Scaling Up Treatment For The Global Aids Pandemic:

Scaling Up Treatment for the Global AIDS Pandemic Institute of Medicine, Board on Global Health, Committee on Examining the Probable Consequences of Alternative Patterns of Widespread Antiretroviral Drug Use in Resource-Constrained Settings, 2004-11-24 An estimated forty million people carry the human immunodeficiency virus HIV and five million more become newly infected annually In recent years many HIV infected patients in wealthy nations have enjoyed significantly longer good quality lives as a result of antiretroviral therapy ART However most infected individuals live in the poorest regions of the world where ART is virtually nonexistent The consequent death toll in these regions especially sub Saharan Africa is begetting economic and social collapse To inform the multiple efforts underway to deploy antiretroviral drugs in resource poor settings the Institute of Medicine committee was asked to conduct an independent review and assessment of rapid scale up ART programs It was also asked to identify the components of effective implementation programs At the heart of the committee's report lie five imperatives Immediately introduce and scale up ART programs in resource poor settings Devise strategies to ensure high levels of patient adherence to complicated treatment regimens Rapidly address human resource shortages to avoid the failure of program implementation Continuously monitor and evaluate the programs to form the most effective guidelines and treatment regimens for each population Prepare to sustain ART for decades

Scaling Up Health Service Delivery Ruth Simmons, Peter Fajans, Laura Ghiron, 2007 The focus here is on ways to increase impact of health service innovations that have been tested in pilot or experimental projects so as to benefit more people and to foster policy and programme development on a lasting sustainable basis p i Preface

Global AIDS Alexander C. Irwin,Joyce V. Millen,Dorothy Fallows,2003 AIDS is the most devastating communicable disease in history and structures of poverty and injustice are magnifying the crisis in underresourced countries More than 36 million people are infected with HIV AIDS the vast majority of them in the poor world or in poor and marginalized communities within wealthy countries And since AIDS was first recognized in the early 1980s 13 million children have been orphaned and 22 million people have died from the disease Irwin and Millen co authors of the critically praised *Dying for Growth Global Inequality and the Health of the Poor* demonstrate that it is morally imperative and practically feasible to control the spread of AIDS by overturning common myths about treatment and prevention For example it is often argued that ordinary citizens in rich countries can do little to fight AIDS in poor counties But Irwin and Millen show how individual activists students health providers and members of international health organizations have helped to play pivotal roles in lowering drug prices and securing increased funding for vaccine development Activism and education by groups like ACT UP Student Global AIDS Campaign and various religious organizations is forcing national and international leaders to take greater responsibility for the global AIDS crisis Features a comprehensive resource guide Illustrated with photographs Alexander Irwin is an assistant professor of religious studies at Amherst College Joyce Millen is Director of Research for the Institute for Health and Social Justice Irwin and Millen are co authors of *Dying for Growth Global Inequality and the Health of the Poor* James Orbinski president of Doctors Without Borders called *Dying for Growth* deeply intelligent thoroughly researched a must read for all citizens and activists committed to meaningful change
