William A. P. Childs,2018-04-10 Greek Art and Aesthetics in the Fourth Century B C analyzes the broad character of art produced during this period providing in depth analysis of and commentary on many of its most notable examples of sculpture and painting Taking into consideration developments in style and subject matter and elucidating political religious and intellectual context William A P Childs argues that Greek art in this era was a

natural outgrowth of the high classical period and focused on developing the rudiments of individual expression that became the hallmark of the classical in the fifth century As Childs shows in many respects the art of this period corresponds with the philosophical inquiry by Plato and his contemporaries into the nature of art and speaks to the contemporaneous sense of insecurity and renewed religious devotion Delving into formal and iconographic developments in sculpture and painting Childs examines how the sensitive expressive quality of these works seamlessly links the classical and Hellenistic periods with no appreciable rupture in the continuous exploration of the human condition Another overarching theme concerns the nature of style as a concept of expression an issue that becomes more important given the increasingly multiple styles and functions of fourth century Greek art Childs also shows how the color and form of works suggested the unseen and revealed the profound character of individuals and the physical world *Sanctuaries and the Sacred in the Ancient Greek World* John Pedley, 2005-10-17 The first chapters outline important themes and issues including locations and their meanings defining features of sanctuaries the relationship between structure and ritual political as well as religious functions transformations over time and the activities and experiences of the individual These themes are linked to historic and specific sanctuaries notably Olympia and Delphi as examples of major international sanctuaries Samos and Poseidonia as urban sanctuaries in different parts of the Greek world and the acropolis in Athens Final chapters trace the consequences of the Roman conquest the triumph of Christianity as well as the impact of Turks travelers archaeologists and tourists on these sites Written in a clear style and richly illustrated this 2005 book is intended for students and provides an accessible yet authoritative introduction to the material aspects of ancient Greek sanctuaries and the ritual activities which took place there It includes a lengthy glossary and a chapter bibliography **The Hibbert Journal** Lawrence Pearsall Jacks, George Dawes Hicks, 1929 A quarterly review of religion theology and philosophy
