Promoting Self-Change from Problem Substance Use Harald Klingemann,Linda C. Sobell,J. Barker,J. Blomqvist,W. Cloud,T. Ellinstad,D. Finfgeld,R. Granfield,D. Hodgins,G. Hunt,C. Junker,F. Moggi,S. Peele,R. Smart,M. Sobell,J. Tucker,2012-12-06 For many years what has been known about recovery from addictive behaviors has come solely from treatment studies Only recently has the study of recoveries in the absence of formal treatment or self help groups provided an alternative source of information This book on the process of self change from addictive behaviors is the first of its kind as it presents more than research findings Rather it presents the process of self change from several different perspectives environmental cross cultural prevention and interventions at both societal and individual level It provides strategies for how health care practitioners and government policy makers alike can aid and foster self change Directions for future research priorities are also presented

SELF - A Multidisciplinary Concept Theresa Dicke,Herbert Marsh,Rhonda G. Craven,Dennis M. McInerney,2021-01-01 Research on the self relates to various phenomena including self esteem self concept self verification self awareness identity self efficacy passion self determination and goals Moreover research on self

is multidisciplinary and of interest to a broad range of areas such as education economics social psychology neuro sciences motivation physical activity and behavior sciences philosophy and learning sciences Chapters in this volume will illustrate some of the best of the research within these disciplines examining different aspects of self from various perspectives A feature of this volume is that we will explore not only positive aspects of high perceived levels of self determination and competence or self concept on achievement motivation and wellbeing but also the dark side of an uncertain and negative self on identity and wellbeing We learn from this that the self is a dynamic and powerful yet fragile and highly amenable construct that needs self care and constant reassurance SELF A Multidisciplinary Concept thus highlights the broad application of self research and its diversity This volume is intended to develop both theoretical and methodological ideas and to present empirical evidence of various disciplines and applications dealing with self The scope of this seventh volume of the International Advances in Self Research series started in 2000 by Herbert W Marsh Dennis M McInerney and Rhonda G Craven is thus very broad Keeping within the tradition of the series this volume will highlight the applicability of a multitude of empirical approaches and methods to self research We also aimed to maintain a balance between discussing theoretical research in SELF and deriving implications for effective practice This volume thus includes chapters covering self related topics within an educational social emotional psychological physiological managerial and health context General Principles and Empirically Supported Techniques of Cognitive Behavior Therapy William T. O'Donohue, Jane E. Fisher, 2009-01-09 Proven and effective cognitive behavior therapy is the most widely taught psychotherapeutic technique General Principles and Empirically Supported Techniques of Cognitive Behavior Therapy provides students with a complete introduction to CBT It includes over 60 chapters on individual therapies for a wide range of presenting problems such as smoking cessation stress management and classroom management Each chapter contains a table clearly explaining the steps of implementing each therapy Written for graduate psychology students it includes new chapters on imaginal exposure and techniques for treating the seriously mentally ill *Neuroeconomics* Peter Politser, 2008-03-12 An introduction to the burgeoning field of neuroeconomics this book brings together the essential concepts the discipline draws on from psychology neuroscience and economics **Conceptual Economics: The Liaising Role In Politics And Social Sciences** Kui-wai Li, 2021-01-18 Given that there is no shortage of economic theories while economic problems are growing periodically Conceptual Economics boldly attempts to initiate a new approach by employing conceptual and intuitive tools to examine the intra relationship between microeconomics and macroeconomics as well as the inter relationship between economic analysis and other social science studies especially the relationship with political science The few intuitive ideas include the separation between ex ante situations and ex post outcomes the difference between endowment differences and unequal outcomes and the role of economics as a vehicle in the delivery of numerous social and political activities The discussion extends to cover an analysis on human values and concludes with a recommendation on the functionality of civic capitalism

With intuition and analytical reasoning within economics and with other social sciences Conceptual Economics can become a new branch in economic study where scholars analysts and intellectuals could think outside the box by liaising a wider economic perspective and or amalgamating non economic aspects into their analysis This shall provide a new dimension to solving human economic problems and possibly area of intellectuality
