It does not rely on diagnostic categories alone but explores the functioning of children in several dimensions of development and considers multiple levels of influence. The book builds on an individualized integrated approach to present a variety of evidence based strategies for working with children with multiple challenges. It considers children from preschool age to adolescence with a number of severe difficulties. These may include extreme aggression, oppositional defiant behavior, significant anxiety and depression, cognitive and academic challenges, delays in speech and language, problems with attention and concentration, sensory integration problems and unresolved trauma. The treatment strategies included can be used by various specialists within the intervention team as well as by parents and teachers. **Key Features** Presents an innovative approach to working with children with multiple disorders, often the most challenging cases for clinicians. Moves beyond standard recipes for treatment planning to encompass developmental, including social and biological factors, and functional aspects of working with children. Includes case studies as well as detailed treatment plans. Offers treatment strategies that can be used by the intervention team, teachers and parents.
