Reflections on the Causes of Human Misery and Upon Certain Proposals to Eliminate Them Barrington

Moore,1972 **Democracy, Revolution, and History** Theda Skocpol,2018-10-18 The work of Barrington Moore Jr is one of the landmarks of modern social science A distinguished roster of contributors here discusses the influence of his best known work *Social Origins of Dictatorship and Democracy* Their individual perspectives combine in delineating Moore s contributions to the transformation of comparative and historical social science over the past several decades The essays in *Democracy Revolution and History* all address substantive and methodological problems asking questions about the different historical paths toward democratic or nondemocratic political outcomes Following Moore s example they use well researched comparative cases to make their arguments In the process they demonstrate how vital Moore s work remains to contemporary research in the social sciences This volume points as well to new frontiers of scholarship suggesting lines of work that build upon Moore s achievements *The Body's Recollection of Being* David Michael Levin,2002-01-04 This is a unique study continuing the work of Merleau Ponty and Heidegger and using the techniques of phenomenology against the prevailing nihilism of our culture It expands our understanding of the human potential for spiritual self realization by interpreting it as the developing of a bodily felt awareness informing our gestures and movements The author argues that a psychological focus on our experience of well being and pathology as embodied beings contributes significantly to a historically relevant critique of ideology It also provides an essential touchstone in experience for a fruitful individual and collective response to the danger of nihilism Dr Levin draws on Merleau Ponty s phenomenology to clarify Heidegger s analytic of human beings through an interpretation that focuses on our experience of being embodied He reconstructs in modern terms the wisdom implicit in western and semitic forms of religion and philosophy considering the work of Freud Jung Foucault and Nietzsche as well as that of American educational philosophers including Dewey In particular he draws on the psychology of Freud and Jung to clarify our historical experience of gesture and movement and to bring to light its potential in the fulfilment of Selfhood Throughout the book the pathologies of the ego and its journey into Selfhood are considered in relation to the conditions of technology and the powers of nihilism **The Legalization of Human Rights** Saladin Meckled-García,Basak Çali,2006-01-16 The concept of human rights as a universal goal is at the centre of the international stage It is now a key part in discourse treaties and in domestic jurisdictions However as this study shows the debate around this development is actually about human rights law This text scrutinizes the extent to which legalization shapes the human rights ideal and surveys its ethical political and practical repercussions How does the law influence what we think about rights What more is there to such rights than their legal protection These expert contributors approach these questions from a range of perspectives political theory moral theory anthropology sociology international law international

politics and political science to deliver a diversity of methodologies This book is essential reading for those wishing to develop a clear understanding of the relationship between human rights ideals and laws and for those working toward the fostering of a genuine human rights culture Suffering and Evil W. S. F. Pickering, Massimo Rosati, 2008 Until recently the subject of suffering and evil was neglected in the sociological world and was almost absent in Durkheimian studies as well This book aims to fill the gap with particular reference to the Durkheimian tradition by exploring the different meanings that the concepts of evil and suffering have in Durkheim's works together with the general role they play in his sociology It also examines the meanings and roles of these concepts in relation to suffering and evil in the work of other authors within the group of the *Ann e sociologique* up until the beginning of World War II Finally the Durkheimian legacy in its wider aspects is assessed with particular reference to the importance of the Durkheimian categories in understanding and conceptualizing contemporary forms of evil and suffering **Human Rights** Anthony Woodiwiss, 2012-11-12 Are human rights part of the problem or part of the solution in the current clash of civilizations Drawing on a hitherto neglected body of work in classical social theory and combining it with ideas derived from Barrington Moore Norbert Elias and Michel Foucault Woodiwiss poses and answers the questions How did human rights become entangled with power relations How might the nature of this entanglement be altered so that human rights better serve the global majority In answering these questions he explains how and why rights discourse developed in such distinctive ways in four key locations Britain the United States Japan and in the UN On this basis he provides for the first time a general sociological account of the development of international human rights discourse which represents a striking challenge to current thinking and policy The Future of the Study of Religion Slavica Jakelic, Lori Pearson, 2018-08-14 This volume brings together diverse voices from various fields within religious and theological studies for a conversation about the proper objects goals and methods for the study of religion in the twenty first century It approaches these questions by way of the most recent contemporary challenges debates and developments in the field and provides a forum in which contending perspectives are tested and contested by their proponents and opponents Contributors address topics such as the connection between the normative and the scientific approaches to the study of religion the meaning of religion in a context of globalization the relation between religious studies and religious traditions the viability of comparative and cultural studies of religious phenomena and the future of gender studies in religion *In Defense of Universal Human Rights* Rhoda E. Howard-Hassmann, 2018-11-26 Should African and Muslim majority countries be obliged to protect LGBT rights or do such rights violate their cultures Should Western based corporations be held liable if their security guards injure union activists in another part of the world or should such decisions be settled under local or domestic law In this book renowned human rights scholar Rhoda E Howard Hassmann vigorously defends the universality of human rights arguing that the entire range of rights is necessary for all individuals everywhere regardless of sex color ethnicity sexuality religion or social class Howard Hassmann grounds her defense of universality in her conception of human

dignity which she maintains must include personal autonomy equality respect recognition and material security Only social democracies she contends can be considered fully rights protective states Taking issue with scholars who argue that human rights are Western quasi imperialist impositions on states in the global South and risk undermining community and social obligation Howard Hassmann explains how human rights support communities and can only be preserved if states and individuals observe their duties to protect them *Freedom from poverty as a human right: economic perspectives* Andreassen, Bard A., Marks, Stephen P., Sengupta, Arjun, 2010-06-04
