Research, Practice, and Innovations in Teacher Education During a Virtual Age Zimmerman, Aaron Samuel, 2022-11-18 Decades of research have shown that early career teachers face a number of challenges and hold an increasingly wide set of responsibilities Teacher educators therefore must think carefully about how to prepare early career teachers for the profession Additionally however the work of teaching and teacher education has

become increasingly complex within the context of the current virtual age including the prominent reality of social media and the significant possibilities of online teaching and learning Research Practice and Innovations in Teacher Education During a Virtual Age makes a significant contribution to the scholarship on teacher education by presenting a variety of evidence based methods that can be used to develop and improve aspects of teacher education within this virtual age including the curriculum and pedagogy of online teacher education as well as effective ways to prepare preservice teachers for the realities of online teaching and online learning Covering topics such as virtual caring learning material adaptation and instructional coaching this premier reference source is a dynamic resource for teacher educators pre service teachers administrators and educators of both K 12 and higher education government officials policymakers researchers and academicians

The Robot Factory Joseph Ganem, 2018-08-27 This book exposes a disturbing misuse of the scientific method to advance policies and agendas that are in fact detrimental to both science and education The author a physics professor examines two related trends in education the practice of data driven reform and the disparaging of the traditional liberal arts in favor of programs with a heavy emphasis on science and technology Many of the reforms being foisted on educators have more in common with pseudo science than real science The reduction of education to a commodity and the shilling of science as a means to enhance corporate profits lead to an impoverished and stunted understanding of science in particular and of education in general How is it possible for schools with all students learning at grade level to be rated as failing teachers to be rated as ineffective after all their students meet their learning outcomes rising grade school math standards to result in more college students needing remedial math politicians to disparage scientists and their results but argue that more students should study science These bizarre outcomes have happened and are the result of an education system that misuses and misrepresents math and science in the classroom and in crafting education policies This book exposes the flawed and fallacious thinking that is damaging education at all levels throughout the United States and makes a compelling case for rethinking the standardized optimized and quantified approaches in vogue in education today to accommodate the different needs of individual teachers and students
