can reactivate public space and public life Kristine F Miller is associate professor of landscape architecture at the University of Minnesota Reclaiming the Road David L Prytherch, 2025-06-17

Imagining equitable streets for all For the past century our roadways have been engineered as pipes for cars but they offer vast potential as public spaces From New York and Boston to Portland and Los Angeles cities are rethinking their streets going beyond sidewalks and bike lanes to welcome nonmotorists to share the asphalt roadway Reclaiming the Road traces the historical evolution of America s streets and explores contemporary movements to retake them from cars temporarily and permanently for diverse forms of mobility and community life To share the street raises important questions of equity in transportation and beyond David L Prytherch proposes a bold intersectional vision of a more just street Reclaiming the Road connects cutting edge theory policy analysis and firsthand accounts from those leading the charge in transforming our streets to advocate for changing how we think about and design roads Prytherch features case studies of nine major cities in the United States to show how experiments in reclaiming streets accelerated during the Covid 19 pandemic to become lasting changes Through in depth interviews he shares stories of how planners transportation advocates and community leaders have implemented innovative programs for slowing neighborhood streets opening roads for walking and biking and reconstructing roadways with public parklets and street plazas as social spaces for curbside conversation Examining movements to transform streets through the lenses of equity and justice Reclaiming the Road tackles the conceptual challenge of defining mobility justice and the practicalities of planning a more just public street offering a compelling vision for the future of America s public spaces Retail e book files for this title are screen reader friendly with images accompanied by short alt text and or extended descriptions

Designing San Francisco Alison Isenberg, 2024-09-24 A major urban history of the design and development of postwar San Francisco Designing San Francisco is the untold story of the formative postwar decades when U S cities took their modern shape amid clashing visions of the future In this pathbreaking and richly illustrated book Alison Isenberg shifts the focus from architects and city planners those most often hailed in histories of urban development and design to the unsung artists activists and others who played pivotal roles in rebuilding San Francisco between the 1940s and the 1970s Previous accounts of midcentury urban renewal have focused on the opposing terms set down by Robert Moses and Jane Jacobs put simply development versus preservation and have followed New York City models Now Isenberg turns our attention west to colorful pioneering and contentious San Francisco where unexpectedly fierce battles were waged over iconic private and public projects like Ghirardelli Square Golden Gateway and the Transamerica Pyramid When large scale redevelopment came to low rise San Francisco in the 1950s the resulting rivalries and conflicts sparked the proliferation of numerous allied arts fields and their professionals including architectural model makers real estate publicists graphic designers photographers property managers builders sculptors public interest lawyers alternative press writers and preservationists Isenberg explores how these centrally engaged arts professionals brought new ideas to city regional and national planning and shaped novel projects across urban suburban and rural borders San Francisco s rebuilding galvanized far reaching critiques of the inequitable competition for scarce urban land and propelled debates over

responsible public land stewardship Isenberg challenges many truisms of this renewal era especially the presumed male domination of postwar urban design showing how women collaborated in city building long before feminism's impact in the 1970s An evocative portrait of one of the world's great cities *Designing San Francisco* provides a new paradigm for understanding past and present struggles to define the urban future **Pathologies of Modern Space** Kathryn Milun, 2013-10-18 *Pathologies of Modern Space* traces the rise of agoraphobia and ties its astonishing growth to the emergence of urban modernity In contrast to traditional medical conceptions of the disorder Kathryn Milun shows that this anxiety is closely related to the emergence of empty urban space homogenous space such as malls and parking lots stripped of memory and tactile features *Pathologies of Modern Space* is a compelling cultural analysis of the history of medical treatments for agoraphobia and what they can tell us about the normative expectations for the public self in the modern city
