Dorahy, Ingo Schäfer, 2019-01-29 An invaluable sourcebook on the complex relationship between psychosis trauma and dissociation thoroughly revised and updated This revised and updated second edition of *Psychosis Trauma and Dissociation* offers an important resource that takes a wide ranging and in depth look at the multifaceted relationship between trauma dissociation and psychosis The editors leaders in their field have drawn together more than fifty noted experts from around the world to canvas the relevant literature from historical conceptual empirical and clinical perspectives The result documents the impressive gains made over the past ten years in understanding multiple aspects of the interface between trauma

dissociation and psychosis The historical conceptual section clarifies the meaning of the terms dissociation trauma and psychosis proposes dissociation as central to the historical concepts of schizophrenia and borderline personality disorder and considers unique development perspectives on delusions and the onset of schizophrenia The empirical section of the text compares and contrasts psychotic and dissociative disorders from a wide range of perspectives including phenomenology childhood trauma and memory and cognitive disturbances whilst the clinical section focuses on the assessment differential diagnosis and treatment of these disorders along with proposals for new and novel hybrid disorders This important resource Offers extensive updated coverage of the field from all relevant perspectives Brings together in one text contributions from scholars and clinicians working in diverse geographical and theoretical areas Helps define and bring cohesion to this new and important field Features nine new chapters on conceptions of trauma dissociation and psychosis PTSD with psychotic features delusions and memory trauma treatment of psychotic symptoms and differences between the diagnostic groups on hypnotizability memory disturbances brain imaging auditory verbal hallucinations and psychological testing Written for clinicians researchers and academics in the areas of trauma child abuse dissociation and psychosis but relevant for psychiatrists psychologists and psychotherapists working in any area the revised second edition of Psychosis Trauma and Dissociation makes an invaluable contribution to this important evolving field

The Haunted Self Onno van der Hart, Ellert R. S. Nijenhuis, Kathy Steele, 2014-09-02 Life is an ongoing struggle for patients who have been chronically traumatized They typically have a wide array of symptoms often classified under different combinations of comorbidity which can make assessment and treatment complicated and confusing for the therapist Many patients have substantial problems with daily living and relationships including serious intrapsychic conflicts and maladaptive coping strategies Their suffering essentially relates to a terrifying and painful past that haunts them Even when survivors attempt to hide their distress beneath a facade of normality a common strategy therapists often feel besieged by their many symptoms and serious pain Small wonder that many survivors of chronic traumatization have seen several therapists with little if any gains and that quite a few have been labeled as untreatable or resistant In this book three leading researchers and clinicians share what they have learned from treating and studying chronically traumatized individuals across more than 65 years of collective experience Based on the theory of structural dissociation of the personality in combination with a Janetian psychology of action the authors have developed a model of phase oriented treatment that focuses on the identification and treatment of structural dissociation and related maladaptive mental and behavioral actions The foundation of this approach is to support patients in learning more effective mental and behavioral actions that will enable them to become more adaptive in life and to resolve their structural dissociation This principle implies an overall therapeutic goal of raising the integrative capacity in order to cope with the demands of daily life and deal with the haunting remnants of the past with the unfinished business of traumatic memories Of interest to clinicians students of clinical psychology and psychiatry as well as to researchers all those interested in adult
