

- Japan became an imperialist power in the 1890's as industrialization created new needs:
  - Food sources
  - Outlets for surplus population
  - Raw materials
  - Demand for coal, iron, etc.
  - Markets
  - Honor [nationalism]

## **Role Of Labourintensive Sectors In Japanese Industrialization Japanese Experience Series:**

**UNU Publications** United Nations University,1994      **Japanese Economic Development** Penny Francks,2015-05-19

This fully revised and updated third edition of Japanese Economic Development looks at Japan's economic history from the nineteenth century through to World War II recasting analysis of Japan's economic past in the light fresh theoretical perspectives in the study of economic history and development Francks draws out the historical roots of the institutions and practices on which Japan's post war economic miracle was based and provides a comparative framework within which the Japanese case can be understood and related to development in the rest of the world New features for this edition include textboxes summarising key concepts expanded coverage of the early modern economy the traditional sector and the international context of Japanese growth an increased number of case studies fully up dated references glossary and bibliography Taking a thematic approach this textbook demonstrates how studying the first example of Asian industrialisation can provide the basis for an alternative non western narrative of development As it such is an important resource for undergraduate and postgraduate courses on the Japanese economy as well as comparative economic development and economic history more generally      *Labour-Intensive Industrialization in Global History* Gareth Austin,Kaoru

Sugihara,2013-09-13 The prevailing view of industrialization has focussed on technology capital entrepreneurship and the institutions that enabled them to be deployed Labour was often equated with other factors of production and assigned a relatively passive role Yet it was labour absorption and the improvement of the quality of labour over the course of several centuries that underscored the timing pace and quality of global industrialization While science and technology developed in the West and whereas the use of fossil fuels especially coal and oil were vital to this process the more recent history has been underpinned by the development of comparatively resource and energy saving technology without which the diffusion of industrialization would not have been possible The labour intensive resource saving path which emerged in East Asia under the influence of Western technology and institutions and is diffusing across the world suggests the most realistic route humans could take for a further diffusion of industrialization which might respond to the rising expectations of living standards without catastrophic environmental degradation      *The Pacific in the Age of Early Industrialization* Kenneth Pomeranz,2017-05-15 The essays selected for this volume show how the Pacific rapidly became part of an industrializing world Its raw materials notably rubber and copper were critical some of its handicraft industries were devastated by mechanized competition others survived and adapted contributing to distinctive patterns of industrialization that made Japan a new center of power and also laid the groundwork for later growth in Taiwan Korea and coastal China The Pacific coast of the Americas was also first drawn into an industrial world largely as an exporter of raw materials but North and South diverged rapidly portending futures even more different than those of Northeast and Southeast Asia By the 1930s when the uneven effects of industrialization would have much to do with plunging the Pacific into war one can already glimpse in

outline the structural bases for many of the region's contemporary characteristics. All this is set in context in the important introduction by Kenneth Pomeranz.

**Housework, Consumption and Female Labour in Japan, 1600–1940** Penelope Francks, 2025-02-27 This book illuminates the largely neglected contribution of unpaid primarily female household labour to economic production and living standards in Japan from the early modern period to the eve of World War Two. The difficulties involved in measuring time devoted to housework and other forms of household labour in the past have meant that most attempts to assess the process of industrialisation have failed to recognise the ways in which such labour is essential to the sustainability and welfare of the population. In this context Japan presents a significant example of a historical case of industrialisation occurring within an economy that continued to be dominated by the institution of the household. This short study argues that this must have led to a particularly significant underestimation of Japanese living standards in the past with implications for comparative and global analysis and to neglect of the key role of women in the historical economy. Providing a nuanced yet concise analysis, this book will be valuable reading for scholars of economic history and feminist economics as well as introducing important comparative angles for researchers in Japanese studies and gender studies more widely.

*Development of Environmental Policy in Japan and Asian Countries* T. Terao, K. Otsuka, 2016-01-13 By examining the issues of environmental policy formation and implementation linked to economic development and reviewing the Japanese experiences and the examples of other Asian countries, this book reveals factors of dynamism between environmental policy and social change in a domestic regional and global context.

*The Rise of Modern Business in Great Britain, the United States, and Japan* Mansel G. Blackford, 1998 Newly revised and updated, *The Rise of Modern Business* compares and analyzes the development of business and business institutions in Great Britain, the United States, Japan, and to a lesser extent Germany from the preindustrial era to the present.

*Globalization and Development Volume II* Shigeru Thomas Otsubo, 2015-10-05 Globalization and Development is a cross-national study on the interstate dispersion of the impacts on growth, inequality, and poverty that international economic integration provides to the economies of the developing countries. In order to present the Leading Issues in Development with Globalization in a balanced manner to identify differences and commonalities among Country Experiences in development with globalization and to introduce diversified development paradigms with forward-looking discussions, In Search of a New Development Paradigm for the post MDGs era, this publication consists of three volumes and four main parts. Volume II, Part III presents the country case studies of Bhutan, China, Indonesia, Japan, Thailand, Vietnam, and Ghana with their respective experiences of development under globalization. An additional chapter that describes the overall African experience under globalization is included, reflecting the recent emergence of Africa as the global target of investment. This book intends to serve as a unique and comprehensive guide for those in the international development community on the subjects of

Tsutsui, 1999 Averting a Great Divergence Peer Vries, 2019-08-08 The most significant debate in global economic history over the past twenty years has dealt with the Great Divergence the economic gap between different parts of the world Thus far this debate has focused on China India and north western Europe particularly Great Britain This book shifts the focus to ask how Japan became the only non western country that managed at least partially to modernize its economy and start to industrialize in the 19th century Using a range of empirical data Peer Vries analyses the role of the state in Japan s economic growth from the Meiji Restoration to World War II and asks whether Japan s economic success can be attributed to the rise of state power Asserting that the state s involvement was fundamental in Japan s economic catching up he demonstrates how this was built on legacies from the previous Tokugawa period In this book Vries deepens our understanding of the Great Divergence in global history by re examining how Japan developed and modernized against the odds *The Japanese Main Bank System* Masahiko Aoki, Hugh Patrick, 1995-02-16 BL Gives a definitive description and analysis of the main bank system BL Strong contributors BL Understudied subject BL Incorporates results of a major World Bank research programme BL Balances institutional description with financial theory and empirical analysis This volume looks at systems of corporate finance concentrating on the Japanese main bank system The remaining chapters describe different systems assessing to what extent the Japanese system can serve as a model for developing market economies and transforming socialist economies The basic characteristics of the main bank system are examined here its roots development and its role in the heyday of its rapid growth The volume looks at how the system has performed and at its strengths and weaknesses It goes on to look at how the system has changed and what its appropriate role is as deregulation liberalization and internationalization of Japan s financial markets have proceeded over the past two decades and a new issue securities market has emerged A basic conclusion of the book is that banking based systems are in most cases the most appropriate for industrial financing until a rather late stage of a country s economic and financial development It aims to identify the conditions under which banks are better able than securities market institutions to evaluate the credit worthiness of borrowers and the viability of new projects to monitor the ongoing performance of firms and to rescue or liquidate firms in distress Contributors Masahiko Aoki Theodor Baums V V Bhatt John Campbell Yasushi Hamao Toshihiro Horiuchi Takeo Hoshi Anil Kashyap Dong Wong Kim Gary Loveman Sang Woo Nam Frank Packer Hugh Patrick Yingyi Qian Mark Ramseyer Clark Reynolds Satoshi Sunamura Paul Sheard Juro Teranishi Kazuo Ueda Work, Mobility, and Participation Robert E. Cole, 2024-06-28 At a minimum our goal is to develop a better understanding of Japanese labor market practices and work organization and in so doing develop a more enlightened vision of American practices We will greatly enhance our ability to achieve both these goals by arriving at a better understanding of the comparative experience of the two nations over time We can no longer afford the delusion that

what exists in the United States reflects the characteristics of industrial society in its most advanced form Yet to follow current fashion in simply denying that the United States is the very model of a modern society while advocating that we imitate the Japanese is to take a course filled with its own pitfalls Perhaps it is time we accepted the fact that the social scientist s intense commitment to generalization cannot be allowed to obscure the fundamental observation that nations develop along their own paths based on their own political cultural economic and social histories As nations industrialize there is undoubtedly convergence in important institutional spheres such as the expansion of education the adoption of common technologies and determinants of labor mobility Certainly nations can learn from one another and indeed some nations impose their will on other nations Yet there are also unique solutions to common problems From the Introduction This title is part of UC Press s Voices Revived program which commemorates University of California Press s mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1979

**History of Innovative Entrepreneurs in Japan** Takeo Kikkawa, 2023-03-18 This is the first Open Access book introducing more than 20 of Japan s leading innovative entrepreneurs from the 17th century to the present The author outlines the innovative business models created by entrepreneurs including SoftBank s Masayoshi Son Fast Retailing Uniqlo s Yanai Tadashi Honda s Soichiro Honda Sony s Akio Morita Panasonic s Konosuke Matsushita and Toyota s Kiichiro Toyoda as well as their predecessors including Takatoshi Mitsui of Mitsui Zaibatsu Shibusawa Eiichi of Daiichi Bank While introducing the innovators the author also raises three broader questions 1 Why did Japan industrialize earlier than any other country outside Europe and the United States 2 Why was Japan able to realize unsurpassed economic growth between the 1910s and the 1980s 3 Why has Japan s economy stagnated for more than 30 years since the 1990s Drawing upon analytical concepts including Schumpeter s breakthrough innovation Kirzner s incremental innovation and Christensen s disruptive innovation the author contends that Japan s successes were based on unique and systematic breakthrough innovation and an accumulation of incremental innovation while it later fell victim to a combination of breakthrough innovation from advanced countries and disruptive innovation by developing nations

THE NEW ECONOMIC NATIONALISM Monica de Bolle , Jérémie Cohen-Setton, Madi Sarsenbayev, 2025-04-15 Empires city states and nations have

long pursued aggressive trade tax and investment policies to amass wealth A new consensus emerged after the Great Depression and World War II supporting liberalized international trade economic cooperation and free markets Today that consensus has shattered replaced by a new economic nationalism of industrial policy tariffs and various methods of state support for the economy Can this new approach deliver stability national security and prosperity This book examines case studies revealing a decidedly mixed record In some instances economic nationalist policies have fostered growth and declining unemployment though accompanied by fiscal costs and inefficiency In much of the developing world however economic nationalist policies have produced corruption debt burdens inflation and ultimately stagnation By examining the past The New Economic Nationalism provides a roadmap to an uncertain future *Japan Quarterly*, 1995

**Traditional Industry in the Economy of Colonial India** Tirthankar Roy, 1999-11-04 The majority of workers in South Asia are employed in industries that rely on manual labour and craft skills Some of these industries have existed for centuries and survived great changes in consumption and technology over the last 150 years In earlier studies historians of the region focused on mechanized rather than craft industries arguing that traditional manufacturing was destroyed or devitalized during the colonial period and that modern industry is substantially different Exploring new material from research into five traditional industries Tirthankar Roy's book contests these notions demonstrating that while traditional industry did evolve during the Industrial Revolution these transformations had a positive rather than destructive effect on manufacturing generally In fact the book suggests the major industries in post independence India were shaped by such transformations Tirthankar Roy's book offers new and penetrating insights into India's economic and social history

**Japan and China in East Asian Integration** Lim Hua Sing, 2008 Provides analyses on the politico economic relationship between Japan and China and a comparison of economic strengths between China and India in East Asian economic integration Provides an overall analysis on East Asian economic integration including some observations on the recent development and future prospects of the region
