Johnson, 2012-05-28 This book provides a concise historical survey of the various types of aircraft used by the United States Army Air Corps Army Air Forces and Air Force and the Navy and Marine Corps to accomplish air attack missions since 1926 The text covers four types of fixed wing aircraft designated attack aircraft light medium and tactical bombers fighter bombers and adapted attack aircraft Reports on individual aircraft types include the aircraft's original military requirements production history and operational record usually accompanied by photographs illustrations and technical specifications Four appendices detail aircraft designations and nomenclature used throughout the military the organizational structure of various military air units aircraft designs that never made it into official service and the evolution of attack aircraft weapons and tactics      **Into the Dark Water** John J. Domagalski, 2020-01-10 The complete World War II record of one of the most celebrated warships in American history made famous by her final commanding officer John F Kennedy Fleshing out the little known chronicle of this patrol torpedo boat under two officers during the swirling battles around Guadalcanal John Domagalski brings PT 109 and her crew back to life once again and in doing so honors all who served in the patrol torpedo service Military Review In these mainly nocturnal fights when the Japanese navy was at its apex America's small fast boat flotillas darted in among the enemy fleet like a barroom brawl with the lights turned out Bryant Larson and Rollin Westholm preceded Kennedy as commanders of PT 109 and their fights leading the ship and its brave crew hold second to none in the chronicles of US Navy daring As the battles moved on across the Pacific the PT boat flotillas gained confidence even as the Japanese too learned lessons on how to destroy them Under its third and final commander Kennedy PT 109 met its fate as a Japanese destroyer suddenly emerged from a dark mist and rammed it in half Two crewmen were killed immediately but Kennedy formerly on the swim team at Harvard was able to shepherd his wounded and others to refuge His unsurpassed gallantry cannot resist retelling yet the courage of the book's previous commanders have not until now seen the light of day This book provides the complete record of PT 109 in the Pacific as well as a valuable glimpse of how the American Navy's daring and initiative found its full playing

21st century Middle East helping readers understand the region's present and look into its future The Middle East has been and will continue to be a major influence on policy around the globe This work reviews the impact of past epochs on the modern Middle East and analyzes key military events that contributed to forming the region and its people By helping readers recognize historical patterns of conflict the book will stimulate a greater understanding of the Middle East as it exists today The work probes cause and effect in major conflicts that include the fall of the Ottoman Empire the World Wars the Arab Israeli wars and the U S wars with Iraq examining the manner in which military operations have been conducted by both internal and external actors New regional groups for example the Gulf Cooperation Council GCC are addressed and pertinent events in Afghanistan and Pakistan are scrutinized Since military affairs are traditionally an extension of politics and economics the three are considered together in historical context as they relate to war and peace The book closes with a chapter on the Arab Awakening and its impact on the future balance of power Seapower States Andrew

Lambert, 2018-11-27 A fascinating geopolitical chronicle A superb survey of the perennial opportunities and risks in what Herman Melville called the watery part of the world The Wall Street Journal In this volume one of the most eminent historians of our age investigates the extraordinary success of five small maritime states Andrew Lambert author of The Challenge Britain Against America in the Naval War of 1812 winner of the prestigious Anderson Medal turns his attention to Athens Carthage Venice the Dutch Republic and Britain examining how their identities as seapowers informed their actions and enabled them to achieve success disproportionate to their size Lambert demonstrates how creating maritime identities made these states more dynamic open and inclusive than their lumbering continental rivals Only when they forgot this aspect of their identity did these nations begin to decline Recognizing that the United States and China are modern naval powers rather than seapowers is essential to understanding current affairs as well as the long term trends in world history This volume is a highly original big think analysis of five states whose success and eventual failure is a subject of enduring interest by a scholar at the top of his game An intriguing series of stories of communities thinking seriously about how to stand their own ground when outpowered how to do so in ways that are consistent with their values and sometimes how to negotiate the descent from being a great power when the cards just aren't in their favor any more These are timely questions Times Higher Education Supplement Lambert is without a doubt the most insightful naval historian writing today The Times
