Season In Sarawak:

Science & Emotions after 1945 Frank Biess,Daniel M. Gross,2014-05-22 Through the first half of the twentieth century emotions were a legitimate object of scientific study across a variety of disciplines After 1945 however in the wake of Nazi irrationalism emotions became increasingly marginalized and postwar rationalism took central stage Emotion remained on the scene of scientific and popular study but largely at the fringes as a behavioral reflex or as a concern of the private sphere So why by the 1960s had the study of emotions returned to the forefront of academic investigation In Science and Emotions after 1945 Frank Biess and Daniel M Gross chronicle the curious resurgence of emotion studies and show that it was fueled by two very different sources social movements of the 1960s and brain science A central claim of the book is that the relatively recent neuroscientific study of emotion did not initiate but instead consolidated the emotional turn by clearing the ground for multidisciplinary work on the emotions Science and Emotions after 1945 tells the story of this shift by looking closely at scientific disciplines in which the study of emotions has featured prominently including medicine psychiatry neuroscience and the social sciences viewed in each case from a humanities perspective Afterlife of Empire Jordanna Bailkin,2012-11-15 This book investigates how decolonization transformed British society in the 1950s and 1960s and examines the relationship between the postwar and the postimperial **Annual Report on Sarawak for the Year ... ,1947**

modern human behavior as manifested in Asia during the worldwide dispersal from Africa *Bioarchaeology of Southeast Asia* Marc Oxenham,Nancy Tayles,2006-04-20 Bioarchaeology of Southeast Asia focuses uniquely on the physical remains of the prehistoric peoples of this region **Sacred Darkness** Holley Moyes,2012-09-01 Caves have been used in various ways across human society but despite the persistence within popular culture of the iconic caveman deep caves were never used primarily as habitation sites for early humans Rather in both ancient and contemporary contexts caves have served primarily as ritual spaces In Sacred Darkness contributors use archaeological evidence as well as ethnographic studies of modern ritual practices to envision the cave as place of spiritual and ideological power and a potent venue for ritual practice Covering the ritual use of caves in Europe Asia Australia Africa Mesoamerica and the US Southwest and Eastern woodlands this book brings together case studies by prominent scholars whose research spans from the Paleolithic period to the present day These contributions demonstrate that cave sites are as fruitful as surface contexts in promoting the understanding of both ancient and modern religious beliefs and practices This state of the art survey of ritual cave use will be one of the most valuable resources for understanding the role of caves in studies of religion sacred landscape or cosmology and a must read for any archaeologist interested in caves **Borneo Studies in History, Society and Culture** Victor T. King,Zawawi Ibrahim,Noor Hasharina Hassan,2016-08-12 This edited book is the first major review of what has been achieved in Borneo Studies to date Chapters in this book situate research on Borneo within the general disciplinary fields of the social sciences with the weight of attention devoted to anthropological research and related fields such as development studies gender studies environmental studies social policy studies and cultural studies Some of the chapters in this book are extended versions of presentations at the Borneo Research Council's international conference hosted by Universiti Brunei Darussalam in June 2012 and a Borneo Studies workshop organised in Brunei in 2012 The volume examines some of the major debates and controversies in Borneo Studies including those which have served to connect post war research on Borneo to wider scholarship It also assesses some of the more recent contributions and interests of locally based researchers in universities and other institutions in Borneo itself The major strength of the book is the inclusion of a substantial amount of research undertaken by scholars working and teaching within the Southeast Asian region In particular there is an examination of research materials published in the vernacular notably the outpouring of work published in Indonesian by the Institut Dayakologi in Pontianak In doing so the book also addresses the urgent matters which have not received the attention they deserve specifically subjects themes and issues that have already been covered but require further contemplation elaboration and research and the scope for disciplinary and multidisciplinary collaboration in Borneo Studies The book is a valuable resource and reference work for students and researchers interested in social science scholarship on Borneo and for those with wider interests in Indonesia and Malaysia and in the Southeast Asian region **Crossing Borders** Dominik Bonatz,Andreas Reinecke,Mai Lin Tjoa-Bonatz,2012-01-01 Based on recent field research and excavation finds the

contributions in this volume focus on cultural practices and materials which reflect processes of integration specification and diversification in the prehistory and early history of Southeast Asia. With chapters on the variability and distribution of lithic assemblages, funerary practices, the spread of Neolithic cultures and field agriculture and the development of Metal Age remains, different approaches are presented to interpret these phenomena in their specific environmental context. Crossing Borders contains 25 papers presented at the 13th International Conference of the European Association of Southeast Asian Archaeologists EurASEAA. Held in Berlin in 2010, the conference was jointly organized by the Institute of Ancient Near Eastern Archaeology at the Freie Universität Berlin and the German Archaeological Institute. The peer reviewed proceedings bring together archaeologists, art historians and philologists who share a common interest in Southeast Asia's early past.
