The Search for Alien Contact in the New Millenium* Ben Bova,Byron Preiss,2010-07-15 Are we alone in this cosmos or do we yet have to come to terms with the actual existence of alien life Never before has so much time and concentrated effort been spent by so many scientists and writers in the pursuit of the answer to this fundamental question In this extraordinary book major scientists involved in the search for extraterrestrial intelligence known as SETI explain their work and reveal their secret thoughts Now in joining them here are some of the best speculative thinkers from Arthur C Clarke and Isaac Asimov to Gregory Benford who address the major philosophical questions involved Intriguing suspense filled and intense this book promises to deliver more than just mundane facts and theory **Future Space Programs 1975** United States. Congress. House. Committee on Science and Technology. Subcommittee on Space Science and Applications,1975 [The Search for Extraterrestrial Intelligence \(SETI\) in the Optical Spectrum](#) Stuart A. Kingsley,1993 **Scientific and Technical Aerospace Reports** ,1994-05 **Contact with Alien Civilizations** Michael Michaud,2010-05-05 The proper study of mankind is not merely Man but Intelligence 1 Arthur C Clarke 1951 In the long running television series The X Files the original Deep Throat said to FBI Special Agent Mulder that there are those like yourself who believe in the existence of extraterrestrial life Ah but that s not the question If extraterrestrial life exists most of it may be in simpler forms comparable to the one celled organisms of Earth biology Finding such life would be fascinating for scientists but may be of only passing interest to the general public What intrigues the average citizen is the possibility of contact with extraterrestrial intelligence We want to communicate with other sentient beings learning what they know and telling them about ourselves We want to nd out how they are like us and how they are different Microorganisms don t have a lot to say There is another implication of contact that underlies this book Intel gent extraterrestrials might have an impact on our future The information they send us if any might change our cultures They could have c scious intentions toward us and possibly the technologies to reach us directly Their intentions may be benign or not Our interest in alien minds is not new The idea that intelligent beings exist beyond the Earth has been part of the Western intellectual tradition for more than 2000 years Sometimes this belief was widespread at other times it was out of fashion **The Search for Extraterrestrial Life: Recent Developments** M.D. Papagiannis,2012-12-06 PROCEEDINGS IAU S 1WOSIUM 112 Michael D Papagiannis Department of Astronomy Boston University Boston Massachusetts 02215 USA 1 THE SYMPOSIUM AND THE PROCEEDINGS IAU Symposium 112 The Search for Extraterrestrial Life Recent Developments was held in Boston and in particular at the new Science Center of Boston

Civilized Life in the Universe

George Basalla,2006-01-19 This book is a selective and fascinating history of scientific speculation about intelligent extraterrestrial life From Plutarch to Stephen Hawking some of the most prominent western scientists have had quite detailed perceptions and misperceptions about alien civilizations Johannes Kepler fresh from transforming astronomy with his work on the shape of planetary orbits was quite sure alien engineers on the moon were excavating circular pits to provide shelter Christiaan Huygens the most prominent physical scientist between Galileo and Newton dismissed Kepler's speculations but used the laws of probability to prove that planetarians on other worlds are much like humans and had developed a sense of the visual arts Carl Sagan sees clearly that Huygens is a biological chauvinist but doesn't see as clearly that he Sagan may be a cultural technological chauvinist when he assumes aliens have highly developed technology like ours but better Basalla traces the influence of one speculation on the next showing an unbroken but twisting chain of ideas passed from one scientist to the next and from science to popular culture He even traces the influence of popular culture on science Sagan always admitted how much E R Burroughs' Martian novels influenced his speculations about Mars Throughout Basalla weaves his theme that scientific belief in and search for extraterrestrial civilizations is a complex impulse part secularized religious and part anthropomorphic He questions the common modern scientific reasoning that life converges on intelligence and intelligence converges on one science valid everywhere He ends the book by agreeing with Stephen Hawking usually a safe bet that intelligence is overrated for survival in the universe and that we are most likely alone
