**Populism and Imperialism** Nathan Jessen, 2017-07-14 In the final years of the nineteenth century as a large scale movement of farmers and laborers swept much the country the United States engaged in an ostensibly anti colonial war against Spain and a colonial war of its own in the Philippines How one related to the other the nature of the activists involvement in foreign policy debates and the influence of these wars upon the prospects for domestic reform is what Nathan

Jessen explores in *Populism and Imperialism* American reformers at the turn of the twentieth century have long been misrepresented as accomplices of empire. Rather, as *Populism and Imperialism* makes clear, they were imperialism's chief opponents and that opposition contributed to their ultimate defeat. Correcting the record, Jessen charts the fortunes of the Populists through the nineteenth century's last decade. He shows that contrary to the standard narrative, Populists remained powerful in the West after the election of 1896; they only suffered their final political reverses in 1900 after being branded as unpatriotic traitors by their opponents. In fact, the Populists and Democrats in the West favored war with Spain for humanitarian reasons; some among them led the opposition to Hawaiian annexation and as leaders of the anti-imperialists in Congress from 1899 on the occupation of the Philippines. Jessen also addresses the little-studied money power conspiracy theory that explains a key element of the Populist worldview. This theory linking European imperialism and the growing economic and political power of financiers stirred Populist opposition to American imperialism as well. *Populism and Imperialism* revises a critical chapter in US history and offers lessons for the present as well as insights into the nation's past.

**Colorado Day by Day** Derek Everett, 2020-03-16 Copublished with History Colorado *Colorado Day by Day* is an engaging this-day-in-history approach to the key figures and forces that have shaped Colorado from ancient times to the present. Historian Derek R. Everett presents a vignette for each day of the calendar year, exploring Colorado's many facets through distilled tales of people, places, events, and trends. Entries incorporate tales from each of the state's sixty-four counties and feature both well-known and obscure cultural moments, including events in Native American, African American, Asian American, Hispano, and women's history. Allowing the reader to explore the state's heritage as individual threads or as part of the greater tapestry, *Colorado Day by Day* recovers much lost history and will be an entertaining and useful source of lore for anyone who enjoys or is curious about Colorado history. *Rocky Mountain West* Duane A. Smith, 1992 [Interpreting Energy at Museums and Historic Sites](#) Leah S. Glaser, 2022-12-13 Experts all agree that human beings can mitigate climate change by changing how we use energy for heat, light, movement, and production. Stewards of heritage sites and collections can engage the public at the grassroots level to raise awareness about the cultural and socioeconomic reasons for past choices that have contributed to climate change. This book will help cultural institutions identify ways to interpret new stories through historic places and resources, especially if staff have made the commitment to go green. Without place-based context, discussions about energy focus primarily on the science and not the human experience. By reminding us of our past practices and values regarding energy production and use, historic places can inspire different ways of thinking about transitioning to different energy sources and question the doctrine that high energy use is necessary for progress. Public interpretation can expose the vast energy infrastructure and the impact of energy extraction, production, and use on place. Historic sites offer place-based contexts for visitors to interact with and think critically about the processes and the impact of energy development. In for example, a maritime village. This book synthesizes science with the humanities outside of popular media.

and other politicized spaces to identify different kinds of energy resources in many historic collections or sites It supplements current calls for economic and policy changes because as stewards of historic places we need to do what we can in this all hands on deck moment to prepare for shared stewardship of our future
