Scent Of The Unseen:

The Scent of Survival Chinmoy Mukherjee, 2025-06-20 Chunmun Singh's journey tracing his path from a struggling migrant grappling with the overwhelming sensory onslaught of a new city to a revered Scent Detective and ultimately a visionary perfumer is a profound testament to the extraordinary power of human resilience and the boundless capacity for adaptation. This novella delves deeply into the myriad challenges he faces in an unfamiliar land, the unexpected and truly miraculous gift he receives, and the transformative impact it wields upon his personal life and burgeoning relationships. Through his miraculously heightened sense of smell, Chunmun learns not just to navigate but to intimately understand a world that initially feels overwhelming and isolating. He ultimately discovers a deep and abiding sense of purpose, finding genuine acceptance and a vibrant sense of belonging in his new luminous home. His story stands as a poignant reminder that even the most unusual of sensitivities, when embraced, understood, and channeled with an open heart, can become the very key to unlocking unforeseen potential and fostering a profound, rich connection to the world around us. **How Come?** Kathy Wollard, 2015-01-13 Fact-filled, fun-filled, as interesting to parents as it is to kids, the How Come series is the trusted source for lively, clear answers to kids' science queries. Now the best questions and answers from all three books, *How Come*, *How Come Planet Earth*, and *How Come In the Neighborhood*, have been revised, updated, freshly illustrated in full color, supplemented with twenty completely new questions, and combined into one bigger, better volume. *How Come* explains in fascinating detail more than 200 mysteries and phenomena in the world around us. These are the questions that pique kids' curiosity and stump parents: When it rains, does running rather than walking to the nearest shelter really keep you any drier? How can a stone skip across a pond instead of sink? If the Earth is spinning, why can't we feel it? Why don't we fly off? Why do elephants have trunks? And the all-time classic: Why is the sky blue? Sunlight has a hidden rainbow of colors, and air molecules scatter blues the most, sending bright blue light down to Earth. The text is clearly written, engaging, and accessible. It's for every kid who wants to know and every grown-up who simply doesn't know. *Past Scents* Jonathan Reinartz, 2014-03-30 In this comprehensive and engaging volume, medical historian Jonathan Reinartz offers a historiography of smell from ancient to modern times. Synthesizing existing scholarship in the field, he shows how people have relied on their olfactory sense to understand and engage with both their immediate environments and wider corporal and spiritual worlds. This broad survey demonstrates how each community or commodity possesses or has been thought to possess its own peculiar scent. Through the meanings associated with smells, osmologies develop what cultural anthropologists have termed the systems that utilize smells to classify people and objects in ways that define their relations to each other and their relative values within a particular culture. European Christians, for instance, relied on their noses to differentiate Christians from heathens, whites from people of color, women from men, virgins from harlots, artisans from aristocracy, and pollution from perfume. This reliance on smell was not limited to the global North. Around the world, Reinartz shows people used scents to signify individual and

group identity in a morally constructed universe where the good smelled pleasant and their opposites reeked With chapters including Heavenly Scents Fragrant Lucre and Odorous Others Reinartz's timely survey is a useful and entertaining look at the history of one of our most important but least understood senses
