Scaling Up A Research Agenda For Software Engineering:

Scaling Up National Research Council, Computer Science and Telecommunications Board, 1989-02-01 Large and growing opportunity costs are resulting from the inability to produce sophisticated reliable software in a timely manner Software engineering presents stubborn problems but in this book a group of experts suggest several constructive directions for research Together they support the need for greater interaction between researchers and practitioners and more aggressive efforts to share and reuse software engineering knowledge *A Research Agenda for Startups, Scale-Up, Scale-Down, and Re-Scaling Strategies* Christian Felzensztein, Afsaneh Bagheri, Christian Lechner, 2025-10-07 This timely book addresses the pressing need to understand scale ups as a distinct phenomenon presenting a comprehensive exploration of their challenges strategies and impacts It highlights how as engines of transformation scale ups challenge existing market structures redefine industries and highlight the need for dedicated research and policy frameworks to support their unique growth trajectories

Building a Workforce for the Information Economy National Research Council, Office of Scientific and Engineering Personnel, Board on Science, Technology, and Economic Policy, Board on Testing and Assessment, Computer Science and Telecommunications Board, Committee on Workforce Needs in Information Technology, 2001-03-19 A look at any newspaper's employment section suggests that competition for qualified workers in information technology IT is intense Yet even experts disagree on not only the actual supply versus demand for IT workers but also on whether the nation should take any action on this economically important issue Building a Workforce for the Information Economy offers an in depth look at IT workers where they work and what they do and the policy issues they inspire It also illuminates numerous areas that have been questioned in political debates Where do people in IT jobs come from and what kind of education and training matter most for them Are employers and workers experiences similar or different in various parts of the country How do citizens of other countries factor into the U S IT workforce What do we know about IT career paths and what does that imply for IT workers as they age And can we measure what matters The committee identifies characteristics that differentiate IT work from other categories of high tech work including an informative contrast with biotechnology The book also looks at the capacity of the U S educational system and of employer training programs to produce qualified workers **Emerging Needs and**

Opportunities for Human Factors Research Committee on Human Factors, Board on Human-Systems Integration, Division of Behavioral and Social Sciences and Education, National Research Council, 1995-09-29 This book identifies areas that represent new needs and opportunities for human factors research in the coming decades It is forward looking problem oriented and selectively focused on national or global problems including productivity in organizations education and training employment and disabilities health care and environmental change technology issues including communications technology and telenetworking information access and usability emerging technologies automation and flexible manufacturing and advanced transportation systems and human performance including cognitive performance under stress and aiding

intellectual work **Computing the Future** National Research Council, Computer Science and Telecommunications Board, Committee to Assess the Scope and Direction of Computer Science and Technology, 1992-02-01 Computers are increasingly the enabling devices of the information revolution and computing is becoming ubiquitous in every corner of society from manufacturing to telecommunications to pharmaceuticals to entertainment Even more importantly the face of computing is changing rapidly as even traditional rivals such as IBM and Apple Computer begin to cooperate and new modes of computing are developed Computing the Future presents a timely assessment of academic computer science and engineering CS E examining what should be done to ensure continuing progress in making discoveries that will carry computing into the twenty first century Most importantly it advocates a broader research and educational agenda that builds on the field's impressive accomplishments The volume outlines a framework of priorities for CS E along with detailed recommendations for education funding and leadership A core research agenda is outlined for these areas processors and multiple processor systems data communications and networking software engineering information storage and retrieval reliability and user interfaces This highly readable volume examines Computer science and engineering as a discipline how computer scientists and engineers are pushing back the frontiers of their field How CS E must change to meet the challenges of the future The influence of strategic investment by federal agencies in CS E research Recent structural changes that affect the interaction of academic CS E and the business environment Specific examples of interdisciplinary and applications research in four areas earth sciences and the environment computational biology commercial computing and the long term goal of a national electronic library The volume provides a detailed look at undergraduate CS E education highlighting the limitations of four year programs and discusses the emerging importance of a master's degree in CS E and the prospects for broadening the scope of the Ph D It also includes a brief look at continuing education **Software Creativity 2.0** Robert L. Glass, 2006 Glass explores a critical yet strangely neglected question What is the role of creativity in software engineering and computer programming With his trademark easy to read style and practical approach backed by research and personal experience Glass takes on a wide range of related angles and implications Computer Books *End User Development* Henry Lieberman, Fabio Paternò, Volker Wulf, 2006-11-01 This book makes important aspects of the international discussion on End User Development EUD available to a broader audience It offers a unique set of contributions from research institutes worldwide addressing relevant issues and proposing original solutions This broad look at the emerging paradigm of End User Development will inspire every reader to appreciate its potential for the future Indeed the editors hope that readers end users will themselves become developers **Computer Science and Artificial Intelligence** Panel on Computer Science and Artificial Intelligence, Commission on Physical Sciences, Mathematics, and Applications, Division on Engineering and Physical Sciences, National Research Council, 1997-06-24 The focus of this report is on artificial intelligence AI and human computer interface HCI technology Observations conclusions and recommendations regarding AI and HCI are presented in

terms of six grand challenge areas which serve to identify key scientific and engineering issues and opportunities Chapter 1 presents the panel's definitions of these and related terms Chapter 2 presents the panel's general observations and recommendations regarding AI and HCI Finally Chapter 3 discusses computer science AI and HCI in terms of the six selected grand challenge areas and three time horizons that is short term within the next 2 years midterm 2 to 6 years and long term more than 6 years from now and presents additional recommendations in these areas **Organizational Linkages**

National Research Council, Division of Behavioral and Social Sciences and Education, Board on Human-Systems Integration, Panel on Organizational Linkages, 1994-02-01 By one analysis a 12 percent annual increase in data processing budgets for U S corporations has yielded annual productivity gains of less than 2 percent Why This timely book provides some insights by exploring the linkages among individual group and organizational productivity The authors examine how to translate workers productivity increases into gains for the entire organization and discuss why huge investments in automation and other innovations have failed to boost productivity Leading experts explore how processes such as problem solving prompt changes in productivity and how inertia and other characteristics of organizations stall productivity The book examines problems in productivity measurement and presents solutions Also examined in this useful book are linkage issues in the fields of software engineering and computer aided design and why organizational downsizing has not resulted in commensurate productivity gains Important theoretical and practical implications contribute to this volume's usefulness to business and technology managers human resources specialists policymakers and researchers *Computers at Risk*

National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Commission on Physical Sciences, Mathematics, and Applications, System Security Study Committee, 1990-02-01 Computers at Risk presents a comprehensive agenda for developing nationwide policies and practices for computer security Specific recommendations are provided for industry and for government agencies engaged in computer security activities The volume also outlines problems and opportunities in computer security research recommends ways to improve the research infrastructure and suggests topics for investigators The book explores the diversity of the field the need to engineer countermeasures based on speculation of what experts think computer attackers may do next why the technology community has failed to respond to the need for enhanced security systems how innovators could be encouraged to bring more options to the marketplace and balancing the importance of security against the right of privacy
