Starting With Foucault C. G. Prado, 2018-03-05 Michel Foucault had a great influence upon a wide range of disciplines and his work has been widely interpreted and is frequently referred to but it is often difficult for beginners to find their way into the complexities of his thought This is especially true for readers whose background is Anglo American or analytic philosophy C

G Prado argues in this updated introduction that the time is overdue for Anglo American philosophers to avail themselves of what Foucault offers In this clear and greatly revised second edition Prado focuses on Foucault s middle or genealogical work particularly Discipline and Punish and Volume One of The History of Sexuality in which Foucault most clearly comes to grips with the historicization of truth and knowledge and the formation of subjectivity Understanding Foucault s thought on these difficult subjects requires working through much complexity and ambiguity and Prado s direct and accessible introduction is the ideal place to start

Shattering Silos Lambert Zuidervaat,2022-08-15 Questions first raised by Hannah Arendt in the 1960s take on new urgency in the post truth era as political leaders blithely reject facts in the public domain Is truth politically impotent Are politics inherently false Is the search for truth still relevant Shattering Silos a companion volume to Religion Truth and Social Transformation and Art Education and Cultural Renewal provides a path breaking response As in his two previous books Lambert Zuidervaat challenges the boundaries philosophers set up between epistemology ethics and political philosophy Knowledge he argues takes different forms in various social domains and all are subject to political struggle A critique of contemporary society must draw on many social domains of knowledge including the arts and religion and should recast politics as a striving for truth in the broadest sense Proposing a new conception of truth one that emphasizes the unity of knowledge and truth as well as their diversity among different social domains Zuidervaat asks what such holism and pluralism suggest about how we understand politics and society This book proposes a new understanding of large scale social change challenging how most people think about knowledge and truth Interweaving epistemology social criticism and political thought Shattering Silos aims to help redirect an allegedly post truth society

Dictionary of Modern American Philosophers John R. Shook,2005-01-01 The Dictionary of Modern American Philosophers includes both

academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected. It includes those intellectuals involved in the development of psychology, pedagogy, sociology, anthropology, education, theology, political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century. Each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings and suggestions for further reading. While all the major post Civil War philosophers are present, the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers. In many cases the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers. This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought.

Educating Christian Teachers for Responsive Discipleship Peter P. DeBoer, 1993. Five members of the Calvin College Center for Christian Scholarship 1991-1992 team present some creative and constructive proposals for changes that could occur in the teacher education programs of hundreds of church related colleges. Theoretically committed to a biblical vision of responsive discipleship, the authors sketch out 1. a curricular theory that encourages many-sided encounters with created reality which stimulate varieties of student responses that should arise ultimately from a commitment of the heart, 2. a collaborative model of teacher education that urges congruent values to be held by the local school, school district and the teacher education college, and 3. a curriculum that arises in part out of the laboratory of the classroom through the interaction of teacher and student in a school organized to develop collegiality among teachers and students where, through the use of evaluative portfolios, student teachers learn to be reflective practitioners of the art and craft of teaching. Co-published with the Institute for Christian Studies.

In the Phrygian Mode Robert Sweetman, 2007. This volume has emerged from a small scholarly conference on the relationship between Christianity and Greco-Roman civilization, above all that civilization's characteristic patterns of philosophical thought. The field of investigation is the neo-Calvinist current within Dutch protestantism and the elaboration in the 1920s and 1930s of Calvinistic philosophy as one of its most distinctive effects. This parish tale has more to recommend it than might appear at first blush. For there is a good argument to be made why such a thoroughly local study can benefit a much broader segment of contemporary Protestantism.

Towards an Ethics of Community James Olthuis, 2006-01-01. How do we deal with difference personally, interpersonally, nationally? Can we weave a cohesive social fabric in a religiously plural society without suppressing differences? This collection of significant essays suggests that to truly honour differences in matters of faith and religion we must publicly exercise and celebrate them. The secular/sacred, public/private divisions long considered sacred in the West need to be dismantled if Canada or any nation/state is to develop a genuine mosaic that embraces fundamental differences instead of a melting pot that marginalizes. An ethics of difference starts with a recognition of difference not as deviance or deficit that threatens but as otherness to connect with, cherish and celebrate. The book begins

with the suggestion that our inability to come to terms with social plurality is not fundamentally the fault of religious differences and that a public private split inadequately deals with matters of basic difference It then explores how encouraging people to live out their respective faiths may open new possibilities for respectful honourable and just negotiations of contemporary dilemmas arising out of the multicultural fabric of Canadian life Towards an Ethics of Community introduces readers to some of the most challenging and divisive dilemmas we face in this increasingly pluralistic postmodern world issues such as family and domestic violence Aboriginal rights homosexuality and public policy and female genital mutilation This is a book truly global in scope and significance *In Search of a Withering Community* ,2002

Critical Faith Ronald A. Kuipers, 2021-11-15 Can religious faith be critical and remain recognizable as faith Or is the idea of a critical faith a contradiction in terms In this book an emerging new voice in the philosophy of religion argues in favor of critical faith Playing on a double meaning of the word critical the title of the book suggests that faith is not only a critical crucial component of human life but also a component that can and should develop in a critical intellectually vigilant way Taking John Locke s reflections on the relationship between faith and reason as his point of departure the author weaves his discussion around a wide array of intellectual figures and conversations In addition to addressing important elements in the work of such historical figures as Aquinas and Locke Kuipers also incorporates themes from recent discussions in the philosophy of science feminist epistemology philosophy of language liberal theology and critical theory The book ends with a discussion of elements in Jurgen Habermas s theory of communicative action and offers a critical assessment of the merit of Habermas s notion of critical rationality as a normative yardstick for the achievement of a critical faith
