Scholarly Communications John J. Regazzi, 2015-02-12

Scholarly Communications: A History from Content as King to Content as Kingmaker traces the development of scholarly communications from the creation of the first scientific journal through the wide diversity of professional information services today. Unlike any other book this work is an authoritative history by the past President of Elsevier and current Professor at Long Island University which examines the changing nature of scholarly communication throughout its history including its research importance as well as its business value. It specifically covers four key themes: the value of scholarly content and information at various stages of its development and use; the role that technology has played on the use, importance and value of scholarly information and research communications; the changing business models affecting the system of scholarly communication from the way it is produced to how it is distributed and consumed; and some of the implications of mobile, cloud and social computing technologies on the future of scholarly communications. Attention is paid to analyzing the structural changes that the professional publishing community now faces. Regazzi examines research content as an economic good, how technology and business models have greatly affected the value of scholarly publishing and the drivers of the future sustainability of our system of scholarly communication.

The Academic Research Library in A Decade of Change Reg Carr, 2007-01-31

This book starts from the premise that the last decade has brought more changes for the academic research library than any ever previously known. The book provides an authoritative overview and analysis of the issues and challenges affecting academic research libraries from the closing years of the 20th century onwards. While the focus on this period of white water change is primarily British, with a number of case studies based on the transformative initiatives of the UK's Joint Information Systems Committee (JISC) and its seminal Electronic Libraries Programme (eLib) as well as on the Bodleian Libraries' far reaching responses to the complex demands of the digital age, the issues themselves are presented in their global context with implications drawn for research libraries everywhere. Written by one of the world's leading academic research librarians, it provides a comprehensive overview of the factors at work in an exceptionally significant and fast moving decade of research library development. Contains personal insights into many of the key library

and information initiatives of recent years
