Status, Biology, and Ecology of Fur Seals John P. Croxall, 1987 14 species summaries 12 contributed papers and 5 rapporteurs reports on fur seals throughout the world including the Pribilof Islands and Antarctica **Marine Mammal Biology** A. Rus Hoelzel, 2009-04-01 This book provides a general introduction to the biology of marine mammals and an overview of the adaptations that have permitted mammals to succeed in the marine environment Each chapter written by experts in their field will provide an up to date review and present the major discoveries and innovations in the field Important technical advances such as satellite telemetry and time depth recorders will be described in boxes Biology of Marine Mammals John E. Reynolds, 2013-08-06 Taking an integrated approach to the biology of marine carnivores cetaceans and sirenians twenty two prominent researchers compare marine mammals with one another and with terrestrial mammals providing a framework for fundamental biological and ecological concepts They describe functional morphology sensory systems energetics reproduction communication and cognition behavior distribution population biology and feeding ecology They also detail the physiological adaptations for such activities and processes as diving thermo regulation osmoregulation and orientation that enable marine mammals to exploit their aquatic environment *Marine Mammal Assessment Program* National Marine Mammal Laboratory (U.S.), 1993 **Appraisal**, 1981 Fishery Bulletin United States. National Marine Fisheries Service, 1986 *From MEMS to Bio-MEMS and Bio-NEMS* Marc J. Madou, 2011-06-13 From MEMS to Bio MEMS and Bio NEMS Manufacturing Techniques and Applications details manufacturing techniques applicable to bionanotechnology After reviewing MEMS techniques materials and modeling the author covers nanofabrication genetically engineered proteins artificial cells nanochemistry and self assembly He also discusses scaling laws in MEMS and NEMS actuators fluidics and power and brains in miniature devices He concludes with coverage of various MEMS and NEMS applications Fully illustrated in color the text contains end of chapter problems worked examples extensive references for further reading and an extensive glossary of terms Details the Nanotechnology Biology and Manufacturing Techniques Applicable to Bionanotechnology Topics include Nonlithography manufacturing techniques with lithography based methods Nature as an engineering guide and contrasts top down and bottom up approaches Packaging assembly and self assembly from ICs to DNA and biological cells Selected new MEMS and NEMS processes and materials metrology techniques and modeling Scaling laws actuators power generation and the implementation of brains in miniaturizes devices Different strategies for making micromachines smarter The transition out of the laboratory and into the marketplace The third volume in Fundamentals of Microfabrication and Nanotechnology Third Edition Three Volume Set the book discusses top down and bottom up manufacturing methods and explains how to use nature as a guide It provides a better understanding of how to match different manufacturing options with a given application that students can use to identify additional killer MEMS and NEMS applications Other volumes in the set include Solid State Physics Fluidics and Analytical Techniques in Micro and

Nanotechnology Manufacturing Techniques for Microfabrication and Nanotechnology **Library of Congress Catalog**
Library of Congress,1980-07 **The War Against the Seals** Briton Cooper Busch,1987 Concentrates on the fur seals of the Bering Sea and the harp seals of the Newfoundland hunt Reveals the consequences of an industry s killing of more than 50 000 000 seals in a century and a half **The Behaviour of Pinnipeds** D. Renouf,2012-12-06 We teach our students of behavioural science that one first defines a research problem and then the most appropriate animal is selected to investigate hypotheses The reverse order of events is improper a particular class of animals should not be studied for its own sake In the case of the Pinnipeds seals sea lions fur seals and walruses the organism and the problem are essentially the same The research questions presented in this volume in one way or another relate to survival in two worlds the ocean for foraging and the terrain at its edge or frozen above it for breeding The evolution of Pinniped behaviour and the mechanisms which underlie it are a consequence of having to cope with two seemingly incompatible sets of environmental constraints The physiological adaptations for concomitant functioning in two media with very different physical characteristics have produced correlated behavioural modifications The energetic demands of reproduction and foraging are idiosyncratic because each activity occurs on opposite sides of the air water interface As a result the mating system must reconcile aquatic design for such functions as locomotion and thermoregulation with the terrestrial requirements for successful pupping Similarly the ecology of this dual habitat prescribes the rules governing the behaviour of the neonate and its interactions with its mother **Marine Mammal Physiology** Michael A. Castellini,Jo-Ann Mellish,2015-11-18 Suppose you were designing a marine mammal What would you need to think about to allow it to live in the ocean How would you keep it warm What would you design to allow it to dive for very long periods to extreme depths Where would it find water to drink How would you minimize the cost of swimming and how would it find its prey in the deep an NOAA Technical Report NMFS.,1984 Soviet-American Cooperative Research on Marine Mammals ,1984 **Sampling Statistics in the Atlantic Menhaden Fishery** Alexander J. Chester,1984 Atlantic menhaden *Brevortia tyrannus* the object of a major purse seine fishery along the U S east coast are landed at plants from northern Florida to central Maine The National Marine Fisheries Service has sampled these landings since 1955 for length weight and age Together with records of landings at each plant the samples are used to estimate numbers of fish landed at each age This report analyzes the sampling design in terms of probability sampling theory The design is classified as two stage cluster sampling the first stage consisting of purse seine sets randomly selected from the population of all sets landed and the second state consisting of fish randomly selected from each sample set Implicit assumptions of this design are discussed with special attention to current sampling procedures Methods are developed for estimating mean fish weight numbers of fish landed and age composition of the catch with approximate 95% confidence intervals Based on specific results from three ports Port Monmouth N J Reedville Va and Beaufort N C for the 1979 fishing season recommendations are made for improving sampling procedures to comply more

exactly with assumptions of the sampling design These recommendations include adopting more formal methods for randomizing set and fish selection increasing the number of sets sampled considering the bias introduced by unequal set sizes and developing methods to optimize the use of funds and personnel *Population Biology of the Florida Manatee* Thomas J. O'Shea, Bruce Bennet Ackerman, Henry Franklin Percival, 1995 This is a collection of papers presented at a 1992 technical workshop on manatee population biology sponsored by the U S Fish and Wildlife Service and the Florida Department of Natural Resources Topics covered include manatee research programs techniques for studying manatee population biology and reports of completed studies The book concludes with recommendations from the workshop and a brief synopsis of pertinent work that has been published since the workshop **Environmental Contaminants in Biota W.** Nelson Beyer, James P. Meador, 2011-02-23 Discussing the interpretation of tissue concentrations of contaminants in wildlife this updated edition of a bestseller draws on current scientific research and includes new chapters and greater emphasis on aquatic organisms Each chapter provides a summary and review of a specific chemical along with direction on research methods and the interpretation of conflicting or insufficient data Chapters include a comprehensive history of contaminant interpretation in wildlife and fish the use of tissue residues in ecological risk assessment and detailed coverage of all bioaccumulative contaminants and their physiologic affects *Glacier Bay National Park (N.P.) and Preserve, Vessel Quotas and Operating Requirements* ,2003 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.),1971 **Science Books for Children** Denise Murcko Wilms,1985 Provides an annotated list of useful books about math computers astronomy physics chemistry earth sciences biology experiments and scientists **Introduction to the Biology of Marine Life** James L.
