Tourism Planning and Development in Western Europe

Konstantinos Andriotis, Carla Pinto Cardoso, Dimitrios Styliadis, 2022-03-11 For many decades Western European countries have undertaken diverse pathways in tourism development and planning. Most have experienced fast or even unlimited growth resulting in overtourism and now the introduction of policies that respect the limits of communities and the sustainability of their resources. Focusing exclusively on tourism development planning and policy, this book draws together new voices to discuss issues across Belgium, Denmark, Faroe Islands, Finland, France, Germany, Greenland, Iceland, Ireland, Italy, Malta, Norway, Portugal, Spain, Sweden, and the UK. An invaluable collection for policy makers, researchers, and academics, this book is also an insightful source of engaging contemporary case studies for use in the classroom. Forecasting Tourism Demand

Douglas Frechtling, 2012-05-23 Forecasting tourism demand is a text that no tourism professional can afford to be without. The tourism industry has experienced an overwhelming boom over recent years, and being able to predict future trends as accurately as possible is vital in the struggle to stay one step ahead of the competition. Building on the success of Practical Tourism Forecasting, this text looks at 13 methods of forecasting and, with a user-friendly style, Forecasting Tourism Demand guides the reader through each method, highlighting its strengths and weaknesses and explaining how it can be applied to the tourism industry. Forecasting Tourism Demand employs charts and tables to explain how to plan a forecasting project, analyse time series, and other information, select the appropriate forecasting model, use the model for forecasting, and evaluate its results. Ideal for marketing managers and strategic planners, business transportation planners, and economic policy makers in government who must project demand for their products among tourists, executives who rely on forecasts prepared by others will find it invaluable in assisting them to evaluate the validity and reliability of predictions and forecasts. Those engaged in analysing business trends will find it useful in surveying the future of what has been called the largest industry in the world.

Extreme Tourism Godfrey Baldacchino, 2006 This book is a pioneering investigation of the tourism practices in the world's other cold water islands. Located in extreme latitudes and subject to extreme weather conditions, these islands have been developing their tourism appeal in manners that appear sustainable. They present themselves in images that speak to the pristine, unique, and superlative aspects of their natural environment, history, and culture. Limited seasonality, difficulty of access, restricted infrastructure, harsh climates, and water too cold to swim in are integral features of the tourism industry, often welcomed as appropriate filters to the slide to the mass market. The collection contains 13 island case studies. A set of seven hail from Northern latitudes: Baffin, Nunavut, Canada; Banks, Northwest Territories, Canada; Greenland; Kaalaalit, Nunaat, Iceland; Lule, Sweden; Nunivak, Alaska; Solovetsky, Russia; and Svalbard, Norway. A second set of four cover the Southern islands: Chatham, New Zealand; Falklands, Macquarie, Australia; and Stewart, New Zealand. Two other chapters discuss islands from the particular vantage points of cruise ship tourism, one for the Arctic region and one for the Antarctic. Additionally, five conceptual chapters provide insights into key tourism management issues as they apply to cold
