When we interact with animals we intuitively read thoughts and feelings into their expressions and actions it is easy to suppose that they have minds like ours And as technology grows more sophisticated we might soon find ourselves interpreting the behaviour of robots too in human terms It is natural for us to humanize other beings in this way but is it philosophically or scientifically justifiable How different might the minds of animals or machines be to ours As David McFarland asks here could robots ever feel guilty and is it correct to suppose your dog can truly be happy Can we ever know what non human minds might be like or will the answer be forever out of our reach These are central and important questions in the philosophy of mind and this book is an accessible exploration of the differing philosophical positions that can be taken on the issue McFarland looks not only at philosophy but also examines new evidence from the science of animal behaviour plus the latest developments in robotics and artificial intelligence to show how many different and sometimes surprising conclusions we can draw about the nature of alien minds *Everything Robotics* Jennifer Swanson,2016

Introduces readers to robots and robotics from how they were developed and the materials used to create them to the jobs they are tasked with and where the field of robotics is heading **Companion Robots for Older Adults** Sofia

Thunberg,2024-05-06 This thesis explores through a mixed methods approach what happens when companion robots are deployed in care homes for older adults by looking at different perspectives from key stakeholders Nine studies are presented with decision makers in municipalities care staff and older adults as participants and the studies have primarily been carried out in the field in care homes and activity centres where both qualitative e g observations and workshops and quantitative data surveys have been collected The thesis shows that companion robots seem to be here to stay and that they can contribute to a higher quality of life for some older adults It further presents some challenges with a certain discrepancy between what decision makers want and what staff might be able to facilitate For future research and use of companion robots it is key to evaluate each robot model and potential use case separately and develop clear routines for how they should be used and most importantly let all stakeholders be part of the process The knowledge contribution is the holistic view of how different actors affect each other when emerging robot technology is introduced in a care environment Den h r avhandlingen utforskar vad som h nder n r s llskapsrobotar inf rs p omsorgsboenden f r ldre genom att titta p perspektiv fr n olika intressenter Nio studier presenteras med kommunala beslutsfattare v rdpersonal och ldre som deltagare Studierna har i

huvudsak genomförs i fält på särskilda boenden och aktivitetscenter där både kvalitativa exempelvis observationer och workshops och kvantitativa data enkelt har samlats in. Avhandlingen visar att sällskapsrobotar verkar vara bra för att stanna och att de kan bidra till en högre livskvalitet för vissa äldre. Den visar även på en del utmaningar med en viss diskrepans mellan vad beslutsfattare vill införa och vad personalen har möjlighet att utföra i sitt arbete. För framtida forskning och användning av sällskapsrobotar är det viktigt att utvärdera varje robotmodell och varje användningsområde var för sig och ta fram tydliga rutiner för hur de ska användas och viktigast av allt låta alla intressenter vara en del av processen. Kunskapsbidraget med avhandlingen är en helhetssyn på hur olika aktörer påverkar varandra när ny robotteknik introduceras i en vårdmiljö.

Humans and Robots Sven Nyholm, 2020-03-09. Can robots perform actions make decisions collaborate with humans be our friends perhaps fall in love or potentially harm us. Even before these things truly happen ethical and philosophical questions already arise. The reason is that we humans have a tendency to spontaneously attribute minds and agency to anything even remotely humanlike. Moreover some people already say that robots should be our companions and have rights. Others say that robots should be slaves. This book tackles emerging ethical issues about human beings robots and agency head on. It explores the ethics of creating robots that are or appear to be decision making agents. From military robots to self driving cars to care robots or even sex robots equipped with artificial intelligence how should we interpret the apparent agency of such robots. This book argues that we need to explore how human beings can best coordinate and collaborate with robots in responsible ways. It investigates ethically important differences between human agency and robot agency to work towards an ethics of responsible human robot interaction.

The Internet of Animals Deborah Lupton, 2023-03-07. The internet is made of cats is a half jokingly made claim. Today animals of all shapes and sizes inhabit our digital spaces including companion animals wildlife feral animals and livestock. In this book Deborah Lupton explores how digital technologies and datafication are changing our relationships with other animals. Playfully building on the concept of The Internet of Things she discusses the complex feelings that have developed between people and animals through the use of digital devices from social media to employing animal like robots as companions and carers. The book brings together a range of perspectives including those of sociology cultural geography environmental humanities critical animal studies and internet studies to consider how these new digital technologies are contributing to major changes in human animal relationships at both the micropolitical and macropolitical levels. As Lupton shows while digital devices and media have strengthened people's relationships to other creatures these technologies can also objectify animals as things for human entertainment therapy or economic exploitation. This original and engaging book will be of interest to scholars and students across the social sciences and humanities.

Fuzzy Systems and Data Mining IX Antonio J. Tallón-Ballesteros, Raquel Beltrán-Barba, 2023-12-15. Fuzzy systems and data mining are indispensable aspects of the digital technology on which we now all depend. Fuzzy logic is intrinsic to applications in the electrical chemical and engineering industries and also in the fields of management and environmental

issues Data mining is indispensable in dealing with big data massive data and scalable parallel and distributed algorithms This book presents the proceedings of FSDM 2023 the 9th International Conference on Fuzzy Systems and Data Mining held from 10-13 November 2023 as a hybrid event with some participants attending in Chongqing China and others online The conference focuses on four main areas fuzzy theory algorithms and systems fuzzy application data mining and the interdisciplinary field of fuzzy logic and data mining and provides a forum for experts researchers academics and representatives from industry to share the latest advances in the field of fuzzy sets and data mining This year topics from two special sessions on granular ball computing and the application of generative AI as well as machine learning and neural networks were also covered A total of 363 submissions were received and after careful review by the members of the international program committee 110 papers were accepted for presentation at the conference and publication here representing an acceptance rate of just over 30% Covering a comprehensive range of current research and developments in fuzzy logic and data mining the book will be of interest to all those working in the field of data science **Free Will H. Beebe**, 2013-10-08 This comprehensive introductory guide includes discussion of the major contemporary positions on compatibilism and incompatibilism and of the central arguments that are a focus of the current debate including the Consequence Argument manipulation arguments and Frankfurt's famous argument against the Principle of Alternate Possibilities **How Our Love of Dogs Creates Social Conflict** James K. Beggan, 2022-09-07 For the last twenty thousand years dogs and people have shared a unique bond in the animal kingdom In *How Our Love of Dogs Creates Social Conflict* James K Beggan uses symbolic interaction to examine the meaning that dogs have for people as friends and family members Although many animal rights advocates express dismay over the subordinate status ownership implies the author argues that ownership creates a powerful psychological connection that makes it easier for people to imbue dogs with humanlike characteristics Beggan outlines how dogs sensitivity to inequity in combination with a high degree of cognitive capacity makes it possible for dogs to be active agents in creating conflict between people The author's analysis of social conflict between people over their dogs connects to profound philosophical concepts about the nature of mind the relationship between humans and animals and the moral responsibility human beings have to dogs and other animals
