Los Secretos Del Bosque The Secret Fores:

Cultural Encounters in Contemporary Spain Debra Faszter-McMahon, 2010-07 Previous critical studies have focused on feminist approaches to Jane's oeuvre. This study seeks to expand those discussions through an analysis of the aesthetics of cultural otherness rather than simply gendered otherness within Jane's prolific literary production. The Paradigm of Forests and the Survival of the Fittest Sergio A. Molina-Murillo, Carlos Rojas Alvarado, 2018-12-20 This book demonstrates the social historical and environmental framework within which humans have developed a relationship with the forest and its resources. Starting from the biological basis that permits the existence of forests to the use of forest resources in a modern human context, this book summarizes the interaction between humans and forest ecosystems. Designed for readers from a broad range of disciplines and interests including those from environmental sciences, environmental economics, sociology, anthropology, biology, forestry, and human ecology, and other related disciplines, the book evokes interest in the development of an integrated approach towards forest ecosystems and natural resources in the context of sustainability. A Laboratory of Her Own Victoria L. Ketz, Dawn Smith-Sherwood, Debra Faszter-McMahon, 2021-01-15 A Laboratory of Her Own gathers diverse voices to address women's interaction with STEM fields in the context of Spanish cultural production. This volume focuses on the many ways the arts and humanities provide avenues for deepening the conversation about how women have been involved in, excluded from, and represented within the scientific realm. While women's historic exclusion from STEM fields has been receiving increased scrutiny worldwide, women within the Spanish context have been perhaps even more peripheral given the complex sociocultural structures emanating from gender norms and political ideologies dominant in nineteenth and twentieth century Spain. Nonetheless, Spanish female cultural producers have long been engaged with science and technology as expressed in literature, art, film, and other genres. Spanish arts and letters offer diverse representations of the relationships between women, gender, sexuality, race, and STEM fields. A Laboratory of Her Own studies representations of a diverse range of Spanish women and scientific cultural products from the late nineteenth through the twenty-first centuries. STEM topics include the environment, biodiversity, temporal and spatial theories, medicine, and reproductive rights, neuroscience, robotics, artificial intelligence, and quantum physics. These scientific themes and other issues are analyzed in narratives, paintings, poetry, photographs, science fiction, medical literature, translation, newswriting, film, and other forms.
