Modernism and Subjectivity Adam Meehan, 2020-06-03 In *Modernism and Subjectivity* How Modernist Fiction Invented the Postmodern Subject Adam Meehan argues that theories of subjectivity coming out of psychoanalytic poststructuralist and adjacent late twentieth century intellectual traditions had already been articulated in modernist fiction before 1945 Offering a bold new genealogy for literary modernism Meehan finds versions of a postmodern subject embodied in works by authors who intently undermine attempts to stabilize conceptions of identity and who draw attention to the role of language in shaping conceptions of the self Focusing on the philosophical registers of literary texts Meehan traces the development of modernist attitudes toward subjectivity particularly in relation to issues of ideology spatiality and violence His analysis explores a selection of works published between 1904 and 1941 beginning with Joseph Conrad's prescient portrait of the subject interpolated by ideology and culminating with Samuel Beckett's categorical disavowal of the subjective I Additional close readings of novels by F Scott

Fitzgerald Aldous Huxley James Joyce Nathanael West and Virginia Woolf establish that modernist texts conceptualize subjectivity as an ideological and linguistic construction that reverberates across understandings of consciousness race place and identity By reconsidering the movement s function and scope Modernism and Subjectivity charts how profoundly modernist literature shaped the intellectual climate of the twentieth century

architectural and urban discourse in the United States from the earliest days of the auto industry to the aftermath of the 1970s oil crisis. Paying particular attention to developments after World War II, Esperdy creates a narrative that extends from U.S. Routes 1 and 66 to the Las Vegas Strip to California freeways with stops at gas stations, diners, main drags, shopping centers, and parking lots along the way. While it addresses the development of auto-oriented landscapes and infrastructures, *American Autopia* is not a conventional history; offering instead an exploration of the wide-ranging evolution of car-centric territories and drive-in typologies, looking at how they were scrutinized by diverse cultural observers in the middle of the twentieth century. Drawing on work published in the popular and professional press and generously illustrated with evocative images, the book shows how figures as diverse as designer Victor Gruen, geographer Jean Gottmann, theorist Denise Scott Brown, critic J.B. Jackson, and historian Reyner Banham constructed autopia as a place and an idea. The result is an intellectual history and interpretive roadmap to the United States of the Automobile.

**The Legendary Estates of Beverly Hills** Jeffrey Hyland, 2025-09-02

A re-edition of the authoritative Los Angeles estates book featuring the homes, gardens, and lifestyles of many of the city's original great architects and residents. This deluxe volume offers a meticulously researched and lavishly illustrated history of fifty magnificent estates in three of America's most prized residential districts: Beverly Hills, Bel Air, and Holmby Hills. Lush color photographs as well as a trove of historical images take readers beyond the front gates for an exceptional view of the mansions, grounds, and gardens of these sumptuous estates and tell the history of Los Angeles's rise from rugged paddocks and farmland to famed metropolis. Each house is explored both for its historical and architectural importance; here are the epitome of residences and gardens reflecting the famed Italianate and California Mediterranean styles by all the leading architects of Southern California, including Wallace Neff, James Dolena, Gordon Kaufmann, Robert Farquhar, Roland Coate, and Paul Williams. They built for clients such as Gary Cooper, Buster Keaton, Harold Lloyd, and Bing Crosby, whose own stories reflect the intrigue and foibles of Hollywood society. The book's final chapter, *Gone but Not Forgotten*, pays homage to great estates that have been destroyed or lost to history.

*From Chicago to L.A.* Michael Dear, 2001-07-31

For most of the twentieth century, the principles of the Chicago School have guided urban analysts throughout the world. Los Angeles has been regarded as an exception to the rules governing the growth of American cities. But just as the Chicago School emerged at a time when that city was reaching new national prominence, Los Angeles is now making its impression on the minds of urbanists across the world. *From Chicago to L.A.* begins the task of defining an alternative agenda for urban studies and examines the case for shifting the focus of urban studies from Chicago to Los Angeles. The authors, experienced scholars from a variety of disciplines, examine the concepts that have blocked our understanding of Southern California cities. The

imaginative structures that people have been using to understand and explain Los Angeles The utility of the Los Angeles School of urbanism
