The Stellar Populations of Galaxies B. Barbuy, Alvio Renzini, 2012-12-06 One approach to learning about stellar populations is to study them at three different levels of resolution First in our own Galaxy secondly from nearby galaxies where stars can still be resolved and thirdly in remote galaxies in which the stellar population can only be studied in integrated light This IAU Symposium covered the entire range of galaxies in its study of their stellar populations Interspersed with theoretical papers the wealth of observational results provides an important state of the art presentation of the progress that has been made in this field *Galactic Bulges* Herwig

Dejonghe, Harm J. Habing, 2012-12-06 In the early summer of 89 a very informal meeting on the bulge of our Galaxy was held in Leiden During that meeting Michael Rich proposed to hold a more properly organised symposium on Galactic Bulges in a few years time After some discussion a Scientific Organising Committee was founded and after some manoeuvring a chairman was chosen a local organiser was assigned and two editors were given instructions A good thing about the location of the meeting was that Ghent is a very beautiful city and had never before hosted an IAU symposium It could be that this plus the fact that he is a very keen amateur astronomer led H M the King of Belgium to offer his patronage to the meeting an offer that we gratefully and we hope gracefully accepted The meeting took place at a resort some 15 km outside Ghent Most participants were housed on the premises a very convenient situation This feeling of togetherness made up for the small shortcomings of the lecture room which is normally used as a sports hall The weather was fair except on the day of the barbecue when pouring rain forced us to go inside *Index of Conference Proceedings* British Library. New Developments in Array Technology and Applications A.G. Davis

Philip, Kenneth A. Janes, Arthur R. Upgren, 2012-12-06 IAU Symposium No 167 brought together researchers who use CCDs

and arrays designers and manufacturers of CCDs and Array Mosaics and those who write the software to control these devices and to reduce the large amounts of data contained in each frame At the meeting such topics as plans for applying the new technology to the new large telescopes that have been built recently and those planned in the near future new developments in infrared arrays advances and concerns with the use of CCDs in photometry and spectroscopy and the creation of large mosaics in photometry and spectroscopy and the creation of large mosaics of chips which allow larger areas of the sky to be covered in a single frame were discussed There were sessions devoted to the following topics New Developments in CCD Technology New Developments in IR Detector Arrays Direct Imaging with CCDs and Other Arrays Spectroscopy with CCDs and Other Arrays and Large Field Imaging with Array Mosaics Scientific results of studies made with this technology were covered in the poster sessions CCD and Array Detectors have become the detectors of choice at all the world's optical observatories Such instruments on small university and college telescopes have turned these telescopes into instruments that can now do observations which in the past were done only on the largest telescopes CCDs and Arrays are known as the people's detector because of their ability to turn small telescopes into true research instruments On large telescopes observations can be made of extremely faint and crowded objects that were impossible to observe before the advent of CCD and Array technology The proceedings of this meeting will be useful to all those who are interested in the design manufacture and use of CCDs and Arrays for astronomical observations [Hands-on Astronomy For Education - Proceedings Of The Workshop](#) C Pennypacker,1992-08-07 This workshop brought together the leaders in the field of education in astronomy and explored the newly available technologies that can make astronomy a powerful teaching tool for high school and undergraduate college students Techniques include the use of automated telescopes charge coupled devices and a personal computer for image processing and data manipulation **Astrophysics of Dust** Adolf N.
