the slave castles of Ghana Barnett has created an unforgettable history of our world through an examination of the unassuming seashell She begins with their childhood wonder unwinds surprising histories like the origin of Shell Oil as a family business importing exotic shells and charts what shells and the soft animals that build them are telling scientists about our warming acidifying seas From the eerie calls of early shell trumpets to the evolutionary miracle of spines and spires and the modern science of carbon capture inspired by shell Barnett circles to her central point of listening to nature s wisdom and acting on what seashells have to say about taking care of each other and our world The Seashell on the Mountaintop Alan Cutler,2003 The life and accomplishments of a 17th century scientist turned priest are explored in this story of science sainthood and the humble genius who forever changed the understanding of the Earth and created a new science geology

Possible Worlds in Humanities, Arts and Sciences Allén Sture,2010-11-22 No detailed description available for Possible Worlds in Humanities Arts and Sciences *The Empty Seashell* Nils Bubandt,2015-05-06 The Empty Seashell explores what it is like to live in a world where cannibal witches are undeniably real yet too ephemeral and contradictory to be an object of belief In a book based on more than three years of fieldwork between 1991 and 2011 Nils Bubandt argues that cannibal witches for people in the coastal and predominantly Christian community of Buli in the Indonesian province of North Maluku are both corporeally real and fundamentally unknowable Witches known as gua in the Buli language or as suangi in regional Malay appear to be ordinary humans but sometimes especially at night they take other forms and attack people in order to kill them and eat their livers They are seemingly everywhere and nowhere at the same time The reality of gua therefore can never be pinned down The title of the book comes from the empty nautilus shells that regularly drift ashore around Buli village Convention has it that if you find a live nautilus you are a gua Like the empty shells witchcraft always seems to recede from experience Bubandt begins the book by recounting his own confusion and frustration in coming to terms with the contradictory and inaccessible nature of witchcraft realities in Buli A detailed ethnography of the encompassing inaccessibility of Buli witchcraft leads him to the conclusion that much of the anthropological literature which views witchcraft as a system of beliefs with genuine explanatory power is off the mark Witchcraft for the Buli people doesn t explain anything In fact it does the opposite it confuses obfuscates and frustrates Drawing upon Jacques Derrida s concept of aporia an interminable experience that remains continuously in doubt Bubandt suggests the need to take seriously people s experiential and epistemological doubts about witchcraft and outlines by extension a novel way of thinking about witchcraft and its relation to modernity *Natural History Collector: Hunt, Discover, Learn!* Michael Sanchez,2017-12-19 Loaded with hands on kid friendly projects Natural History Collector Hunt Discover Learn will teach budding nature collectors techniques for cleaning caring for and displaying discovered treasures Coming home from the beach or a walk in the woods with a fine collection of rocks shells pine cones and seed pods is easy The trick is knowing what to do with them once you get them back to your room The real fun comes from identifying preserving and displaying your treasures Natural History Collector Hunt

Discover Learn is full of hands on kid friendly projects for the budding naturalist The opening chapter introduces kids to different ways of creating their personal field guides for keeping track of what they see when and where they see it and what makes it interesting They ll move on to techniques for cleaning and caringfor treasures such as drying flowers pressing leaves and desalinizing rocks and shells The book s drawings and photographs will help kids discover what to look for when they examine feathers seeds and minerals and recognize the difference between sedimentary igneous and metamorphic Extra projects focus on display making shadow boxes creating collectors cases from egg cartons and candy boxes labeling hanging and mounting collections

Aquaculture: Ocean Blue Carbon Meets UN-SDGS David Moore,Matthias Heilweck,Peter Petros,2022-03-26 This book presents a solutions based approach to reducing and removing CO₂ from the atmosphere transforming it into solid crystalline CaCO₃ through the ability of marine organisms such as molluscs crustacea corals and coccolithophore algae The overwhelming advantage of this approach is that it promises enhanced climate mitigation in comparison to planting forests industrial engineering carbon capture and storage process It also provides a sustainable food resource Furthermore it would improve the ocean s biodiversity at the same time as the excess atmospheric CO₂ released by our use of fossil fuels is returned to the place it belongs as a present day fossil safely out of the atmosphere to the distant future If the level of finance and global effort that are readily foreseen for forest management and flue gas treatments were applied to expansion of global shellfish cultivation curative amounts of carbon dioxide could be permanently removed from the atmosphere within afew decades The concept presented in this book could have a profound influence on the life of the planet

A Natural History of Shells Geerat J. Vermeij,1995-04-23 From one of the master naturalists of our time American Scientist a fascinating exploration of what seashells reveal about biology evolution and the history of life Geerat Vermeij wrote this celebration of shells to share his enthusiasm for these supremely elegant creations and what they can teach us about nature Most popular books on shells emphasize the identification of species but Vermeij uses shells as a way to explore major ideas in biology How are shells built How do they work And how did they evolve With lucidity and charm the MacArthur winning evolutionary biologist reveals how shells give us insights into the lives of animals today and in the distant geological past
