Roles Speakers Play:

Teachers' Roles in Second Language Learning Bogum Yoon, Hoe Kyeung Kim, 2012-09-01 This book is designed to provide practical applications of sociocultural theory with regard to teachers' roles in second language education. By providing specific examples of teachers' roles in the classroom, the book aims to help researchers, teacher educators, and classroom teachers make clear connections between practice and theory in second language learning. All the studies in this edited book are conducted in the PreK-16 classroom setting. Each chapter presents rigorous research analysis within the framework of sociocultural theory and provides rich descriptions of teachers' roles. The book is intended to be used in teacher education courses. The primary audience of the book is in-service teachers who work with second language learners (SLLs) in their classrooms, including ESL/Bilingual classrooms or regular classrooms. Since many SLLs receive instructions both in the ESL/Bilingual classrooms and in the regular classrooms, it is important to discuss teachers' roles in both settings. The secondary audience of the book is teacher educators and researchers who work with pre-service and in-service teachers in teacher education. This book will be an excellent resource for book study groups and practitioners working with professional learning communities.

Translanguaging for Equal Opportunities János Imre Heltai, Eszter Tarsoly, 2023-06-19 This multi-authored monograph, located in the intersection of translanguaging research and Romani studies, offers a state-of-the-art analysis of the ways in which translanguaging supports bilingual Roma students learning in monolingual school systems. Complete with a video repository of translanguaging classroom moments, this comprehensive study is based on long-term participatory ethnographic research and a pedagogical implementation project undertaken in Hungary and Slovakia by a group of primary teachers, bilingual Roma participants, and researchers. Co-written by academic and non-academic participants, the book is an essential reading for researchers, pre- and in-service teachers of Romani-speaking students, and experts working with collaborators, learners, informants, and activists whose home languages are excluded from mainstream education and school curricula. The video files in the book are available via the following website: <http://www.kre.hu/romanitranslanguaging/index.php> video repository.

Request Strategies Yong-Ju Rue, Grace Qiao Zhang, 2008 This book investigates request strategies in Mandarin Chinese and Korean and is one of the first attempts to address cross-cultural strategies employed in the speech act of requests in two non-Western languages. The data drawn from role plays and naturally recorded conversations complement each other in terms of exhaustiveness and authenticity. This study explores the similarities and differences of the request patterns that emerged in the Chinese and Korean data and the intricate relation between request strategies and social factors such as power and distance. The findings raise questions about the influence of methodology on data and the applicability of so-called universals to East Asian languages. They also offer new insights into generally held ideas of directness and requesting behaviours in Chinese and Korean and the problems of cross-cultural and cross-linguistic communication. This research is suggestive for the disciplines of cross-cultural pragmatics, cross-cultural communication,

Language Contact in Africa and the African Diaspora in the Americas Cecelia Cutler, Zvezdana Vrzić, Philipp Angermeyer, 2017-07-12

Language Contact in Africa and the African Diaspora in the Americas brings together the original research of nineteen leading scholars on language contact and pidgin/creole genesis. In recent decades, increasing attention has been paid to the role of historical, cultural, and demographic factors in language contact situations. John Victor Singler's body of work, a model of what such a research paradigm should look like, strikes a careful balance between sociohistorical and linguistic analysis. The case studies in this volume present investigations into the sociohistorical matrix of language contact and critical insights into the sociolinguistic consequences of language contact within Africa and the African Diaspora. Additionally, they contribute to ongoing debates about pidgin/creole genesis and language contact by examining and comparing analyses and linguistic outcomes of particular sociohistorical and cultural contexts and considering less studied factors such as speaker agency and identity in the emergence, nativization, and

stabilization of contact varieties **Linguistic Epidemiology** Nick Enfield, 2013-04-15 First monograph in English to provide a sustained treatment of a specific grammatical topic across languages of mainland Southeast Asia representing different language families An important contribution to the literature on language contact and linguistics areas as well as semantics theory and methodology Provides new data on grammaticalization **Learning French oral skills using role play as a learning strategy: The Kenyan experience** Odhiambo Oduke, 2014-02-01 Role play and foreign language learning helps the learners to develop speaking skills within defined social contexts Languages are always spoken within certain defined spacio social context The learning of French as a foreign language in Kenya takes cognizance that oral skills are important to facilitate competent communication in any given language The Kenyan reality of learning oral French skills within a learning set up in Kenyan secondary schools is well presented in this text The salient challenges are also highlighted since language learning is normally not a smooth sail for the learner and for the teacher who plays a pivotal facilitation role in guiding the learner to imbibe the vital communicative skills in the language that is being taught On the whole role play is not just a language learning activity it is an activity that provides impetus which propels human development in its entire gamut of activities A conspicuous hint on the importance of role play in our daily lives is also presented in this text with some examples well presented and cited in this write up Stephen Krashen's Monitor Model on language acquisition and the Grounded Theory which helps to interpret social research findings have been used to analyze the data which was derived from the inquiry done in the Kenyan secondary schools The classical importance of role play and simulation in the learning process has been well underscored in this particular text **Linguistic Politeness in Britain and Uruguay** Rosina Márquez Reiter, 2000-12-08 The first well researched contrastive pragmatic analysis of requests and apologies in British English and Uruguayan Spanish It takes the form of a cross cultural corpus based analysis using male and female native speakers of each language and systematically alternating the same social variables in both cultures The data are elicited from a non prescriptive open role play yielding requests and apologies The analysis of the speech acts is based on an adaptation of the categorical scheme developed by Blum Kulka et al 1989 The results show that speakers of English and Spanish differ in their choice of indirectness levels head act modifications and the politeness types of males and females in both cultures Reference to an extensive bibliography and the thorough discussion of methodological issues concerning speech act studies deserve the attention of students of pragmatics as well as readers interested in cultural matters

The Speaker and the Budget Daniel J. Palazzolo, 2010-11-23 One of the most important changes in Congress in decades were the extensive congressional reforms of the 1970s which moved the congressional budget process into the focus of congressional policy making and shifted decision making away from committees This overwhelming attention to the federal budget allowed party leaders to emerge as central decision makers Palazzolo traces the changing nature of the Speaker of the House's role in the congressional budget process from the passage of the Budget and Impoundment Control Act of 1974 through the 100th Congress in 1988 As the deficit grew and budget politics became more partisan in the 1980s the Speaker became more involved in policy related functions such as setting budget priorities and negotiating budget agreements with Senate leaders and the president Consequently the Speaker's role as leader of the institution was subordinated to his role as a party leader
