The Color of School Reform Jeffrey R. Henig, Richard C. Hula, Marion Orr, Desiree S. Pedescleaux, 2001-01-22 Why is it so difficult to design and implement fundamental educational reform in large city schools in spite of broad popular support for change How does the politics of race complicate the challenge of building and sustaining coalitions for improving urban schools These questions have provoked a great deal of theorizing but this is the first book to explore the issues on the basis of extensive solid evidence Here a group of political scientists examines education reform in Atlanta Baltimore Detroit and Washington D C where local governmental authority has passed from white to black leaders The authors show that black administrative control of big city school systems has not translated into broad improvements in the quality of public education within black led cities Race can be crucial however in fostering the broad civic involvement perhaps most needed for school reform In each city examined reform efforts often arise but collapse partly because leaders are unable to craft effective political coalitions that would commit community resources to a concrete policy agenda What undermines the leadership according to the authors is the complex role of race in each city First public authority does not guarantee access to private resources usually still controlled by white economic elites Second local authorities must interact with external actors at the state and national levels who remain predominantly white Finally issues

of race divide the African American community itself and often place limits on what leaders can and cannot do Filled with insightful explanations together with recommendations for policy change this book is an important component of the debate now being waged among researchers education activists and the community as a whole **State Religious Education and the State of Religious Life** Liam Gearon, Joseph Prud'homme, 2018-04-04 This book explores recent calls to increase instruction of the Bible in American public schools The work develops a distinctive philosophical and trans Atlantic assessment of these proposals by critiquing European approaches to religious education and by reviewing the role of religion in contemporary democracies The work will spark debate among political scientists policy experts Religious Education instructors theologians and social and educational theorists
