If we want to understand what God was telling John about the future we need to first understand what John understood Professor Jon Paulien Loma Linda University USA In *Jesus The Portrait and Inscription of God* the author pours his years of research into addressing the issue that Jon Paulien highlights Paki builds an intriguing case for a dual focused method of interpreting Revelation He uses this method to show i that Revelation was written primarily to John and his initial audience ii that the same prophecies also speak to us with clarity and force iii Then he wonders if God intentionally used the same material to speak to an audience then and now When this method is applied to Revelation 1 3 the text does come alive Deep theological truths and nuggets extracted are way too many to recount in a single book In fact this fresh approach minimizes most of our interpretive issues and enhances our understanding and appreciation of the apocalyptic Christ Some of our leading scholars agree It is well written well laid out and has good solid biblical insights Good solid evidence for Revelation s high Christology Dr Kayle de Waal Avondale College Australia I found it thoughtful helpful and interesting to read The style of presentation is also very attractive Professor Jon Paulien Loma Linda University USA You have clearly shown the relationship between Revelation 1 3 with the rest of Revelation Dr Ross Cole Avondale College Australia The method used its interpretations and the theological insights are corroborated by other Johannine books the New Testament the Old Testament and the Spirit of Prophecy This volume will enhance the libraries of academics and laypeople alike **A**

Friedrich,2021-10-26 A noted linguist examines extinct languages from Egyptian hieroglyphs to the mysteries of as yet undeciphered writings in this scholarly work While certain ancient languages were passed down continuously through the ages many others were ignored for centuries When scholars began to decipher these extinct languages in the early nineteenth century they uncovered previously inaccessible riches of knowledge and history Yet much work remains to be done on undeciphered scripts that continue to tantalize and perplex us today In Extinct Languages linguist Johannes Friedrich guides readers through the fascinating world of recovered systems of writing including Egyptian and Hittite hieroglyphs Babylonian cuneiform and others He also explains the methodology and principles behind the deciphering process that will one day crack ancient mysteries such as the Indus Valley script **Book Auction Records** Frand

Reconceptions in Philosophy and Other Arts and Sciences Nelson Goodman,Catherine Z. Elgin,1988-01-01 The authors argue against certain philosophical distinctions between art and science between verbal and nonverbal meaning and between

the affective and the cognitive The book continues Goodman s argument against one traditional mode of philosophizing which privileges the notions of truth and knowledge Hence the book is in a broadly pragmatic tradition It also deals in detail with such topics as meaning in architecture and the concept of variation in art and contains a superb critique of some important views in contemporary epistemology This work will be savored even by those who will not accept all aspects of Goodman and Elgin s approach Essential for all undergraduate philosophy collections Stanley Bates Choice **Caxton head catalogues.
