First of all even if marginally it occurs through the reproduction of mainstream media and political accounts that have depicted refugees in terms of threats Secondly and more consistently through a representation of Syrian displaced people that despite the undeniable innovative aesthetic patterns focusing on dignity and empowerment continue to reinforce a visual narrative around refugees in terms of victimhood and passivity The reproduction of a securitized account takes also place through the dialectic between what is made visible in the pictures and what is not At the same time the book identifies visual glimmers and minor displacements in the humanitarian discourse that have the potentiality to produce alternative discourses on refugees and displacement beyond the mainstream securitized ones By showing how relief organizations visual representation contributes to the securitization of the refugee issue this book provides a great resource to students and academics in migration visuality humanitarianism and securitization as well as social scientists and policy makers
